1.0 SUMMARY

ECT has completed a Phase I Environmental Site Assessment (ESA) for the Downtown Recreation Complex facility, located at the northeast corner of the intersection of North Parramore Avenue and West Livingston Street, Orlando, Florida (Site). The Site's physical address is 649 Bentley Street, Orlando, Florida 32801. This Phase I ESA was conducted in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E1527-05 for Phase I ESAs. Deviations or data gaps from this Practice are described in Section 11 of this report.

The Phase I ESA investigation has revealed evidence of recognized environmental conditions (RECs) associated with the Site:

- Former USDA facility and former USDA field laboratory on the northeast portion of Site
- Former USDA facility on the west-central portion of Site
- Former Armory facility on the southwest portion of the Site
- The former Orlando Gasification Plant is considered a REC. Documented benzene impacts are present on the southeastern portion of the Site.

2.0 INTRODUCTION

ECT has conducted a Phase I ESA for the Downtown Recreation Complex facility, located at the northeast corner of the intersection of North Parramore Avenue and West Livingston/Bentley Street, Orlando, Florida (Site). The Site's physical address is 649 Bentley Street, Orlando, Florida 32801. The Site consists of: 1) A main building with annex and several outbuildings that collectively comprise the multipurpose Downtown Recreation Complex, and one building with a detached maintenance building and 16 tennis courts that collectively comprise the Orlando Tennis Centre; 2) a second parcel of vacant land that previously served as an overflow parking area for the former Amway Arena; and 3) a third parcel of vacant land that previously as an overflow parking area for the Bob Carr Auditorium. A Site Location Map is provided as **Figure 1**. A USGS Topographic Map, 1998, West Orlando, which includes the Site and the surrounding area, is provided as **Figure 2**. An aerial photograph, circa 2012, depicting the Site is provided as **Figure 3**.

2.1 Purpose

Mr. Dan Dashtaki with the City of Orlando authorized ECT to conduct a Phase I ESA of the Site to evaluate the presence/absence of RECs in anticipation of future redevelopment activities. The City of Orlando is the recipient of a Brownfields Assessment Grant, EPA Cooperative Agreement BF-95498212. This grant was awarded in September 2012, and is a community-wide assessment grant, with emphasis on the Parramore area, specifically targeting redevelopment areas.

The objective of the Phase I ESA was to identify RECs in connection with the Site, to the extent feasible pursuant to the processes prescribed in the ASTM E-1527-05 guidelines. The term “*REC*” as defined by ASTM is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This Phase I ESA includes information gathered from federal, state, and local agencies; personal interviews with people familiar with the Site and surrounding properties; a Site visit was conducted by American Environmental Consulting (AEC) on October 2, 2013. This report is intended to meet the due diligence requirements of ASTM E 1527-05.

2.2 Detailed Scope of Services

The Phase I ESA conducted by ECT included, but was not limited to, the following services:

- Review of the public record;
- Site reconnaissance to identify visual signs of environmental conditions on or adjoining the Site, and to evaluate evidence found in the review of public record that might be indicative of activities resulting in hazardous substances or petroleum products being used or deposited in the Site;
- Preparation of a written report documenting our findings, opinions, and conclusions.

2.3 Significant Assumptions

This Phase I ESA was prepared using information obtained from and/or provided by the following sources:

- Visual observations of the Site;
- Available published information;
- Third-party database searches, and;
- Local/State government officials and/or records.

It is assumed that the information obtained through the above methods is valid and accurate as provided. The passage of time, manifestation of latent conditions, and occurrence of future events or changes to existing codes/regulations may alter the conclusions and recommendations of this report.

2.4 Limitations and Exceptions

The opinions presented in this report are based upon the scope of services, information obtained through the performance of the services, and the schedule as agreed upon by ECT and the party for whom this report was originally prepared. This report is an instrument of professional service and was prepared in accordance with the generally accepted standards and level of skill and care under similar conditions and circumstances established by the environmental consulting industry. No representation, warranty, or guarantee, expressed or implied, is intended or given. To the extent that ECT relied upon information prepared by other parties not under contract to ECT, ECT makes no representation as to the accuracy or completeness of such information. This report is expressly for the sole and exclusive use of the party for whom this report was originally prepared, and for a particular purpose. Only the party for whom this report was originally prepared and/or other specifically named parties have the right to make use of and rely upon this report. Reuse of this report or any portion thereof for other than its intended purpose, or if modified, or if used by third parties, shall be at the user's sole risk.

The findings presented in this report apply solely to the Site conditions existing at the time when ECT's assessment was performed. It must be recognized, however, that an ESA is intended for the purpose of determining the potential for contamination through limited research and investigative activities and in no way represents a conclusive or complete site characterization. Conditions in other parts of the Site may vary from those at the locations where data were collected. ECT's ability to interpret investigation results is related to the availability of the data and the extent of the investigation activities. ECT does not provide any guarantees, certifications, or warranties that a property is free from environmental contamination. Furthermore, nothing contained in this document shall relieve any other party of its responsibility to abide by contract documents and applicable laws, codes, regulations, or standards.

2.5 Special Terms and Conditions

The scope of work for this Phase I ESA did not include testing of electrical equipment for the potential presence of PCBs or the assessment of natural hazards such as naturally occurring asbestos or methane gas, assessment of the potential presence of radionuclides, or assessment of non-chemical hazards such as the potential for damage from earthquakes or floods. This Phase I ESA also did not include an extensive assessment of the environmental compliance status of the Site or of the businesses operating onsite, or a health-based risk assessment.

2.6 User Reliance

This Phase I ESA was conducted for the use and reliance of the City of Orlando. No use of the information contained in this report by others is permissible without receiving prior written authorization to do so from ECT. ECT is not responsible for independent conclusions, opinions, or recommendations made by others or otherwise based on the findings presented in this report.

3.0 SITE DESCRIPTION

This section presents a general overview of the Site, onsite improvements, and surrounding properties.

3.1 Location and Legal Description

The Site consists of three parcels of property within Section 26 of Township 22 South, and Range 29 East in Orlando, Orange County, Florida.

The Orange County Property Appraiser's Office information identifies the Site under the following parcel identification numbers, address, names, and legal descriptions:

- 26-22-29-0000-00-007; listed as 649 Bentley Street (Downtown Recreation Complex) THAT PART OF: COMM 1223.94 FT WEST OF EAST LINE OF SW 1/4 OF NE 1/4 AND 200 FT NORTH OF SOUTH LINE THEREOF, RUN TH NORTH 232.8 FT, TH EAST 561.34 FT, TH NORTH 200 FT, THE EAST 262.5 FT, TH NORTH 170 FT, TH WEST 7 FT, TH NORTH 252 FT, THE WEST PARALLEL WITH QUARTER SEC LINE A DIST OF M/L 2235 FT TO FORTY LINE, TH SOUTH 852 FT, THE EAST 1418 FT TO POB PER DB 356/467 LYING SOUTH OF SOUTH R/W OF ALEXANDER PL AND LYING N OF LIVINGSTON ST (LESS PTS PLATTED PER PB 23/6 & PB 33/17) & IN CHAMBERLAINS SUB PB D/119 LOTS 3, 4 BLK D LOTS 2 THROUGH 5 BLK F & ALL OF VAC RD ON E OF BLK F PER 3862/1092 & ALL OF ALAXANDER PL VAC PER OR 3862/1100 LYING WEST OF PB 23/6 & (LESS R/W ON W) & (LESS RR R/W PER DB139/135 & LESS PT SOLD PER 3801/1184)
- 26-22-29-0758-00-010, listed as 401 West Livingston Street (previous overflow parking for the Bob Carr Performing Arts Center); BOB CARR PERFORMING ARTS CENTER 33/17 LOT 1 (LESS PART N/K/A PARRAMORE STREET LYMMO – A REPLAT PER PB79/110)
- 26-22-29-6326-00-010; 630 West Amelia Street (previous overflow parking area for the Orlando Arena); ORLANDO ARENA PLAT NO ONE 23/6 LOT 1 (LESS PART N/K/A PARRAMORE STREET LYMMO - A REPLAT PER PB79/110)

A copy of the Orange County Property Appraiser's information is included as **Appendix A**.

3.2 Site and Vicinity General Characteristics

The Site consists of three adjoining separate parcels totaling approximately 26.81 acres. The Site is bounded by West Amelia Street to the north, North Parramore Avenue to the west, West Livingston/Bentley Street to the south, and vacant property (former Amway Center Parking lots) to the east.

3.3 Current Use of the Property

The majority of the Site is developed as the 1) A main building with annex and several outbuildings that collectively comprise the multipurpose Downtown Recreation Complex;

2) one building with a detached maintenance building and 16 tennis courts that collectively comprise the Orlando Tennis Centre; and 3) a second parcel of vacant land that previously served as an overflow parking area for the former Amway Arena.

3.4 Descriptions of Structures, Roads, and Other Improvements on the Site

3.4.1 General Description of Structures

Structures at the Site include:

Downtown Recreation Complex – one main building with attached annexes and several outbuildings.

Tennis Centre – one building with offices and locker room facilities, and one outbuilding used as storage for maintenance equipment.

3.4.2 Roads

Primary access to the site is by West Livingston/Bentley Street and the adjacent parking area to the east. To the north, the site was formerly accessible via an entry drive on West Amelia Street for the former Amway Arena; this access is currently gated and locked.

