## 1.0 SUMMARY

ECT has completed a Phase I Environmental Site Assessment (ESA) for the Parramore Community Garden located at 654 West Robinson Street, Orlando, Orange County, Florida 32801. This Phase I ESA was conducted in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E1527-13 for Phase I ESAs. Deviations or data gaps from this Practice are described in Section 11 of this report.

The Phase I ESA investigation has revealed evidence of no RECs associated with the Site.

The 1950 Sanborn Map identifies the adjoining property to the east of the Parramore Community Garden as a Paint Factory (MFG.). The 1939-1948 City Directory identifies the adjoining property to the east as Burkes Tropical Paint Co. Inc. Mfrs. The 1953 City Directory identifies the adjoining property to the east as Morris Paint and Varnish Co. Due to the proximity of this former business, the business type, and the unknown business practices associated with it, BURKES PAINT MANUFACTURING and MORRIS PAINT AND VARNISH CO. are considered a potential concern for the Parramore Community Garden.

## 2.0 INTRODUCTION

ECT has completed a Phase I Environmental Site Assessment (ESA) for the property located at 654 West Robinson Street, Orlando, Orange County, Florida 32801 (Site). The Site is currently utilized as a community garden. A Site Location Map is provided as **Figure 1**. A USGS Topographic Map, 1998, West Orlando, which includes the Site and the surrounding area, is provided as **Figure 2**. An aerial photograph, circa 2012, depicting the Site is also provided as **Figure 3**.

### 2.1 Purpose

Mr. Dan Dashtaki with the City of Orlando authorized ECT to conduct a Phase I ESA of the Site to evaluate the presence/absence of RECs. The City of Orlando is the recipient of a Brownfields Assessment Grant, EPA Cooperative Agreement BF-95498212. This grant was awarded in September 2012, and is a community-wide assessment grant, with emphasis on the Parramore area, specifically targeting redevelopment areas.

The objective of the Phase I ESA was to identify RECs in connection with the Site, to the extent feasible pursuant to the processes prescribed in the ASTM E-1527-13 guidelines. The term “*REC*” as defined by ASTM is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This Phase I ESA includes information gathered from federal, state, and local agencies; personal interviews with people familiar with the Site and surrounding properties; a Site visit was conducted by ECT on May 6, 2014. This report is intended to meet the due diligence requirements of ASTM E 1527-13.

## **2.2 Detailed Scope of Services**

The Phase I ESA conducted by ECT included, but was not limited to, the following services:

- Review of the public record;
- Site reconnaissance to identify visual signs of environmental conditions on or adjoining the Site, and to evaluate evidence found in the review of public record that might be indicative of activities resulting in hazardous substances or petroleum products being used or deposited in the Site;
- Preparation of a written report documenting our findings, opinions, and conclusions.

## **2.3 Significant Assumptions**

This Phase I ESA was prepared using information obtained from and/or provided by the following sources:

- Visual observations of the Site;
- Available published information;
- Third-party database searches, and;
- Local/State government officials and/or records.

It is assumed that the information obtained through the above methods is valid and accurate as provided. The passage of time, manifestation of latent conditions, and occurrence of future events or changes to existing codes/regulations may alter the conclusions and recommendations of this report.

## **2.4 Limitations and Exceptions**

The opinions presented in this report are based upon the scope of services, information obtained through the performance of the services, and the schedule as agreed upon by ECT and the party for whom this report was originally prepared. This report is an instrument of professional service and was prepared in accordance with the generally accepted standards and level of skill and care under similar conditions and circumstances established by the environmental consulting industry. No representation, warranty, or guarantee, expressed or implied, is intended or given. To the extent that ECT relied upon information prepared by other parties not under contract to ECT, ECT makes no representation as to the accuracy or completeness of such information. This report is expressly for the sole and exclusive use of the party for whom this report was originally prepared, and for a particular purpose. Only the party for whom this report was originally prepared and/or other specifically named parties have the right to make use of and rely upon this report.

Reuse of this report or any portion thereof for other than its intended purpose, or if modified, or if used by third parties, shall be at the user's sole risk.

The findings presented in this report apply solely to the Site conditions existing at the time when ECT's assessment was performed. It must be recognized, however, that an ESA is intended for the purpose of determining the potential for contamination through limited research and investigative activities and in no way represents a conclusive or complete site characterization. Conditions in other parts of the Site may vary from those at the locations where data were collected. ECT's ability to interpret investigation results is related to the availability of the data and the extent of the investigation activities. ECT does not provide any guarantees, certifications, or warranties that a property is free from environmental contamination. Furthermore, nothing contained in this document shall relieve any other party of its responsibility to abide by contract documents and applicable laws, codes, regulations, or standards.

## **2.5 Special Terms and Conditions**

The scope of work for this Phase I ESA did not include testing of electrical equipment for the potential presence of PCBs or the assessment of natural hazards such as naturally occurring asbestos or methane gas, assessment of the potential presence of radionuclides, or assessment of non-chemical hazards such as the potential for damage from earthquakes or floods. This Phase I ESA also did not include an extensive assessment of the environmental compliance status of the Site or of the businesses operating onsite, or a health-based risk assessment.