3.4.3 Potable Water Supply

Potable water is provided by the Orlando Utilities Commission.

3.4.4 Sewage Disposal System

Sewage disposal is provided by the Orlando Utilities Commission.

3.5 Current Uses of the Adjoining Properties

The current use of the adjoining properties is commercial and residential along with vacant land associated with the former Amway Arena. The adjoining property to the north across West Amelia Street and to the east are parking areas associated with the former Amway Arena. The adjoining properties to the west of the Site include Sunshine Coin laundry, several vacant lots, a church, and a convenience store. The adjoining property to the south across West Livingston Street is the Nap Ford Community Charter School.

4.0 USER-PROVIDED INFORMATION

User questionnaires were submitted to the City of Orlando but not received at the time this report was submitted.

4.1 Title Records

A review of title records was not included in the scope of work for this Phase I ESA.

4.2 Environmental Liens or Activity and Use Limitations

The Client did not provide ECT with copies of the deed or chain-of-title. Therefore, ECT has no knowledge of environmental liens or use limitations associated with the Site.

4.3 Specialized Knowledge

No specialized knowledge was provided to ECT for this Phase I ESA.

4.4 Commonly Known or Reasonably Ascertainable Information

The majority of the Site is developed. Reasonably ascertainable information included reports obtained from the Orange County Property's Appraisers website.

4.5 Valuation Reduction for Environmental Issues

No information regarding valuation reduction was provided.

4.6 Owner, Property Manager, and Occupant Information

The City of Orlando owns the parcels that comprise the Site. The Downtown Recreation Complex is utilized by the public for various recreational activities.

4.7 Reason for Performing Phase I

The reason for performing the Phase I ESA is to evaluate the presence/absence of RECs in anticipation of future sale or redevelopment activities and to provide an update regarding the current status of each parcel to the City of Orlando.

4.8 Other

A copy of a Phase I ESA conducted by Cardno dated October 2012 for the North Terry Avenue and West Livingston Street Alignments was provided to ECT by the City of Orlando. In addition, a previous Phase II ESA conducted by Professional Services Industries, Inc. (PSI) dated November 23, 2006 was provided to ECT by the City to be relied on for this Phase I ESA

5.0 RECORDS REVIEW

The following section presents the results of ECT's historical records review, including aerial photographs, topographic maps, Sanborn maps, and city directories pertaining to the Site, or Target Property (TP).

5.1 Standard Environmental Record Sources

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate. A copy of the EDR Summary Radius Map Report is provided in **Appendix B**.

The Site was not listed in any of the databases searched.

The environmental records were requested with a center-point of the study area located within the boundaries of the subject property. More detailed information regarding the individual databases searched is included in the Government Records Searched/Data

Currency Tracking section of the EDR report. This section of the report also includes information regarding when each database was last updated. The report listed over 50 sites of potential concern based on the above search criteria. However, only the sites which appeared to have the potential for environmental impacts to the subject site due to proximity, anticipated direction of groundwater flow, and/or potential for migrating contamination are discussed below.

- DEEDS Orlando and DEEDs Orlando Expanded

Location: Large area of downtown Orlando including the subject site

Concern: Brownfield Area

Summary: The first two listings in the database report identify the Downtown Economic Enhancement District (DEED) brownfield area originally designated in 2004 and expanded in 2007. Inclusion of the subject site or other properties within this area does not indicate that contamination is present, and is simply a legal designation to allow access to certain economic incentives related to the State and Federal Brownfields Programs. These area wide designations are not considered RECs.

- CERCLIS

Location: 600 Robinson Street

Concern: Manufactured gas plant

Summary: The former Orlando Gasification Plant is listed under a number of regulatory databases, including CERCLIS. The CERCLIS database contains hazardous sites that are either on the US EPA National Priorities List (NPL), proposed to be on the NPL, or are undergoing studies to determine if the site should be listed. Considerable studies have been conducted at the Orlando gasification facility, and current investigations focus on relatively deep documented groundwater impacts, extending to the Floridan aquifer. The documented impacts are considered a REC, as the benzene groundwater plume extends onto the southeastern portion of the Site.

- EDR US Hist Auto Stat

Location: The EDR historical auto station database identified five historical auto stations in the 400 and 500 blocks of North Parramore Avenue, primarily located at the northwest and northeast corners of the intersection of North Parramore Avenue and West Amelia Street.

Concern: This database identifies auto facilities that generally operated prior to the advent of current environmental regulations pertaining to fuels, oils, lubricant, solvents and related automotive fluids.

Summary: These facilities are proximal to the northwest corner of the Site, and if discharges occurred, the resultant groundwater impacts would be considered RECs if the impacts extended to the Site. However, a previous Phase II ESA conducted by Professional Services Industries, Inc. (PSI) dated November 23, 2006 was provided to ECT by the City to be relied on for this Phase I ESA. PSI investigated this area and no evidence of impacts attributable to these facilities was reported. Therefore, these facilities are not considered potential concerns for the Site.

- EDR US Hist Cleaners

Location: 441 and 443 North Parramore Avenue, 700 West Livingston

Concern: The EDR database EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Summary: The facility at 700 West Livingston currently operates as a coin laundry facility and would not be considered a potential concern. The database was indeterminate as to whether these facilities at 441 and 443 North Parramore were dry cleaners or coin operated laundry services. These facilities were located on the western portion of the Site. However, the previously referenced Phase II ESA conducted by PSI investigated this area and no evidence of impacts attributable to these facilities was reported. Therefore, these facilities are not considered potential concerns for the Site.

5.2 Additional Environmental Record Sources

The following additional or proprietary record sources were also searched and reviewed.

5.2.1 Historical Topographic Maps

EDR's Historical Topographic Map Report is designed to assist in evaluating potential liability on a TP resulting from past activities. EDR's Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s. Historical topographic maps were produced and reviewed from 1956 through 1995. Results of the topographic map review are discussed in Section 5.3.

5.2.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were produced beginning in the late 1800's to provide information relative to fire hazards on insurable property. These maps often indicate locations of underground and aboveground gasoline tanks, storage facilities for flammable chemicals, such as dry cleaners, paint shops, maintenance and garage facilities, as well as historical information on occupants of buildings, unavailable through other sources. Production of these maps typically was limited to the immediate vicinity of downtown urban areas. EDR purchased the Sanborn Company and has access to all available Sanborn maps. EDR performed a search of its archive and indicated that Sanborn maps were produced for the vicinity of the Site in various years from 1913 to 1973. Findings of the map reviews are discussed in Section 5.4.

5.2.3 Historical City Directory Review

R.L. Polk directories and/or Hill-Donnelly Cross Reference directories are referenced for study areas which help identify changes in land use based on the type of businesses that occupied the subject site and surrounding area. The type of business, such as automotive, dry cleaning, gasoline/service stations, etc. are indicative of the possible presence of hazardous substances or petroleum products. Addresses within the general vicinity of the TP first appeared in available historical directories in 1933. Results of the directory search are discussed in Sections 5.4.

5.3 Physical Setting Source(s)

Physical sources that provide such information such as geological, hydrologic, or topographic characteristics were reviewed for potential migration pathways onto the Site. The Site has an approximate elevation of 108 feet National Geodetic Vertical Datum (NGVD) and the surrounding properties are typically at the same elevation or slightly lower to the south and slightly higher to the north than the subject Site.

5.4 Historical Use Information on the Property

To evaluate historical use of the Site, ECT reviewed readily available aerial photographs, city directories, and fire insurance maps.

5.4.1 Topographic Maps

Historical USGS topographic maps of the Site and surrounding area were obtained and reviewed from EDR for years 1956, 1970, 1980 and 1995. As shown on **Figure 2**, the USGS Topographic Map, 1998, Orlando West Quad 3712, the surrounding area is generally flat, at a National Geodetic Vertical Datum (NGVD) of 108 ft. Topographic elevations have been relatively consistent with the historic topographic maps. A brief review of the topographic maps for the TP is provided below:

1956 – 1995 – No significant changes to the TP were identified in the Topographic Maps reviewed.

5.4.2 Aerial Photographs

Aerial photographs were obtained and reviewed from EDR for years 1947, 1952, 1964, 1969, 1974, 1978, 1984, 1994, 1997, 1999, 2005, 2006, 2007, and 2010. The EDR Aerial

Photograph Decade Package is provided in **Appendix C**. The most current 2012 aerial map, **Figure 3**, was also reviewed for activities on the TP. A brief synopsis of activities derived from the aerial photographs for the TP is provided below:

1947 - The TP appears to contain a large commercial building complex in the southwest portion of the Site. From other data sources these structures are the former Armory building complex. To the east of the Armory are a series of building and athletic fields. Tennis courts are located in the east-central portion of the Site, and residences are located in the northern portion of the Site. Commercial buildings are located in the west-central portion of the Site. From other information sources, this building complex was the former US Department of Agriculture Bureau of Entomology complex, including offices and laboratories.

1952 – The development of the majority of the Site appears unchanged. Several outbuildings have been constructed on the north side of the Armory, and the buildings between the Armory and the ball fields to the east are no longer present.

1964 – The development of the majority of the Site appears unchanged. Apparent commercial buildings have replaced residential structures in the northwest portion of the Site.

1969 – The development of the majority of the Site appears unchanged. Additional tennis courts have been constructed in the east-central portion of the Site.

1974 – The commercial building complex in the west-central portion of the Site is no longer present, and additional tennis courts have been constructed in the southern portion of the area formerly occupied by these buildings. The northern portion of the former commercial building complex is undeveloped.

1978 – The development of the majority of the Site appears unchanged.

1980 – The development of the majority of the Site appears unchanged.

1984 – The southeastern undeveloped portion of the site and the adjoining parcel to the east have been paved and are parking facilities.

1994 – Considerable redevelopment has taken place Site-wide, and the overall site configuration is for the most part consistent with the current layout. The tennis facility has expanded to its current configuration of 16 courts, and occupies the central portion of the Site. The northern portion of the site has been razed and is a parking area. To the east, the TD Waterhouse facility has been constructed.

1997, 1999, 2005, 2006, 2007 and 2010 -- The development of the majority of the Site appears unchanged.

5.4.3 Directories

A review of the city directories provided by EDR was conducted as a part of this Phase I ESA. The directory information indicated past businesses and activities on the Site that would be considered suspect and warranted additional records review. A copy of the EDR-City Directory Abstract is provided in **Appendix C**. A summary of selected information from the city directories report follows.

415 North Parramore – US Department of Agriculture, activities included Bureau of Entomology facilities and laboratories, Plant Quarantine, Soil Fertility, Division of Foreign Parasite Introduction, and others (1933-1953); Police Academy (1957-1972)

417 North Parramore – Civil Defense (1957-1967); vacant (1972).

419 North Parramore – USDA (1953); Orlando rec. (1957-1962); Civil Defense (1967).

435 North Parramore – Wholesale Refrigeration Supply (1957); R&R air conditioning (1962-1986).

439 North Parramore – Convenience store (1962-1976).

441 North Parramore – Cleaners (1962-1976).

443 North Parramore – Coin-operated laundry (1962-1981).

649 West Livingston – Orlando Recreation Complex (1976-2000)

655 West Livingston – National Guard Armory (1939-1972).

5.4.4 Fire Insurance Maps

Fire Insurance Maps (Sanborn Maps) were obtained and reviewed from EDR for years 1913, 1919, 1925, 1950, 1956, 1965, and 1973. The Sanborn Maps are provided in **Appendix C**. A brief synopsis of activities derived from the Sanborn Maps for the Site is provided below:

1913 – The Site, for the most part, is outside the map coverage area.

1919 – Coverage is provided for portions of the southwest and northeast sectors of the Site. The southernmost portion of the coverage area is shown as Orange County Fair Grounds with a half-mile horse track and stables. To the north of the fairgrounds (275 ft north per a notation on the figure), the USDA Essential Oils Branch complex including a laboratory, greenhouse and several outbuildings. A USDA Bureau of Entomology Laboratory is located at the southeast corner of Amelia and Putnam in the northeast portion of the Site.

1925 – The USDA Essential Oils facility is now identified as the USDA Bureau of Entomology facility. The former location of the USDA Entomology facility (Amelia at Putnam) is unlabeled. The majority of the Site's southern and eastern sections are identified as the City of Orlando Exposition Park with a half-mile horse track and stables. Residential structures are located along Amelia in the northernmost portion of the Site.

1950 – West Livingston Avenue has been constructed and forms the southern boundary of the Site. In the southwestern portion of the Site, the Armory (also labeled Naval Reserve Training Centre). The complex consists of a main building housing the armory, a machine shop, a fuel oil tank north of the armory building's NE corner, and several outbuildings (one of which is labeled fireproof concrete). A grand stand associated with a ball field is to the east of the armory. To the north of the armory, the USDA Bureau of Entomology facility shows a main building with attached laboratory, detached shop and laboratory, along with a number of new structures. The Orlando Tennis Club facility is located to the east of the USDA complex.

1956 – The southern portion of the Site is unchanged. The USDA facility is now the Orlando Police Training School. A building labeled Orlando Boys Club is located east of the Tennis Club. A building labeled Whol. Refrigeration Sales is located north of the Police facility.

1965 – The development of the majority of the Site appears unchanged.

1973 – For the most part, the Site appears unchanged. In the west-central portion of the Site, all but one of the buildings associated with the Police Training facility are no longer present.

5.5 Historical Use Information on Adjoining Properties

To evaluate historical use of the adjoining properties, ECT reviewed readily available topographic maps, aerial photographs, Orange County Property Appraiser's information, and fire insurance maps.

5.5.1 Topographic Maps

Historical USGS topographic maps of the Site and surrounding area were obtained and reviewed from EDR for years 1956, 1970, 1995, and 1995. A brief review of the topographic maps for the Site is provided below:

1956 – 1995 – No significant changes to the adjoining properties were identified in the Topographic Maps.

5.5.2 Aerial Photographs

Aerial photographs were obtained and reviewed from EDR for years 1947, 1952, 1964, 1969, 1974, 1978, 1984, 1994, 1997, 1999, 2005, 2006, 2007, and 2010. A brief synopsis of activities derived from the aerial photographs for the adjoining properties is provided below.

1947 – Residential structures are located to the west and north of the facility. The area to the south appears to be primarily industrial, and two large aboveground storage tanks (ASTs) (possibly associated with the former coal gasification facility) are present. Recreational facilities are located to the east.

1952 – No major changes are evident from the previous aerial photograph.

1964 – Several commercial structures are located along the west side of North Parramore Avenue and at the intersection of West Amelia Street and Parramore Avenue. The two large ASTs are no longer evident.

1969 – No major changes are evident from the previous aerial photograph.

1974 – The property across West Livingston from the southwest portion of the Site has been cleared.

1978 – No major changes are evident from the previous aerial photograph.

1984 – The property across West Livingston from the southwest portion of the Site has been developed as a parking lot. Of the recreational/athletic fields to the east, only the single ball field with grandstand remains; the remainder of the property has been developed as parking lots.

1994 – Significant changes are evident. The TD Waterhouse facility has been constructed to the east of the northeast portion of the Site. The ball field discussed in the previous paragraph has been replaced with parking areas. The mixed development located north across West Amelia from the Site has been redeveloped as parking areas.

1997 – No major changes are evident from the previous aerial photograph.

1999 – No major changes are evident from the previous aerial photograph.

2005 – A commercial structure has been constructed across West Livingston from the southwest portion of the Site. No other major changes are evident from the previous aerial photograph.

2006 – No major changes are evident from the previous aerial photograph.

2007 – No major changes are evident from the previous aerial photograph.

2010 – No major changes are evident from the previous aerial photograph.

2012 – No major changes are evident from the previous aerial photograph.

5.5.3 Directories

A review of the city directories indicated several adjoining businesses or activities that would be considered suspect and warranted additional records review. A summary of selected information from the city directories report follows:

422/424 North Parramore – Auto repair, painting and body shop (1939-1962).

500 North Parramore – Service station (1933-1953).

501 North Parramore – Service station (1933-1962); tire repair/service station (1972-1976).

636 West Livingston – USDA facilities and laboratories (1948-1953).

700 West Livingston – Coin-operated laundry (1986-2000).

600 West Amelia – Orlando Arena, Centroplex, TD Waterhouse Center (1994-2010)

5.5.4 Fire Insurance Maps

Sanborn Maps were obtained and reviewed from EDR for years 1913, 1919, 1925, 1950, 1956, 1965 and 1973. A brief synopsis of activities derived from the Sanborn Maps for the adjoining properties is provided below:

1913 – The study area is outside the map coverage area.

1919 – The majority of the study area is outside the map coverage area. One area of residential dwellings is present across North Parramore Street from the southwest corner of the Site.

1925 – Considerable residential development has taken place along the west side of Parramore and the south side of West Amelia Avenue. One structure labeled ‘Store’ is present at 400 North Parramore.

1950 – Filling stations are present at the northwest and northeast corners of the intersection of West Amelia Avenue and North Parramore. Residential dwellings are located on the

north side of Amelia. The west side of North Parramore is developed, mostly with residential dwellings, plus the Store mentioned above. In addition, an auto repair and spray-painting facility is located at 422 Parramore at the intersection of North Parramore and Federal Street, directly across Parramore from the USDA Entomology facility on Site. To the south of the Site, a second USDA Bureau of Entomology facility is located across West Livingston Avenue, with laboratories, bunkhouses and a building identified as a rabbit exhibit. At the southeast corner of Parramore at West Livingston, a City Meat Inspection facility is present.

1956 – Area development for the most part is consistent with the 1950 map, except the majority of the structures for the USDA facility across Livingston from the southern portion of the Site have been removed. One small building remains, and is identified as chemical storage.

1965 – Area development for the most part is consistent with the 1956 map. The facility identified as City Meat Inspection is now identified as City Electric Dept.

1973 – Area development for the most part is consistent with the 1965 map. The facility identified as a filling station at the northeast corner of West Amelia and North Parramore appears to be no longer in service.

6.0 SITE RECONNAISSANCE

On October 16, 2013, representatives of AEC and ECT performed a reconnaissance of the Site to observe general conditions and to identify visible evidence of RECs. The Site consists of: 1) A main building with annex and several outbuildings that collectively comprise the multipurpose Downtown Recreation Complex, and one building with a detached maintenance building and 16 tennis courts that collectively comprise the Orlando Tennis Centre; 2) a second parcel of vacant land that previously served as an overflow parking area for the former Amway Arena; and 3) a third parcel of vacant land that previously as an overflow parking area for the Bob Carr Auditorium. Select photographs taken on the property during site inspection/reconnaissance are provided in **Appendix D**.