## **2.6 User Reliance**

This Phase I ESA was conducted for the use and reliance of the City of Orlando. No use of the information contained in this report by others is permissible without receiving prior written authorization to do so from ECT. ECT is not responsible for independent conclusions, opinions, or recommendations made by others or otherwise based on the findings presented in this report.

## **3.0 SITE DESCRIPTION**

This section presents a general overview of the Site, onsite improvements, and surrounding properties.

### **3.1 Location and Legal Description**

The Site consists of one parcel located near the intersection of West Robinson Street and North Parramore Avenue, located within Section 26 of Township 22 South, and Range 29 East in Orlando, Orange County, Florida.

The Orange County Property Appraiser's Office information identifies the Site under the following parcel identification number, address, names, and legal descriptions:

26-22-29-6716-04-011; 654 West Robinson Street; JAMES B PARRAMORES  
ADDITION C/66 THE NE 1/4 OF LOT 1 BLK D & W1/2 OF VAC RD PER  
3758/0999 ON E.

A copy of the Orange County Property Appraiser's information is included as **Appendix A**.

### **3.2 Site and Vicinity General Characteristics**

The Site consists of one parcel totaling approximately 0.15 acres. The Site is bound by West Robinson Street to the north, and residential properties to west, south and east.

### **3.3 Current Use of the Property**

The Site is utilized as a community garden.

### **3.4 Descriptions of Structures, Roads, and Other Improvements on the Site**

#### **3.4.1 General Description of Structures**

There are currently no structures on the Site.

#### **3.4.2 Roads**

The Site is accessible by West Robinson Street to the north.

#### **3.4.3 Potable Water Supply**

Potable water is provided by the Orlando Utilities Commission.

#### **3.4.4 Sewage Disposal System**

No sewage disposal is provided by the Orlando Utilities Commission.

### **3.5 Current Uses of the Adjoining Properties**

The adjoining property to the north across West Robinson Street is currently utilized for manufacturing purposes. The adjoining properties to the west, south and east are utilized for multi-family residential purposes.

## **4.0 USER-PROVIDED INFORMATION**

The City of Orlando provided information to assist in the preparation of this report. This information is discussed in Section 5.2.4.

### **4.1 Title Records**

A review of title records from the Orange County Property Appraiser's website was performed. A copy of this documentation obtained is provided in **Appendix A**.

### **4.2 Environmental Liens or Activity and Use Limitations**

ECT is unaware of any environmental liens or use limitations associated with the Site.

### **4.3 Specialized Knowledge**

No specialized knowledge was provided to ECT for this Phase I ESA.

### **4.4 Commonly Known or Reasonably Ascertainable Information**

The Site is utilized as a community garden and contains planting beds, gardening tools, and a small storage shed for gardening supplies.

#### **4.5 Valuation Reduction for Environmental Issues**

No information regarding valuation reduction was provided.

#### **4.6 Owner, Property Manager, and Occupant Information**

The City of Orlando owns the parcel that comprises the Site. The Site is utilized as a community garden.

#### **4.7 Reason for Performing Phase I**

The reason for performing the Phase I ESA is to evaluate the presence/absence of RECs and to provide an update regarding the current status of the parcel to the City of Orlando.

#### **4.8 Other**

No additional information was provided by the Client to ECT for the preparation of this Phase I ESA.

### **5.0 RECORDS REVIEW**

The following section presents the results of ECT's historical records review, including aerial photographs, topographic maps, Sanborn maps, and city directories pertaining to the Site, or Target Property (TP).

#### **5.1 Standard Environmental Record Sources**

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate. A copy of the EDR Summary Radius Map Report is provided in **Appendix B**.

The environmental records were requested with a center-point of the study area located within the boundaries of the subject property. More detailed information regarding the individual databases searched is included in the Government Records Searched/Data Currency Tracking section of the EDR report. This section of the report also includes information regarding when each database was last updated. The report listed sites of potential concern based on the above search criteria. However, only the sites which appeared to have the potential for environmental impacts to the subject site due to proximity, anticipated direction of groundwater flow, and/or potential for migrating contamination are discussed below. Note: distances to potential concerns are from the nearest boundary of the Site.

- ORLANDO GASIFICATION PLANT

Location: 600 Block West Robinson Street

Concern: CERCLIS

Summary: The CERCLIS database contains hazardous sites that are either on the US EPA National Priorities List (NPL), proposed to be on the NPL, or are undergoing studies to determine if the site should be listed. The former Orlando Gasification Plant is listed under the regulatory CERCLIS database. Considerable studies have been conducted at the Orlando gasification facility, and current investigations focus on relatively deep documented groundwater impacts, extending to the Floridan aquifer. Recent site assessment activities included perimeter soil sampling and laboratory analytical results indicated there were no constituents of concern detected. This property is located east (E) 1/8 – 1/4 miles (0.079 mi.) from the TP. Although this property is located at a higher elevation above sea level than the TP, the contaminants have not migrated toward the TP. For this reason, Orlando Gasification Plant is not considered a REC.