6.1 Methodology and Limiting Conditions

The methodology for the site reconnaissance included traversing the Site in a grid pattern while observing the ground surface of the property. A Site Reconnaissance Checklist documenting the Site and adjoining properties was completed and is provided in **Appendix D**.

6.2 General Site Setting

6.2.1 Current Use(s) of the Property

The current use of the Site is recreational and multipurpose neighborhood activities. The complex houses a ceramics/pottery studio with multiple kilns, occupying several rooms and outbuildings, and 16 tennis courts.

6.2.2 Past Use(s) of the Property

The Site appears to have been developed as early as 1919, according to the Sanborn Maps. Past uses of the Site have included: 1) Armory and Naval Training Center; 2) Orange County and Orlando Fair Grounds/Exposition Center; 3) a horse racing track and stables; 4) ball fields and various athletic fields; 5) residential (northern portion of the property); 6) USDA Bureau of Entomology (at 2 locations during different time periods) and USDA Essential Oils Branch; 7) Orlando Police Training facility; and 8) refrigeration sales.

6.2.3 Current Uses of Adjoining Properties

The Site is located in a developed area of Parramore. Vacant land and parking areas are located to the east. A charter school is located to the south. Mixed commercial, residential and vacant properties are to the west (including a coin operated laundry, Hope of Salvation Church and a convenience store). Parking areas are to the north.

6.2.4 Past Uses of Adjoining Properties

Past uses of the adjoining parcels have been both commercial and residential.

6.2.5 Current or Past Uses in the Surrounding Area

Current and past uses in the surrounding area are a mix of commercial, residential, recreational and education facilities.

6.2.6 Geologic, Hydrogeologic, and Hydrologic Conditions

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS) Soil Survey of Orange County, Florida (1989), the majority of the subject property is underlain by Millhopper fine sands. Below is a brief description of this soil type:

Millhopper fine sand: This soil type is nearly level to gently sloping and moderately well drained and is found on low ridges and knolls on the uplands and on the flatwoods. The slopes are nearly smooth to slightly convex. A seasonal high water table in Tavares soil is at a depth of 40 to 72 inches for more than 6 months, and it recedes to a depth of more than 80 inches during extended dry periods. A seasonal high water table in Millhopper soil is at a depth of 40 to 60 inches for 1 to 4 months, and it recedes to a depth of 60 to 72 inches for 2 to 4 months. During periods of high rainfall, the water table is at a depth of 30 to 40 inches for cumulative periods of 1 to 3 weeks. The permeability of Tavares soil is very rapid. The permeability of Millhopper soil is rapid in the surface and subsurface layers and moderately rapid of moderate in the subsoil. The available water capacity of Tavares soil is very low. The available water capacity of Millhopper soil is low in the surface and subsurface layers and medium in the subsoil. Natural fertility is very low in Tavares soil and low in Millhopper soil. Organic matter content is very low in Tavares soil and low or moderately low in Millhopper soil. In most areas, the soils in this map unit are used for citrus crops and/or for homesite development.

ECT personnel also reviewed the soil survey of Orange County, dated 1957 (issued 1960). According to the Soil Survey, Orange County is underlain by marine deposited beds of sand, silt, clay, limestone, dolomite, and shale to about 6,500 feet below land surface (bls).

The uppermost unit is Pleistocene to Recent in age and generally composed of unconsolidated, very fine to medium-grained quartz sand with some clays. The Pleistocene and Recent age sediments are underlain by the Hawthorn Group of Miocene age (about 25 million years old). In general, the Hawthorn Group is highly variable and diverse, including inter-bedded and inter-fingered sand, clayey sand, sandy-clayey phosphatic sediments, dolomite, and limestone. The Miocene age sediments are underlain by a thick sequence of late Eocene age limestone formations known as the Ocala Group. It is described as gray clay and gravel to white, soft limestone. The Ocala Group Limestone is underlain by the Avon Park Limestone, which is also of Eocene age. This formation is composed of similar materials, but distinguished from overlying units by the occurrence of sand-sized, cone-shaped foraminifera. The formation is usually tan in color, but can range from chalky white to light brown or ashen gray. The Lake City Limestone of middle Eocene age underlies the Avon Park Limestone. It is similar in lithology and water-bearing properties to the Avon Park Limestone and makes up the bottom portion of the Floridan aquifer.

According to the Soil Survey, ground water occurs in both artesian and non-artesian conditions in the Orange County. The non-artesian aquifer is composed mainly of sand and shell with varying amounts of clay and provides limited amounts of water. Water from this aquifer is used mainly for livestock and limited domestic use. Water quality in this aquifer varies depending on the chemical composition of the aquifer and the content of the calcium carbonate in the area. The secondary artesian aquifer and the Floridan Aquifer are the two types of artesian aquifers in Orange County. The secondary artesian aquifer generally yields less water than the Floridan Aquifer, but yields more than the non-artesian aquifers. The secondary artesian aquifers contain undifferentiated sediments and are more extensive in the Hawthorn Group. The quality of the secondary artesian aquifer varies with depth, location, and local geologic and hydrologic conditions.

The Floridan Aquifer underlies all of Florida. In Orange County, the Floridan Aquifer includes the Lake City Limestone, the Avon Park Limestone, the Ocala Group, and parts of the Hawthorn Group. The aquifer consists of alternating layers of limestone and dolomite or dolomitic limestone. This aquifer is one of the most productive in the world. Ground water recharge in Orange County of the Floridan Aquifer comes from annual rainfall. Water also enters the Floridan Aquifer by underground flow from outside the region. Discharge of ground water from the Floridan Aquifer occurs by spring outflow, seepage into the St. Johns River system, by outflows to other areas, and by localized pumping in the area.

6.3 Exterior Observations

The following items or conditions were looked for or identification was attempted, as indicated in the ASTM standard.

6.3.1 Hazardous Substances and Petroleum Products Containers in Connection with Identified Uses

Numerous containers were observed throughout the Site:

Oils lubricants and related products used for maintenance activities at the Tennis Centre (Appendix D, Photo 4); these chemicals are stored in the maintenance shed on the Tennis Centre property. No evidence of discharge was noted.

In several locations throughout the Recreation Center, various pottery-making supplies, raw materials, paints and glazes were observed (Appendix D, Photos 12 and 15 for example). No evidence of discharge was noted.

Two gasoline cans were observed along the north side of the recreation center property (Appendix D, Photo 11). Rec Center staff indicated the cans were inadvertently left at this location following routine site maintenance activities. No evidence of discharge was noted.

6.3.2 Storage Tanks

No aboveground storage tanks (ASTs) or underground storage tanks (USTs) were observed on the Site. What may have formerly been a tank cradle is located along the north side of the recreational center property (Appendix D, Photo 9). Sanborn maps indicated a north-south oriented fuel oil tank was present, but the potential tank cradle appeared to indicate one or more east-west oriented tank(s) would have been associated with this structure.

6.3.3 Odors

No strong, pungent, or noxious odors and their sources were detected during the Site reconnaissance.

6.3.4 Pools of Liquid

No standing surface water and pools or sumps containing liquids likely to contain hazardous substances or petroleum products were observed during the during the Site reconnaissance.

6.3.5 Drums

Five 55-gallon drums labeled as investigative-derived waste were observed in the parking area between the Tennis Centre and Amelia (Appendix D, Photo 5). Mr. Dashtaki of the City stated the drums were generated at a nearby site investigation, were temporarily stored at the Site with the City's permission, and would be removed and properly disposed. No evidence of discharge was noted.

6.3.6 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)

No hazardous substances or petroleum products containers not necessarily in connection with identified uses were observed during the Site reconnaissance.

6.3.7 Unidentified Substance Containers

No unidentified substance containers were observed during the Site reconnaissance.

6.3.8 PCBs

There were no transformers or other structures at the Site containing PCBs.

6.3.9 Pits, Ponds, or Lagoons

No pits, ponds, lagoons or other stormwater features were identified during the Site reconnaissance.

6.3.10 Stained Soil or Pavement

No stained soil was observed during the Site reconnaissance.

6.3.11 Stressed Vegetation

No stressed vegetation (from other than insufficient water) was identified during the site reconnaissance.

6.3.12 Solid Waste

No areas that were apparently filled or graded by non-natural causes (or filled of unknown origin) suggesting trash construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal were identified during the Site reconnaissance.

6.3.13 Wastewater

No wastewater or other liquids (including stormwater) or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site were observed discharging to drains or underground injection systems on site during the Site reconnaissance.

6.3.14 Wells

No private water well, pump or associated plumbing was observed during the site visit.

6.3.15 Septic Systems

No septic systems were observed during the Site reconnaissance.

6.3.16 Other

Several features observed along the north side of the Rec Center building merit discussion. Curbing and a concrete ramp are present along the north side of the Rec Center property, in generally the same location of the possible tank cradle discussed in Section 6.3.2 of this report. These features may have been associated with a loading dock, material storage, or possibly the potential tank cradle. Review of historical data sources for this area was inconclusive.