- UNION 76 #9313-812

Location: 595 West Church Street

Concern: LUST, DWM CONTAM

Summary: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report. A review of the LUST list, as provided by EDR, and dated 01/13/2014 has revealed that the Union 76 #9313-812 facility is listed as a LUST. It was a retail station facility with a reported release of an unknown quantity of gasoline in 1987. Remedial action has been conducted but currently the site remains inactive with a Priority Score of 10. Union 76 is located south-southeast (SSE) 1/4 – 1/2 miles (0.365 mi.) from the TP. Because this property has a low priority score of 10 and is located at relatively the same elevation above sea level as the TP approximately 1/3 miles SSE of the TP, it is assumed that contaminants would not migrate toward the TP. For these reasons, UNION 76 #9313-812 is not considered a REC.

- HIWAY MART

Location: 700 West Church Street

Concern: LUST, DMW

Summary: EDR has searched the Leaking Underground Storage Tank (LUST) inventory available to EDR researchers. This property was listed as a fuel retail property with a documented discharge of an

unknown quantity of unleaded gasoline in 1988. The property owner applied for the state Early Detection Initiative Program but the site remains inactive with a Priority Score of 10 as of April 1, 2014. This property is also listed under the DMW CONTAM listing of active or known sites requiring cleanup but remain inactive awaiting funding. HIWAY MART is located south (S) 1/4 to 1/2 miles (0.385 mi.) from the TP. Because this property is located at approximately the same elevation above sea level as the TP, it is assumed that contaminants would not migrate toward the TP. For this reason, HIWAY MART is not considered a REC.

- CHICONE PROPERTIES

Location: 101 North Garland Avenue

Concern: LUST, DMW

Summary: EDR has searched the Leaking Underground Storage Tank (LUST) inventory available to EDR researchers. This property was listed as a fuel retail property with a documented discharge of an unknown quantity of leaded gasoline in 1996 impacting soil and groundwater media. The property owner applied for the state Abandoned Tank Restoration Program requiring cleanup but the site remains inactive with a Priority Score of 26. This property is also listed under the DMW CONTAM listing of active or known sites requiring cleanup but remain inactive awaiting funding. CHICONE PROPERTIES site is located east-southeast (ESE) 1/4 to 1/2 miles (0.416 mi.) from the TP. Because this property is located at approximately the same elevation above sea level as the TP, it is assumed that contaminants would not migrate toward the TP. For this reason, CHICONE PROPERTIES is not considered a REC.

- DIKEOU PROPERTY

Location: 100 Washington Street

Concern: LUST, DMW CONTAM

Summary: The EDR report showed in 2007 this property was listed as a fuel user/non-retail property with a documented discharge of an unknown quantity of gasoline and/or diesel resulting in soil and groundwater impacts. The property owner applied for the state Innocent Victim Petroleum Storage System Restoration Program but the site remains inactive awaiting funding. As a result, this property is also listed under the DMW CONTAM listing of active or known sites requiring cleanup but remain inactive awaiting funding. DIKEOU PROPERTY is located east (E) 1/4 to 1/2 miles (0.315 mi.) from the TP. Because this property is located at the same elevation above sea level as the TP, it is assumed that contaminants would not

migrate toward the TP. For this reason, DIKEOU PROPERTY is not considered a REC.

- DEEDS Orlando and DEEDs Orlando Expanded

Location: Large area of downtown Orlando including the subject site

Concern: Brownfield Area

Summary: The first two listings in the database report identify the Downtown Economic Enhancement District (DEED) brownfield area originally designated in 2004 and expanded in 2007. Inclusion of the subject site or other properties within this area does not indicate that contamination is present, and is simply a legal designation to allow access to certain economic incentives related to the State and Federal Brownfields Programs. These area wide designations are not considered RECs.

## **5.2 Additional Environmental Record Sources**

The following additional or proprietary record sources were also searched and reviewed.

### **5.2.1 Historical Topographic Maps**

EDR's Historical Topographic Map Report is designed to assist in evaluating potential liability on a TP resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s. Historical topographic maps were produced and reviewed from 1956 through 1995. Results of the topographic map review are discussed in Section 5.3.

### **5.2.2 Sanborn Fire Insurance Maps**

Sanborn Fire Insurance Maps were produced since the late 1800's to provide information relative to fire hazards on insurable property. These maps often indicate locations of underground and aboveground gasoline tanks, storage facilities for flammable chemicals, such as dry cleaners, paint shops, maintenance and garage facilities, as well as historical information on occupants of buildings, unavailable through other sources. Production of these maps typically was limited to the immediate vicinity of downtown urban areas. EDR purchased the Sanborn Company and has access to all available Sanborn maps. EDR performed a search of its archive and indicated that Sanborn maps were produced for the vicinity of the TP in various years from 1908 to 1973. Findings of the map reviews are discussed in Section 5.4.

### **5.2.3 Historical City Directory Review**

R.L. Polk directories, Cole Information Services, Piedmont Directory Co., and/or Hill-Donnelly Cross Reference directories are referenced for study areas which help identify changes in land use based on the type of businesses that occupied the subject site and surrounding area. The type of business, such as automotive, dry cleaning, gasoline/service stations, etc. are indicative of the possible presence of hazardous substances or petroleum

products. Addresses within the general vicinity of the TP first appeared in available historical directories in 1922. Results of the directory search are discussed in Sections 5.4.

#### **5.2.4 City of Orlando Report Review**

The City of Orlando provided ECT with Figures to review from the Arcadis report titled Feasibility Study Report – Operable Unit 1, dated February 2013. ECT superimposed the soil sampling data onto an aerial photograph circa 2013 to compare and contrast the soil sampling locations for the former Orlando Gasification Plant or Manufactured Gas Plant (MGP) to the Parramore Community Garden. Surface soil sampling was completed within the right-of-ways (ROWS) of Terry Avenue, which is between the Parramore Community Garden and the former MGP facility. Surface soil samples (0-2 feet below land surface) were collected for polycyclic aromatic hydrocarbons (PAHs), volatile aromatic compounds (VOCs), and metals (antimony, arsenic, and beryllium). The compounds reported were below the preliminary remediation goals (RPGs) established for the MGP site.

Groundwater contaminant plume maps from the Arcadis report were reviewed. The groundwater contaminant plumes originating from the Orlando Gasification Plant appear to be migrating to the north, or away from the Site.

A copy of the Arcadis figures and the figures generated by ECT are provided in **Appendix C**.

### **5.3 Physical Setting Source(s)**

Physical sources that provide such information such as geological, hydrologic, or topographic characteristics were reviewed for potential migration pathways onto the Site. The Site has an approximate elevation of 107 feet National Geodetic Vertical Datum (NGVD) and the surrounding properties are typically at the same elevation or slightly lower to the north, south, east and west than the subject Site.

### **5.4 Historical Use Information on the Property**

To evaluate historical use of the TP, ECT reviewed readily available aerial photographs, city directories, and fire insurance maps.

#### **5.4.1 Topographic Maps**

Historical USGS topographic maps of the Site and surrounding area were obtained and reviewed by EDR for years 1956, 1970, 1980, and 1995. As shown on **Figure 2**, the USGS Topographic Map, 1997, Orlando West Quad 3712, the surrounding area is generally flat, at a National Geodetic Vertical Datum (NGVD) of 109 ft. Topographic elevations have been relatively consistent with the historic topographic maps. A brief review of the topographic maps for the TP is provided below:

**1956 – 1995** – No significant changes to the TP were identified in the Topographic Maps reviewed.

#### 5.4.2 Aerial Photographs

Aerial photographs were obtained and reviewed from EDR for years 1947, 1952, 1969, 1974, 1978, 1980, 1984, 1994, 1997, 1999, 2005, 2006, 2007, and 2010. The EDR Aerial Photograph Decade Package is provided in **Appendix C**. The most current 2012 aerial map, **Figure 3**, was also reviewed for activities on the TP. A brief synopsis of activities derived from the aerial photographs for the TP is provided below:

**1947 – 1984** – A residential dwelling appears on the western portion of the TP, and Lincoln Avenue appears to be on the eastern portion of the TP.

**1994 – 2008** – The TP appears to be a vacant lot.

**2009 – 2014** – The TP is being utilized as the Parramore Community Garden.

#### 5.4.3 Directories

A review of the city directories provided by EDR was conducted as a part of this Phase I ESA. The directory information did not indicate past businesses or activities on the TP that would be considered suspect or warrant additional records review. A copy of the EDR-City Directory Abstract is provided in **Appendix C**.

#### 5.4.4 Fire Insurance Maps

Fire Insurance Maps (Sanborn Maps) were obtained and reviewed from EDR for years 1908, 1913, 1919, 1925, 1950, 1956, 1965, and 1973. The Sanborn Maps are provided in **Appendix C**. A brief synopsis of activities derived from the Sanborn Maps for the TP is provided below:

**1908** – A residential dwelling is located on the TP.

**1913** – No change from 1908.

**1919** – No change from 1908.

**1925** – A residential structure is present on the western portion of the TP, with the eastern portion consisting of Lincoln Avenue.

**1950** – No change from 1925.

**1956** – No change from 1925.

**1965** – No change from 1925.

**1973** – No change from 1925.

### 5.5 Historical Use Information on Adjoining Properties

To evaluate historical use of the adjoining properties, ECT reviewed readily available topographic maps, aerial photographs, Orange County Property Appraiser's information, and fire insurance maps.

#### 5.5.1 Topographic Maps

Historical USGS topographic maps of the Site and surrounding area were obtained and reviewed by EDR for years 1956, 1970, 1980, and 1995. As shown on **Figure 2**, the USGS Topographic Map, 1997, Orlando West Quad 3712, the surrounding area is

generally flat, at a National Geodetic Vertical Datum (NGVD) of 109 ft. Topographic elevations have been relatively consistent with the historic topographic maps. A brief review of the topographic maps for the adjoining properties of the TP is provided below:

**1956 – 1995** – No significant changes to the adjoining properties of the TP were identified in the Topographic Maps reviewed.

### **5.5.2 Aerial Photographs**

Aerial photographs were obtained and reviewed from EDR for years 1947, 1952, 1969, 1974, 1978, 1980, 1984, 1994, 1997, 1999, 2005, 2006, 2007 and 2010. The EDR Aerial Photograph Decade Package is provided in **Appendix C**. The most current 2012 aerial map, **Figure 3**, was also reviewed for activities on the adjoining properties of the TP. A brief synopsis of activities derived from the aerial photographs is provided below:

**1947** – The adjoining properties are developed with residential buildings to the south, east and west. The property adjoining to the north has unknown structures which appear to be of commercial or industrial use.