6.4 Interior Observations

The Downtown Recreation Complex includes a reception area, offices, public meeting rooms, fitness facilities, gymnasium, restrooms/locker rooms, a pottery studio with multiple workrooms, storage and warehouse space, indoor and outdoor kilns, multipurpose rooms for youth activities, and a computer/education room. At the Orlando Tennis Centre, the main building houses a reception area, offices, restrooms/locker rooms and utility closets, and the outbuilding is used for maintenance supplies and equipment storage.

6.4.1 Heating/Cooling

Multiple heating or cooling systems are present at the Downtown recreation complex and the Orlando Tennis Centre.

6.4.2 Stains or Corrosion

No stains or corrosion was identified during the Site reconnaissance.

6.4.3 Drains and Sumps

No drains or sumps were observed during the Site reconnaissance.

6.4.4 Hazardous Substances and Petroleum Products with Identified Uses

No hazardous substances or petroleum products were observed during the Site reconnaissance.

6.4.5 Storage Tanks

No ASTs, USTs, vent pipes, or fill pipes were identified during the Site reconnaissance.

6.4.6 Odors

No strong, pungent or noxious odors were during the Site reconnaissance.

6.4.7 Pools of Liquid

No strong, pungent or noxious odors were during the Site reconnaissance.

6.4.8 Drums

No drums were observed within the building during the Site reconnaissance.

6.4.9 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)

No hazardous substances or petroleum products containers were observed during the Site reconnaissance.

6.4.10 Unidentified Substance Containers

No open or damaged containers of unidentified substances suspected of being hazardous substances or petroleum products were observed during the Site reconnaissance.

6.4.11 PCBs

No open or damaged containers of unidentified substances suspected of being hazardous substances or petroleum products were observed during the Site reconnaissance.

7.0 INTERVIEWS

Interviews were conducted during the October 16, 2013 site visit as a part of this Phase I ESA.

7.1 Interviews with Site Contacts

During the October 16, 2013 site reconnaissance, Recreation Complex and Tennis Centre staff provided information regarding the history and current operations for both facilities. Information obtained during the discussions has been incorporated in this report.

7.2 Interviews with Local Government Officials

During the October 16, 2013 site reconnaissance, Mr. Dan Dashtaki with the City of Orlando provided information regarding the history of the Recreation Complex, and observations regarding previous environmental studies that had been conducted at the Site.

8.0 FINDINGS

This section identifies or suspect RECs and other findings discovered during the Phase I ESA investigations.

8.1 Known or Suspect RECs

This Phase I ESA has revealed evidence of the following RECs in connection with the Site:

- Former USDA field laboratory (northeast portion of Site) – because of the likely chemical use and unknown storage/disposal practices, this facility is considered a REC.
- Former USDA facility (west-central portion of Site) – Previous Phase II ESA investigation identified arsenic and benzo(a)pyrene in the soil, and dieldrin in the groundwater. This site is considered a REC.
- Former Armory facility – Previous Phase II ESA investigation identified arsenic and benzo(a)pyrene in the soil, and dieldrin in the groundwater. This site is considered a REC.
- The former Orlando Gasification Plant is considered a REC. Documented benzene impacts are present on the southeastern portion of the Site.

8.2 Historical RECs

This Phase I ESA has revealed no evidence of historical RECs in connection with the Site.

8.3 *De Minimis* Conditions

No de minimis conditions were observed.

8.4 Other Findings

There are no other findings than those discussed in Section 8.0.

9.0 OPINION

This section includes the environmental professional's opinion(s) of the impact on the property of conditions identified in the findings section. The following are considered RECs:

- Former USDA facility Former USDA field laboratory (northeast portion of Site)
- Former USDA facility (west-central portion of Site)
- Former Armory facility
- The former Orlando Gasification Plant is considered a REC. Documented benzene impacts are present on the southeastern portion of the Site.

10.0 CONCLUSIONS

ECT has conducted a Phase I ESA for the Site with the physical address of 649 Bentley Street, Orlando, Florida 32801. The Site consists of: 1) A main building with annex and several outbuildings that collectively comprise the multipurpose Downtown Recreation Complex, and one building with a detached maintenance building and 16 tennis courts that collectively comprise the Orlando Tennis Centre; 2) a second parcel of vacant land that previously served as an overflow parking area for the former Amway Arena; and 3) a third parcel of vacant land that previously as an overflow parking area for the Bob Carr Auditorium. This Phase I ESA was conducted in conformance with the scope and limitations of ASTM Practice E1527-05 for Phase I ESAs. Deviations or data gaps from this Practice are described in Section 11 of this report.

The Phase I ESA investigation has revealed evidence of four RECs associated with the Site.

11.0 DEVIATIONS/DATA GAPS

The following deviation from ASTM practice was identified:

- ECT was not provided with chain of title for the subject parcels. The absence of a chain of title is considered a data failure. For the purposes and intent of this report, this data failure is not considered significant.

12.0 ADDITIONAL SERVICES

No additional services outside of the scope of work (i.e., asbestos, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and biological agents) were provided for this investigation.

14.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The environmental assessment described herein was conducted by the undersigned employees of AEC and ECT. ECT's investigation consisted solely of the activities described in the Introduction of this report, and in accordance with the Terms and Conditions of Services Authorization #II.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312. I, have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312. The qualifications of the environmental professionals listed below are provided in **Appendix E**.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: A review of the CERCLIS list, as provided by EDR, and dated 02/04/2013 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Most Recent Revision: 1995

East Map: 28081-E3 ORLANDO EAST, FL
Most Recent Revision: 1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ORANGE, FL	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	12095C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> ORLANDO WEST	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
K56	1/2 - 1 Mile NE	NW
K61	1/2 - 1 Mile NE	NW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Millhopper

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 145 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	64 inches	fine sand	Not reported	Not reported	Max: 14 Min: 0.42	Max: 6 Min: 4.5
2	64 inches	79 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 0.42	Max: 6 Min: 4.5

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

Sanborn Map Abbreviations

"Linking technology with tradition"®

Abbreviation	Meaning	Abbreviation	Meaning
A	Automobile (usually designates the location of a garage)	HPFS	High pressure fire service
A in B	Automobile located in basement	Hdw	Hardware
A S	Automatic sprinkler	Hack	Hackney or delivery service
Abv	Above	Hardw	Hardware
ACS	Automatic chemical sprinkler	Ho	Hotel or house (as used to designate a warehouse)
AFA	Automatic fire alarm	Htr	Heater
Agr	Agricultural	Hyd	Hydrant
Appts	Apparatus	ICRR	Illinois Central Railroad
Apts	Apartments	Imp	Implements
Asb Cl	Asbestos clad	Ins	Insurance
Att'd	Attended	Insts	Instruments
Aud'it'm	Auditorium	Ir Cl	Iron clad
Auto Ho	Automobile house, or garage	K of C	Knights of Columbus
B	Basement, boiler or occasionally brick	Lab	Laboratory
B&S	Boots and shoes	Lodg'g	Lodging
BPOE	Benevolent & Protective Order of Elks	Luth	Lutheran
B Sm	Blacksmith	Luth'n	Lutheran
B'ld'g	Building	ME	Methodist Episcopal
B'lr	Boiler	Mach'y	Machinery
B's't	Basement	Mak'r	Maker
Bak'y	Bakery	Man'f'y	Manufactory or factory
Balc	Balcony	Mdse	Merchandise
Bap	Baptist	Mfy	Manufactory or factory
Bbl	Barrel	Mill'y	Millinery
Bbbs	Barrels	Mkg	Making
BE	Brick enclosed elevator	Mo	Motor
Bill'ds	Billiards	NS	Not sprinklered
Bl Sm	Blacksmith	OU	Open under
Blk Sm	Blacksmith	Off	Office
Bst	Basement	PO	Post office
C B	Cement brick or concrete block construction	Paint'g	Painting
C Br	Concrete brick or cement block construction	Pat Med	Patent medicines
Cap'cy	Capacity	Plumb'g	Plumbing
Carptr	Carpenter	Print'g	Printing
CBET	Concrete enclosed elevator with traps	QH	Quadruple (fire) hydrant
Chem	Chemical	RC	Roman Catholic
Chinaw	Chinaware or porcelain	R'f	Roof
Chine	Chinese	R'm	Room
Cl	Clad	Rep	Repair
Clo	Clothing	Rep'g	Repairing
Co	Company	Repos'y	Repository
Comp	Composition construction (i.e. stucco) or compressor	Rest'r't	Restaurant
Conc	Concrete	Rf	Roof
Conf'y	Confectionary (candy store)	Rm	Room
Confec'y	Confectionary (candy store)	S	Store
Constr'n	Construction	SA	Spark arrester
Corp'n	Corporation	S Vac	Store portion of building is vacant
D	Dwelling	Sal	Saloon
DH	Double (fire) hydrant	Sky'ts	Skylights
DG	Dry goods	Sm	Smith, as in gunsmith or blacksmith
Drs	Doctor's office	Sm Ho	Smokehouse
Dwg	Dwelling	Sp'kl'rs	Sprinklers
E	Open elevator	St'ge	Storage
E Fl	Each Floor	St'y	Story
El	Electric	Sta	Station
Elec	Electrician	Stat'y	Stationery
Eng	Engine	TH	Triple (fire) hydrant
Ent	Entertainment	Tel	Telephone
Episc'l	Episcopal	Tenem'ts	Tenements
ESC	Elevator with self-closing traps	TESC	Tile enclosed elevator with self-closing traps
ET	Elevator with traps	Tinw	Tinware
Exch	Telephone exchange	Trimmi'g	Trimming
Expr	Express (as used to designate a delivery service)	U	Upright
F	Flat (as used to designate a delivery service)	Up	Upright
FA	Fire alarm	VP	Vertical pipe
FE	Fire escape	Vac	Vacant
F Pump	Fire pump	Ven'd	Veneered
Fill'g Sta	Filling station, or gas station	Ven'r'd	Veneered
Fl	Floor	W	Ware, as in warehouse or wareroom
Fr Attic	Frame constructed attic	WC	Water closet or toilet
Frat	Fraternity	WG	Wire glass skylights
Fur	Furnishings	W Ho	Warehouse
Furn'g	Furnishings	WPA	Works Progress Administration
Furne	Furniture	W'ks	Works
GAR	Grand Army of the Republic	Whol	Wholesale
GT	Gasoline tank	Wkg	Working
Gal	Gallery	Woodwkg	Woodworking
Gall	Gallery		
Gall'y	Gallery		
Gen'l	General (as used to designate a general store)		
Gents	Gentlemen's		
Greas'g	Greasing		
Gro	Grocery or groceries