**1952** – No major changes observed from the previous aerial photograph.

**1969** – There appears to be less structures located on the property adjoining to the north. No other major changes observed from the previous aerial photograph.

**1974** – There appears to be additional structures constructed from previous aerial on the property adjoining to the north. No other major changes observed from the previous aerial photograph.

**1978** – No major changes observed from the previous aerial photograph.

**1980** – A commercial building has been constructed at the north end of the parking lot adjoining the TP to the east. No other major changes from the previous aerial photograph are apparent.

**1984** – No major changes observed from the previous aerial photograph

**1994** – No major changes observed from the previous aerial photograph.

**1997** – No major changes observed from the previous aerial photograph.

**1999** – The construction of Callahan Oaks has occurred and Lincoln Avenue has been removed.

**2005** – No major changes observed from the previous aerial photograph.

**2006** – No major changes observed from the previous aerial photograph.

**2007** – No major changes observed from the previous aerial photograph.

**2010** – The Parramore Community Garden has been established.

**2012** – No major changes observed from the previous aerial photograph.

### 5.5.3 Directories

A review of the city directories indicated that none of the adjoining indicated past businesses or activities on the TP that would be considered suspect or warrant additional records review.

### 5.5.4 Fire Insurance Maps

Sanborn Maps were obtained and reviewed from EDR for years 1908, 1913, 1919, 1925, 1950, 1956, 1965, and 1973. The Sanborn Maps are provided in **Appendix C**. A brief synopsis of activities derived from the Sanborn Maps for the adjoining properties is provided below:

**1908** – Lincoln Avenue is adjoining to the east, no other data is provided for the adjoining properties.

**1913** – Unknown structures exist on the adjoining properties to the west and south. Lincoln Avenue is adjoining to the east and West Robinson Avenue is adjoining to the north.

**1919** – Sereard Air Line Railway exists on the property northeast of the TP across West Robinson Avenue. The property is vacant northwest of the TP across West Robinson Avenue. No other major changes observed from the previous Sanborn Map.

**1925** – Mexican Petroleum Company appears on the property north of the TP across West Robinson Avenue and a storage facility appears on the property northwest of the TP across West Robinson Avenue. No other major changes observed from the previous Sanborn Map.

**1950** – American Oil Company appears to have replaced Mexican Oil Company north of the TP across West Robinson Avenue, and a fruit packing company appears to be present on the property northwest of the TP across West Robinson Avenue. Residential dwellings and vacant property exists to the west, south and east. Also located east of the TP across Lincoln Avenue is a paint factory (manufacturing).

**1956** – No major changes from the previous Sanborn Map.

**1965** – The property located north of the TP across West Robinson Avenue now consists of a building material yard and the property located to the east of the TP across Lincoln Avenue now appears vacant. Residential dwellings and vacant property exists to the west, south and east.

**1973** – The property located northwest of the TP across West Robinson Avenue appears to be vacant Residential dwellings and vacant property exists to the west, south and east. No major changes from the previous Sanborn Map.

## 6.0 SITE RECONNAISSANCE

On May 6, 2014, representatives of ECT performed a site reconnaissance to observe general site conditions and to identify visible evidence of RECs. The property consisted of one structure. Select photographs taken on the property during site inspection/reconnaissance are provided in **Appendix D**.

## **6.1 Methodology and Limiting Conditions**

The methodology for the site reconnaissance included traversing the Site in a grid pattern while observing the ground surface of the property. A Site Reconnaissance Checklist documenting the Site and adjoining properties was completed and is provided in **Appendix D**.

## **6.2 General Site Setting**

### **6.2.1 Current Use(s) of the Property**

The current use of the Site is a community garden.

### **6.2.2 Past Use(s) of the Property**

The Site appears to have been developed according to the Sanborn Maps as early as 1908.

### **6.2.3 Current Uses of Adjoining Properties**

The Site is located in a developed area of West Robinson Street in an area of mixed residential and industrial use. Residential properties are located to the west, south and east of the Site.

### **6.2.4 Past Uses of Adjoining Properties**

Past uses of the adjoining parcels have been both commercial, industrial and residential.

### **6.2.5 Current or Past Uses in the Surrounding Area**

Current and past uses in the surrounding area are a mix of commercial, industrial and residential.

### **6.2.6 Geologic, Hydrogeologic, and Hydrologic Conditions**

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS) Soil Survey of Orange County, Florida (1989), the majority of the subject property is underlain by Millhopper fine sands. Below is a brief description of this soil type:

Millhopper fine sand: This soil type is nearly level to gently sloping and moderately well drained and is found on low ridges and knolls on the uplands and on the flatwoods. The slopes are nearly smooth to slightly convex. A seasonal high water table in Tavares soil is at a depth of 40 to 72 inches for more than 6 months, and it recedes to a depth of more than 80 inches during extended dry periods. A seasonal high water table in Millhopper soil is at a depth of 40 to 60 inches for 1 to 4 months, and it recedes to a depth of 60 to 72 inches for 2 to 4 months. During periods of high rainfall, the water table is at a depth of 30 to 40 inches for cumulative periods of 1 to 3 weeks. The permeability of Tavares soil is very rapid. The permeability of Millhopper soil is rapid in the surface and subsurface layers and moderately rapid of moderate in the subsoil. The available water capacity of Tavares soil is very low. The available water capacity of Millhopper soil is low in the surface and subsurface layers and medium in the subsoil. Natural fertility is very low in Tavares soil and low in Millhopper soil. Organic matter content is very low in Tavares soil and low or moderately low in Millhopper soil. In most areas, the soils in this map unit are used for citrus crops and/or for homesite development.

ECT personnel also reviewed the soil survey of Orange County, dated 1957 (issued 1960). According to the Soil Survey, Orange County is underlain by marine deposited beds of sand, silt, clay, limestone, dolomite, and shale to about 6,500 feet below land surface (bls). The uppermost unit is Pleistocene to Recent in age and generally composed of unconsolidated, very fine to medium-grained quartz sand with some clays. The Pleistocene and Recent age sediments are underlain by the Hawthorn Group of Miocene age (about 25 million years old). In general, the Hawthorn Group is highly variable and diverse, including inter-bedded and inter-fingered sand, clayey sand, sandy-clayey phosphatic sediments, dolomite, and limestone. The Miocene age sediments are underlain by a thick sequence of late Eocene age limestone formations known as the Ocala Group. It is described as gray clay and gravel to white, soft limestone. The Ocala Group Limestone is underlain by the Avon Park Limestone, which is also of Eocene age. This formation is composed of similar materials, but distinguished from overlying units by the occurrence of sand-sized, cone-shaped foraminifera. The formation is usually tan in color, but can range from chalky white to light brown or ashen gray. The Lake City Limestone of middle Eocene age underlies the Avon Park Limestone. It is similar in lithology and water-bearing properties to the Avon Park Limestone and makes up the bottom portion of the Floridan aquifer.

According to the Soil Survey, ground water occurs in both artesian and non-artesian conditions in the Orange County. The non-artesian aquifer is composed mainly of sand and shell with varying amounts of clay and provides limited amounts of water. Water from this aquifer is used mainly for livestock and limited domestic use. Water quality in this aquifer varies depending on the chemical composition of the aquifer and the content of the calcium carbonate in the area. The secondary artesian aquifer and the Floridan Aquifer are the two types of artesian aquifers in Orange County. The secondary artesian aquifer generally yields less water than the Floridan Aquifer, but yields more than the non-artesian aquifers. The secondary artesian aquifers contain undifferentiated sediments and are more extensive in the Hawthorn Group. The quality of the secondary artesian aquifer varies with depth, location, and local geologic and hydrologic conditions.

The Floridan Aquifer underlies all of Florida. In Orange County, the Floridan Aquifer includes the Lake City Limestone, the Avon Park Limestone, the Ocala Group, and parts of the Hawthorn Group. The aquifer consists of alternating layers of limestone and dolomite or dolomitic limestone. This aquifer is one of the most productive in the world. Ground water recharge in Orange County of the Floridan Aquifer comes from annual rainfall. Water also enters the Floridan Aquifer by underground flow from outside the region. Discharge of ground water from the Floridan Aquifer occurs by spring outflow, seepage into the St. Johns River system, by outflows to other areas, and by localized pumping in the area.

### **6.3 Exterior Observations**

The following items or conditions were looked for or identification was attempted, as indicated in the ASTM standard.

**6.3.1 Hazardous Substances and Petroleum Products Containers in Connection with Identified Uses**

No hazardous substances or petroleum product containers were detected during the Site reconnaissance.

**6.3.2 Storage Tanks**

No aboveground storage tanks (ASTs) or underground storage tanks (USTs) were detected during the Site reconnaissance.

**6.3.3 Odors**

No strong, pungent, or noxious odors and their sources were detected during the Site reconnaissance.

**6.3.4 Pools of Liquid**

No standing surface water and pools or sumps containing liquids likely to contain hazardous substances or petroleum products were observed during the during the Site reconnaissance.

**6.3.5 Drums**

No drums were observed during the Site reconnaissance.

**6.3.6 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)**

No hazardous substances or petroleum products containers not necessarily in connection with identified uses were observed during the Site reconnaissance.

**6.3.7 Unidentified Substance Containers**

No unidentified substance containers were observed during the Site reconnaissance.

**6.3.8 PCBs**

There were no transformers or other structures containing PCBs.

**6.3.9 Pits, Ponds, or Lagoons**

No pits, ponds, lagoons or other stormwater features were identified during the Site reconnaissance.

**6.3.10 Stained Soil or Pavement**

No stained soil was observed during the Site reconnaissance.

**6.3.11 Stressed Vegetation**

No stressed vegetation (from other than insufficient water) was identified during the Site reconnaissance.

**6.3.12 Solid Waste**

No areas that were apparently filled or graded by non-natural causes (or filled of unknown origin) suggesting trash construction debris, demolition debris, or other solid waste

disposal, or mounds or depressions suggesting trash or other solid waste disposal were identified during the Site reconnaissance.