CODING OF STRUCTURAL UNITS FOR FIREPROOF AND NON-COMBUSTIBLE BUILDINGS

FRAMING		FLOORS		ROOF	
CODE	STRUCTURAL UNIT	CODE	STRUCTURAL UNIT	CODE	STRUCTURAL UNIT
A.	Reinforced Concrete Frame.	1.	Reinforced Concrete.	a.	Reinforced Concrete.
B.	Reinforced Concrete Joists, Columns, Beams, Trusses, Arches, Masonry Piers.		Reinforced Concrete with Masonry Units.		Reinforced Concrete with Masonry Units.
C.	Protected Steel Frame.		Pre-cast Concrete or Gypsum Slabs or Planks.		Reinforced Gypsum Concrete, Pre-cast Concrete or Gypsum Slabs or Planks.
D.	Individually Protected Steel Joists, Columns, Beams, Trusses, Arches.	2.	Concrete on Metal Lath, Incombustible Form Boards, Paper-backed Wire Fabric, Steel Deck, and Cellular, Ribbed or Corrugated Steel Units.	b.	Concrete or Gypsum on Metal Lath, Incombustible Form Boards, Paper-backed Wire Fabric, Steel Deck, and Cellular, Ribbed or Corrugated Steel Units.
E.	Indirectly Protected Steel Frame.			c.	Incombustible Composition Boards with or without Insulation.
F.	Indirectly Protected Steel Joists, Columns, Beams, Trusses, Arches.				Masonry or Metal Tiles.
G.	Unprotected Steel Frame.			d.	Steel Deck, Corrugated Metal or Asbestos Protected Metal with or without Insulation.
H.	Unprotected Steel Joists, Columns, Beams, Trusses, Arches.				
O.	Masonry Bearing Walls.				

R	RESIDENTIAL	M	MANUFACTURING
RT	RESIDENTIAL-TRANSIENT	P	PUBLIC OR INSTITUTIONAL
C	COMMERCIAL	U	UTILITY
W	WAREHOUSE	T	TRANSPORTATION

NUMERICAL PREFIX INDICATES THE NUMBER OF ESTABLISHMENTS IN EACH CATEGORY

The coding for framing, floor and roof structural units as shown above is used in describing the construction of fire-resistive buildings. In addition, reports for fire-resistive buildings will show the date built and wall construction when other than brick.

FP buildings have masonry floors and roof; concrete and/or directly or indirectly protected steel framing; and clay brick, stone or poured concrete walls.

FPX buildings are FP buildings with interior walls such as concrete block, cement brick, metal or glass panels, etc.

NC buildings have unprotected steel framing and fire-resistive but non-masonry floors and roof.

APPENDIX E

Kelly Eger-Smith, REM

President/Owner

Years of Experience: 22

REGISTRATIONS & CERTIFICATIONS

- Registered Environmental Manager (REM), National Registry of Environmental Professionals (NREP) 2002
- OSHA 40-Hour HAZWOPER 1998
- OSHA 8-hour HAZWOPER Annual Refresher 2013
- Human Resource Generalist Certification 2006

PROFESSIONAL EXPERIENCE

Ms. Eger began her career in environmental science in 1991 as a chemist where she performed a variety of environmental analyses including inorganic and organic chemistry, radiochemistry and microbiology. In 1995, Ms. Eger joined PBS&J (now Atkins) as the Technical Operations Manager and Health & Safety Officer for the firm's environmental testing laboratory in Orlando. In this role, she developed quality assurance & quality control manuals and standard operating procedures for specialized work conducted for the Department of the Army and the U.S. Fish & Wildlife Service. PBS&J closed their environmental laboratory in August 2000 though Ms. Eger remained through October 2000 to coordinate all chemical and hazardous waste packaging and disposal and finalization of the existing Federal contracts.

From October 2000 to March 2001, Ms. Eger served as the Interim Chemistry Coordinator for the Reedy Creek Improvement District (RCID) at Walt Disney World where she was responsible for overall quality assurance and staff production for the group.

From March 2001 through August 2012, Ms. Eger was the managing Principal of the Central Florida office of Miller Legg, a multidiscipline engineering firm based in South Florida. Ms. Eger lead the firm's Environmental Engineering group statewide, oversaw Miller Legg's Occupational Health and Safety Program, and she was the Vice President of Human Resources.

In August 2012, Ms. Eger co-founded American Environmental Consulting, Inc. (AEC), a **100% woman-owned small business enterprise**. Ms. Eger serves as the President of AEC. In her role, Ms. Eger is responsible for all technical services performed by the firm, quality assurance/quality control, client service, and daily operational management.

AREAS OF SPECIALIZATION

- Phase I/II Environmental Site Assessments (ESAs)
- Brownfields/Redevelopment
- Contamination/Site Assessments
- Storage Tanks
- Remediation
- Environmental Monitoring
- Hazardous Materials
- Risk Assessment and Feasibility Studies
- Facility Compliance Permitting
- Regulatory Compliance Audits
- Health and Safety
- Training Development & Delivery
- Quality Assurance/Quality Control
- Laboratory Services & Data Validation
- Community Outreach & Public Involvement
- Human Resources
- Risk Management

RELEVANT PROJECT EXPERIENCE

- Project Manager for hundreds of Phase I/II ESAs for public and private clients at sites including commercial, industrial, airports, rail yards, marinas, golf courses, roadway corridors, and residential and agricultural land. Public sector clients have included: City of Fort Lauderdale, City of Orange City, City of Coral Springs, City of Miramar, Florida Department of Environmental Protection (FDEP), City of Miramar, Palm Beach County, School Board of Broward County, St. Lucie County, Town of Jupiter, Town of Wellington and Treasure Coast Research Park. Private sector clients have included: Akerman Senterfitt, Bilzen Sumberg, Holland & Knight, Baker Hostetler, Gunster, Taylor Morrison, KB Homes, Park Square Homes, Centerline Homes, and Maronda Homes.
- Project Manager for a contamination assessment associated with dewatering system design and operation at the Fort Lauderdale International Airport.
- Project Manager for numerous petroleum underground storage tank source removal and assessment projects at a variety of sites. Services also included permitting, construction and reporting.
- Senior Environmental Scientist for projects involving contamination assessment and determination of potential impacts to roadway projects along FDOT and local corridors throughout Florida.
- Project Manager for an unlicensed landfill and disposal site in Opa Locka, Florida where soil and groundwater contamination and discarded asbestos containing material (ACM) were identified.
- Project Manager and Senior Environmental Scientist for contamination assessments of petroleum and hazardous waste impacts at numerous agricultural sites including crop farms, cattle ranches, and citrus groves throughout Florida.
- Project Manager for assessment and remediation projects in the Florida Department of Environmental Protection's petroleum cleanup reimbursement program (pre-approval program).
- Project Manager for a solid waste landfill Groundwater Monitoring Plan and Site Closure Assessment in Orange City, Volusia County, Florida.
- Project Manager for an air sparge and soil vapor extraction (SVE) system project to remediate dissolved petroleum contaminants from the shallow groundwater at a marina in the Florida Keys.
- Project Manager for an air sparge and SVE system project to remediate chlorinated solvents from the soil and groundwater at a former drycleaning facility in Winter Park, Florida.
- Project Manager for numerous projects involving successful regulatory negotiation for natural attenuation monitoring of chlorinated solvents at commercial and industrial sites.
- Environmental Scientist for projects involving evaluation and remediation of arsenic impacts associated with Chromated Copper Arsenate (CCA) lumber at over 100 children's playgrounds in 7 Florida counties.
- Project Manager for Spill Prevention Control and Countermeasure (SPCC) Plan preparation for a national automobile fueling and car wash chain.
- Compliance Auditor for projects at golf courses, dry cleaners and automotive repair facilities.