#### **6.3.13 Wastewater**

No wastewater or other liquids (including stormwater) or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site were observed discharging to drains or underground injection systems on site during the Site reconnaissance.

#### **6.3.14 Wells**

No private water well, pump or associated plumbing were detected during the Site reconnaissance.

#### **6.3.15 Septic Systems**

No septic systems were observed during the Site reconnaissance.

#### **6.3.16 Other**

Gardening activities in raised beds was observed during the Site reconnaissance.

### **6.4 Interior Observations**

One wooden storage shed structure measuring approximately 50 square feet was present at the Site but not accessible to ECT personnel during the Site reconnaissance.

#### **6.4.1 Heating/Cooling**

No heating and cooling system was identified during the Site reconnaissance.

#### **6.4.2 Stains or Corrosion**

No stains or corrosion was identified during the Site reconnaissance.

#### **6.4.3 Drains and Sumps**

No drains or sumps were observed during the Site reconnaissance.

#### **6.4.4 Hazardous Substances and Petroleum Products with Identified Uses**

No hazardous substances or petroleum products were observed during the Site reconnaissance.

#### **6.4.5 Storage Tanks**

No ASTs, USTs, vent pipes, or fill pipes were identified within the structure during the Site reconnaissance.

#### **6.4.6 Odors**

No strong, pungent or noxious odors were during the Site reconnaissance.

#### **6.4.7 Pools of Liquid**

No strong, pungent or noxious odors were during the Site reconnaissance.

#### **6.4.8 Drums**

No drums were observed within the building during the Site reconnaissance.

#### **6.4.9 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)**

No hazardous substances or petroleum products containers were observed during the Site reconnaissance.

#### **6.4.10 Unidentified Substance Containers**

No open or damaged containers of unidentified substances suspected of being hazardous substances or petroleum products were observed during the Site reconnaissance.

#### **6.4.11 PCBs**

No open or damaged containers of unidentified substances suspected of being hazardous substances or petroleum products were observed during the Site reconnaissance.

### **7.0 INTERVIEWS**

Interviews were not conducted as a part of this Phase I ESA.

#### **7.1 Interviews with Site Contacts**

Interviews with site contacts were not conducted as a part of this Phase I ESA.

#### **7.2 Interviews with Local Government Officials**

Interviews with local government officials were not conducted as a part of this Phase I ESA.

### **8.0 FINDINGS**

This section identifies known or suspect RECs and other findings discovered during the Phase I ESA investigations.

1. ORLANDO GASIFICATION PLANT, 600 Block West Robinson Street:

The EDR report had the former Orlando Gasification Plant is listed under a number of regulatory databases, including CERCLIS. The CERCLIS database contains hazardous sites that are either on the US EPA National Priorities List (NPL), proposed to be on the NPL, or are undergoing studies to determine if the site should be listed. Considerable studies have been conducted at the Orlando gasification facility, and current investigations focus on relatively deep documented groundwater impacts, extending to the Floridan aquifer. This facility is located north-northwest (NNW) 1/8 – 1/4 miles (0.135 mi.) from the TP. The documented impacts are not considered a REC, as the benzene groundwater plume exists on this site adjacent to the TP.

2. UNION 76 #9313-812, 595 West Church Street:

The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report. A review of the LUST list, as provided by EDR, and dated 01/13/2014 has revealed that the Union 76 #9313-812 facility is listed as a LUST. It was a retail station facility with a reported release of an unknown quantity of gasoline in 1987. Remedial action has been conducted but currently the site remains inactive with a Priority Score of 10. Union 76 is located south-southeast (SSE) 1/4 – 1/2 miles (0.365 mi.) from the TP. Because this property has a low priority score of 10 and is located at relatively the same elevation above sea level as the TP approximately 1/3 miles SSE of the TP, it is assumed that contaminants would not migrate toward the TP. For these reasons, UNION 76 is not considered a potential concern for the TP.

3. HIWAY MART, 700 West Church Street:

EDR has searched the Leaking Underground Storage Tank (LUST) inventory available to EDR researchers. This property was listed as a fuel retail property with a documented discharge of an unknown quantity of unleaded gasoline in 1988. The property owner applied for the state Early Detection Initiative Program but the site remains inactive with a Priority Score of 10 as of April 1, 2014. This property is also listed under the DMW CONTAM listing of active or known sites requiring cleanup but remain inactive awaiting funding. HIWAY MART is located south (S) 1/4 to 1/2 miles (0.385 mi.) from the TP. Because this property is located at approximately the same elevation above sea level as the TP, it is assumed that contaminants would not migrate toward the TP. For this reason, HIWAY MART PROPERTY is not considered a potential concern for the TP.

4. CHICONE PROPERTIES, 101 North Garland Avenue:

EDR has searched the Leaking Underground Storage Tank (LUST) inventory available to EDR researchers. This property was listed as a fuel retail property with a documented discharge of an unknown quantity of leaded gasoline in 1996 impacting soil and groundwater media. The property owner applied for the state Abandoned Tank Restoration Program requiring cleanup but the site remains inactive with a Priority Score of 26. This property is also listed under the DMW CONTAM listing of active or known sites requiring cleanup but remain inactive awaiting funding. CHICONE PROPERTIES site is located east-southeast (ESE) 1/4 to 1/2 miles (0.416 mi.) from the TP. Because this property is located at approximately the same elevation above sea level as the TP, it is assumed that contaminants would not migrate toward the TP. For this reason, HIWAY MART PROPERTY is not considered a potential concern for the TP.