- Project Manager and Technical Consultant for Comprehensive Analytical Laboratory Services with the United States Department of the Army at the Rocky Mountain Arsenal. Project required extensive development of Quality Assurance Project Plans (QAPPS) and Laboratory Quality Control Plans (LQCPs).
- Developer/Instructor of a health and safety training program for maintenance personnel and principals at parochial schools in Central Florida.
- Developer/Instructor of an environmental compliance training program for vehicle maintenance personnel for the School Board of Broward County.
- Health & Safety Officer for projects involving infectious biological material processing. Required coordination with the United States Fish & Wildlife Service (USFWS) and Center for Disease Control (CDC), development and implementation of health and safety program, and personnel training.

PROFESSIONAL & CIVIC ACTIVITIES

Board of Directors, American Society of Highway Engineers (ASHE) Central Florida Chapter 2013

Member & Program Committee, Central Florida Home Builders Association (HBA) 2013

Executive Board, myregion.org 2006-2012

Executive Board Representative, Southwest Regional Board of Advisors (serving Polk, Lake & Osceola Counties) 2010-2012

Member, Central Florida Association of Environmental Professionals (CFAEP)

Commercial Real Estate Women (CREW) Orlando Chapter, Board of Directors 2011, 2012

Past Vice Chair, Metropolitan Environmental Training Alliance (METRA)

Graduate, Leadership Orlando, Class 67

EDUCATION

Bachelor of Science, Biology, George Mason University, 1991

Post Baccalaureate Studies, Environmental Engineering, University of Central Florida, 2004

PRESENTATIONS AND SPEAKING ENGAGEMENTS

Florida Chamber Environmental Permitting Summer School (Emerging Issues in Due Diligence) 2008, 2009, 2010, 2011, 2012, 2013

Florida Chamber Growth Management Conference (Emerging Issues in Due Diligence) 2010, 2011

Florida Bar Environmental and Land Use Law Annual Update (Trends in Due Diligence) 2010

Education

B.S., Earth Sciences (Geology)—
Pennsylvania State University, 1976

Areas of Specialization

Project Management, Hazardous Waste
Site Investigations (RCRA/CERCLA),
Contamination Assessments, Site
Remediation, Hydrogeology, Brownfields,
Remedial Investigations, Risk
Assessments, Feasibility Studies,
Groundwater Supply Development,
Environmental Audits, Water Quality,
Asbestos Consulting

Project Scientist; Phase I Environmental Site Assessment (ESA); Project Manager, Remedial Activities and Facility Decommissioning, Confidential Client—Conducted comprehensive site remediation activities including hazardous waste, nonhazardous, mixed waste and radioactive waste removal and facility decommissioning at an abandoned chemical manufacturing facility in Polk County, Florida. The site had been previously decommissioned as part of the radioactive materials licensing termination process through the state regulatory agency. Subsequently the site was operated as a hazardous waste treatment facility, but was shut down. Initial activities included radiological screening and decontamination, waste and remnant materials inventory and removal including asbestos, compressed gas cylinders, drums and containers, liquid waste in secondary containment, and over 120 above-ground storage tanks (ASTs) ranging in size from 50 gallons to 250,000 gallons. Facility decommissioning included the complete demolition and decontamination of tanks, structures, secondary containment, a full analytical laboratory, pilot test area, ponds, drainageways, and miles of process piping. Radiological decontamination efforts including waste chemical stabilization and solidification, material segregation and disposal was conducted during all phases of the work through demolition. All work was conducted on a fast-track basis, with a project schedule for the above activities including demolition of 12 months.

Project Scientist; Comprehensive Waste Characterization and Removal Activities and Facility Decommissioning at an Abandoned Chemical Plant, Confidential Client—Responsible for development of sampling protocols, safety planning, and analytical characterization methodology for sampling for approximately 50 ASTs containing raw materials and unknown residuals at a site in Polk County, Florida. Contents were inventoried, characterized, and a phased removal was developed and implemented. In addition, work at this site has included petroleum remediation efforts Beginning with soil assessment efforts, bid specifications were prepared, bids solicited, and a contractor selected to perform source removal activities. Following completion of the remediation activities, post-active remediation monitoring was initiated. Other efforts in the diverse array of work have included lagoon closure; permit modifications, renewals and termination; site-wide contamination assessment; asbestos survey and abatement; and facility decommissioning.

Project Manager; EPA Brownfields Assessment Grant Contracts, Cities of Eustis, Cocoa, and New Smyrna Beach, Florida—Responsible for managing overall contracts and task assignments for assessment grants. These grants provide funding for community outreach, quality assurance project plans, Phase I/II ESAs, and cleanup/redevelopment planning. Multiple Phase I ESAs have been conducted at a variety of commercial and public properties.

Assistant Project Manager; Technical Expert Consulting/Witness Services for Contamination Assessment, Confidential Client—Provided expert consulting services including expert testimony in deposition and trial related to extensive chlorinated solvent (trichloroethylene, 1,1,1-trichloroethane, methylene chloride and breakdown products) and metals contamination resulting from electroplating and printed circuit board manufacturing operations in Tampa, Florida. The evaluation included a comprehensive review and reconstruction of historical plant operations, monitoring well construction, geologic/hydrologic features (such as confining unit configuration and sinkholes), locating potential interior and exterior contaminant source areas, and investigating past discharges into an adjacent lake. The technical data evaluation included preparation of a database for well construction and analytical data containing over 250,000 data fields. The data evaluation assessed the adequacy of previous assessment/remediation efforts conducted by numerous consultants over a 15-year period, and to

prepare reasonable and defensible estimates of remediation liability for the cleanup of groundwater, surface water/sediments, and soil to pre-development conditions as required in the facility lease.

Project Manager; Baseline Environmental Site Assessment, Johnson Bros. Laydown Yard, SLRC Property—Conducted soil and groundwater characterization to determine baseline environmental conditions at a contractor's laydown yard in Orange County, Florida. Major work tasks included preliminary groundwater flow direction determination using temporary piezometers, site selection for permanent monitoring wells, well installation and groundwater sampling, and soil sampling. All sampling locations were field located relative to fixed landmarks such that follow-up sampling can be conducted at the same locations at the conclusion of the contractor's multi-year construction efforts.

Project Manager; Project Closeout Environmental Site Assessment, Johnson Bros. Laydown Yard, SLRC Property—At the conclusion of the contractor's multi-year construction efforts, soil and groundwater conditions were evaluated to determine if soil or groundwater quality were impacted during use of the property. Sampling locations from the baseline assessment conducted four years prior (refer to preceding project description) were re-created, allowing for an accurate assessment of pre- and post-use conditions.

Project Manager, Hydrogeological and Environmental Services Agreement, County of Volusia—Serve as project manager for assignments under the fourth consecutive multi-year services countywide contract. Work assignments have included baseline environmental assessment and sump/soil removal at an inactive airport rental car facility, assessment and clean closure of a former petroleum storage tank site at a county public works facility, assessment and remedial action implementation at an airport facility impacted by chlorinated solvents, site assessment and clean closure for a waste oil tank, removal and closure for an abandoned storage tank found in a County right of way, and various petroleum contamination assessments at county facilities.

Project Manager, Environmental Assessment for Planned Transit System Bus Maintenance Facility, County of Volusia—Conduct environmental characterization of a proposed bus storage and maintenance facility in western Volusia County. Project includes assessing environmental factors and land use at the facility to Federal Transit Administration Region 4 guidelines.

Project Manager; Petroleum Site Remediation of Multiple Sites, The Pantry, Inc.—Responsible for managing multiple petroleum remediation projects throughout Central Florida. Primary constituents of concern included the fuel compounds benzene, toluene, ethylbenzene, xylenes, methyl tert-butyl ether, naphthalene, 1-methylnaphthalene and 2-methylnaphthalene. To date, all active sites were granted No Further Action (NFA)/Site Rehabilitation Completion Orders (SRCOs); the remaining sites are on hold due to low FDEP priority scores. SRCOs were achieved at facility #129 in Orlando (site assessment [SA]), #220 in Lake Wales (SA), #277 in Palm Bay (source removal and air sparging/soil vapor extraction [AS/SVE] followed by post-active remedial monitoring [PARM]), #1244 in Altamonte Springs (SA and natural attenuation monitoring [NAM]), #6086 in Titusville (bioaugmentation to remove low but persistent concentrations of naphthalene compounds, followed by PARM), #6264 in Lady Lake (SA and NAM), and #6294 in Ocoee (AS/SVE and PARM). At the active remediation facilities, system decommissioning was conducted as a condition of the SRCO.

Project Manager; Assessment and Remediation of Multiple Petroleum Sites, County of Volusia Vehicle Maintenance Facilities—Serve as project manager for various vehicle maintenance and fleet fueling facilities operated by the County of Volusia. Typical projects include assessment activities to define a clay layer and its potential impact on a poorly defined groundwater plume; remediation system evaluation and modification at a fueling facility wherein the current system has been ineffective in bringing about site closure after 5 years of active remediation.

Project Director, Professional Services Contract, Brevard County, Florida—Responsible for management of overall contract and individual task orders for the County Natural Resources Management Office. Projects have included numerous groundwater quality investigations to support the County's efforts in improving stormwater management. Work efforts have consisted of monitoring well installation, groundwater sampling for conventional and ultratrace metals parameters, reporting and well abandonment.

Task Manager; Discharge Monitoring Report Preparation, Sampling Plan Preparation, Accumulated Rainwater Discharge Operations, UIOA Contractor Laydown Yard/Hotel Site D—Summarized contractor sampling information and laboratory reports, and timely submitted monitoring reports to the Florida Department of Environmental Protection (FDEP) describing accumulated rainwater discharge operations for facility in Orange County, Florida. Also prepared a follow-on work plan for submittal to the FDEP Waste Cleanup group detailing confirmatory soil sampling in the former laydown yard.

Project Manager; Aquifer Storage and Recovery (ASR) Pilot and Regional Projects, Quality Assurance/Quality Control (QA/QC) and Data Validation, South Florida Water Management District (SFWMD)—Work

tasks include data validation of ASR pilot project, data validation of storm event data, data validation of regional ASR project, preparing quality system documents, conducting field audits, laboratory audits and QC studies.

Project Manager; QA/QC and Data Validation Support for Stormwater Treatment Areas Monitoring and Research Programs, SFWMD—Work includes review of sample collection documentation and sample tracking, data validation, investigation of data discrepancy or nonconformance, data scrub of historical data, data review and validation of in-situ data, preparation and distribution of laboratory performance evaluation samples, field and laboratory audits, quarterly assessment of field and laboratory performance, and preparation of quality systems documents.

Project Manager; Phase II ESA and Permitting Support, Proposed Industrial Development, Melbourne, Florida, Confidential Client—ECT was brought into the project when problems were encountered in meeting the technical and schedule requirements relating to the facility construction schedule. ECT mobilized in 24 hours and completed the field effort within three working days. To facilitate the regulatory review process, a report was issued to the client and regulatory agency within 24 hours of the completion of the field work, and subsequent permitting activities were completed on time and under budget.

Project Manager; RCRA/Hazardous Waste Enforcement Site, Apopka, Florida, Confidential Client—Conducted soil and groundwater facility assessment, preparing source removal plan, and completed negotiations with FDEP Hazardous Waste staff in addressing alleged RCRA violations at a metal fabrication facility. Following successful negotiations, RCRA enforcement action was terminated, and the site assessment and remediation took place following the contaminated site cleanup criteria. Source removal was completed and the site received a Site Rehabilitation Completion Order.

Project Manager; Petroleum Site Assessment and Remediation, Sunshine Food Mart (SFM)—Soil and groundwater assessments have been completed at several SFM facilities in Orange, Volusia, Brevard, and Osceola Counties, Florida. Remedial action includes construction of an air sparging/vapor extraction system at one facility, and a source removal is pending at a second.

Project Manager; Hazardous Waste Site Investigation, United Petroleum, Inc.—Provided project management, contractor oversight and technical advisory services relative to soil and groundwater conditions at a fuels facility in Tampa, Florida. Services at the site pertained to a soil stockpile resulting from a multiple underground storage tank (UST) excavation. State personnel considered the stockpile to be potentially hazardous because of lead TCLP concentrations and had implemented RCRA enforcement actions at the facility. Duties included the execution of several objectives: (1) provided a single point of contact for the regulatory agency personnel; (2) worked with the owner of the site, the finance company for the reimbursement services, along with their technical consultant to reactivate site work; (3) provided general management services to facilitate the remaining technical efforts; (4) formulated a testing program for the soil stockpile to collect a representative sample for lead analysis; and (5) worked with the above personnel and achieved a final disposal/treatment plan for the nonhazardous stockpile, resulting in cost savings to the client of over \$150,000.

Project Manager; Phase II ESA and Permitting Support, Confidential Client—ECT was brought into the project when problems were encountered in meeting the technical and schedule requirements relating to the facility construction schedule for a proposed industrial development in Melbourne, Florida. ECT mobilized in 24 hours and completed the field effort within three working days. To facilitate the regulatory review process, a report was issued to the client and regulatory agency within 24 hours of the completion of the field work, and subsequent permitting activities were completed on time and under budget.

Project Scientist; Phase I and Phase II ESAs Throughout Central and South Florida, The Nature Conservancy—Conducted large-scale Phase I/II ESAs for the Nature Conservancy at numerous, predominantly agricultural tracts of property prior to acquisition.

Project Manager; Technical Expert Consulting/Witness Services for Contamination Assessment at a Manufacturing Facility, Confidential Client—Responsibilities included providing expert consulting/witness services and contractor oversight for a contamination assessment at a large manufacturing facility in Southwest Florida. Chemicals of concern consisted of various solvents (DNAPLs) and metals. Activities conducted included review and analysis of a technical consultant's preliminary contamination assessment, and oversight services relative to project planning for further investigations at the site.

Project Manager; Interim Remedial Action, Contamination Assessment, Risk Assessment and Remediation at a Manufacturing Facility, Confidential Client—Conducted investigations at a clinical thermometer manufacturing facility in Lake County, Florida. Served as technical lead for consent order negotiations; successfully transferred project from RCRA enforcement to voluntary cleanup status. Conducted extensive interim remedial action to recover

waste thermometers and glass fragments buried throughout the property, separated the glass fragments from soil, and treated the glass onsite using a retort to recover mercury for reuse at the facility. Remedial action recovered over 65 drums of glass fragments for processing; over 200 pounds of mercury were recovered for reuse. Employed results of remedial action to negotiate a more favorable scope of work for the client's contamination assessment and risk assessment efforts following the remedial action.

Senior Scientist; Environmental Audit Services for Tampa International Airport Property Acquisition Program, Tampa International Airport, Hillsborough County Aviation Authority (HCAA)—Performed Phase I and Phase II environmental auditing services for numerous properties acquired by the HCAA for airport. Phase I site-specific audit projects consisted of (1) record reviews, (2) historical reviews including aerial photography analysis, (3) site reconnaissance, (4) interviews, and (5) review of adjacent properties. Phase II assessments included asbestos surveys, monitoring well installation and groundwater sampling, soil sampling and screening, and preparation of corrective action plans and cost estimates for remediation.

Field Operations Manager; Contamination Assessment and Risk Assessment at the Liberty Square Public Housing Development, Dade County Department of Housing and Urban Development—Conducted a contamination assessment consisting of soil borings, soil sampling and total lead analysis, collection of several hundred surficial soil samples collected throughout the development, and a preliminary human health risk assessment pursuant to potential lead exposure to the residents of the development.

Project Manager; Debris Removal Program and Coliform Source Identification Study in the Everglades Agricultural Area, Confidential Client—Conducted a fecal coliform bacteria source identification study in a 3,200-acre agricultural area drainage basin. Also conducting a debris/waste removal remedial action for various wastes illegally dumped into a canal within the farm's drainage network.

Senior Scientist; Phase II Environmental Assessment at a CSX Shop and Yard Site, The Home Depot, Inc.—Major tasks for the field investigation portion of the project located in St. Petersburg, Florida, included the following: (1) quantifying the residual soil contamination remaining on the site subsequent to completion of a large-scale interim remedial action; (2) resolving the presence of an area of potential soil contamination identified by one consultant but unconfirmed by another consultant's work in the same area; (3) addressing the possibility of undetected contamination which could detrimentally affect the planned construction of a 100,000-square-foot building and garden center; (4) investigating the potential for groundwater contamination by heavy metals and volatile organic compounds and the possible offsite migration; and (5) sampling soils onsite to determine the possibility of soil contamination by PCBs.

Project Manager; Contamination Assessment and Interim Remedial Action at the A.D. Weiss Lithograph Company, Eagle-Picher Industries, Inc. and St. Ives, Inc.—Responsibilities included conducting a detailed contamination assessment at a major printing facility in Florida, entailing soil gas surveys, soil borings, monitoring well installation, and groundwater sampling. The project also included an asbestos survey and associated abatement; a risk assessment to identify hazards, assess exposure and toxicity, develop site rehabilitation levels, and to focus the required corrective action process; and a feasibility study to develop, screen, and evaluate remedial alternatives. Interim remedial action consisted of the excavation and disposal of 11 below-grade structures, sumps, and USTs, and associated contaminated soil and fluids.

Project Manager; Preliminary Contamination Assessment, Eagle-Picher Industries, Inc.—Responsibilities included preparing a preliminary contamination assessment plan, an asbestos survey, monitoring well installation, performing soil and groundwater sampling, evaluating data from laboratory analyses, and preparing a preliminary contamination assessment report for an automotive gasket manufacturing facility in Lake County, Florida.

Project Manager; Remedial Investigation/Feasibility Study (RI/FS), and Risk Assessment at the Cabot Carbon/Koppers Superfund Site, Koppers Company, Beazer Materials and Services, Inc. and Cabot Corporation—Conducted RI/FS for multiple clients, responsibilities included assessing contamination, public health and environmental risk, and remedial measures delineation at a technically and administratively complex CERCLA site consisting of an active wood preserving plant, and a former charcoal/pine oil manufacturing facility. Duties included liaison with technical and legal representatives for the two potentially responsible parties, EPA Region IV and FDEP.

Project Director; Contamination Assessment at the Defense National Stockpile Center, Defense Logistics Agency—Project included the collection of over 300 soil samples for total lead and antimony analysis and subsequent collection of soil samples for TCLP metals determination. Prepared estimates of contaminated soil volumes for hazardous and nonhazardous contaminant levels observed throughout the base metals ingot storage areas onsite, and provided recommendations for suitable disposal and treatment options for the nonhazardous and hazardous waste areas at the facility in Baton Rouge, Louisiana.