5. DIKEOU PROPERTY, 100 Washington Street:

The EDR report showed in 2007 this property was listed as a fuel user/non-retail property with a documented discharge of an unknown quantity of gasoline and/or diesel resulting in soil and groundwater impacts. The property owner applied for the state Innocent Victim Petroleum Storage System Restoration Program but the site remains inactive awaiting

funding. As a result, this property is also listed under the DMW CONTAM listing of active or known sites requiring cleanup but remain inactive awaiting funding. DIKEOU PROPERTY is located east (E) 1/4 to 1/2 miles (0.315 mi.) from the TP. Because this property is located at the same elevation above sea level as the TP, it is assumed that contaminants would not migrate toward the TP. For this reason, DIKEOU PROPERTY is not considered a potential concern for the TP.

6. DEEDS Orlando and DEEDs Orlando Expanded, Large area of downtown:

The EDR report identified the Downtown Economic Enhancement District (DEED) brownfield area originally designated in 2004 and expanded in 2007. Inclusion of the subject site or other properties within this area does not indicate that contamination is present, and is simply a legal designation to allow access to certain economic incentives related to the State and Federal Brownfields Programs. These area-wide designations are not considered RECs for the TP.

7. BURKES PAINT MANUFACTURING and MORRIS PAINT AND VARNISH CO., 638 West Robinson Street:

The 1950 Sanborn Map identifies the adjoin property to the east of the target property (TP) as a Paint Factory (MFG.). The 1939-1948 City Directory identifies the adjoin property to the east as Burkes Tropical Paint Co. Inc. Mfrs. The 1953 City Directory identifies the adjoining property to the east as Morris Paint and Varnish Co. Due to the proximity of this former business, the business type, and the unknown business practices associated with it, BURKES PAINT MANUFACTURING and MORRIS PAINT AND VARNISH CO. are considered a potential concern for the TP.

### **8.1 Known or Suspect RECs**

This Phase I ESA has revealed no evidence of RECs in connection with the Site.

### **8.2 Historical RECs**

This Phase I ESA has revealed no evidence of historical RECs in connection with the Site.

### **8.3 *De Minimis* Conditions**

This Phase I ESA has revealed no evidence of *De Minimis* conditions in connection with the Site.

### **8.4 Other Findings**

The 1950 Sanborn Map identifies the adjoin property to the east of the target property (TP) as a Paint Factory (MFG.). The 1939-1948 City Directory identifies the adjoin property to the east as Burkes Tropical Paint Co. Inc. Mfrs. The 1953 City Directory identifies the adjoining property to the east as Morris Paint and Varnish Co. Due to the proximity of this former business, the business type, and the unknown business practices associated with it, BURKES PAINT MANUFACTURING and MORRIS PAINT AND VARNISH CO. are considered a potential concern for the TP.

## 9.0 OPINION

This section includes the environmental professional's opinion(s) of the impact on the property conditions identified in the findings section.

1. ORLANDO GASIFICATION PLANT, 600 Block West Robinson Street:  
This site is not considered a REC.
  
2. UNION 76 #9313-812, 595 West Church Street:  
This site is not considered a REC.
  
3. HIWAY MART, 700 West Church Street:  
This site is not considered a REC.
  
4. CHICONE PROPERTIES, 101 North Garland Avenue:  
This site is not considered a REC.
  
5. DIKEOU PROPERTY, 100 Washington Street:  
This site is not considered a REC.
  
6. DEEDS Orlando and DEEDs Orlando Expanded, Large area of downtown included TP:  
These area wide designations are not considered RECs for the TP.
  
7. BURKES PAINT MANUFACTURING and MORRIS PAINT AND VARNISH CO., 638 West Robinson Street:  
This site is considered a potential concern for the TP.

## 10.0 CONCLUSIONS

ECT has conducted a Phase I ESA for the Site located at 654 West Robinson Street. This Phase I ESA was conducted in conformance with the scope and limitations of ASTM Practice E1527-13 for Phase I ESAs. Deviations or data gaps from this Practice are described in Section 11 of this report.

The Phase I ESA investigation has revealed no evidence of RECs associated with the Site.

## 11.0 DEVIATIONS/DATA GAPS

The following deviations from ASTM practice were identified:

- Interviews with site contacts were not conducted as a part of this Phase I ESA. The inability to conduct interviews with property owners is considered a deviation to the ASTM 1527-13 standard and constitutes a data failure. For the purposes and intent of this report, this data failure is not considered significant.
  
- The five-year interval review of historical sources from the present, back to the property's first developed use or back to 1940 could not be achieved. This is

considered a deviation to the ASTM 1527-13 standard and constitutes a data failure. For the purposes and intent of this report, this data failure is not considered significant.

## **12.0 ADDITIONAL SERVICES**

No additional services outside of the scope of work (i.e., asbestos, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and biological agents) were provided for this investigation.

## 14.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The environmental assessment described herein was conducted by the undersigned employees of ECT. ECT's investigation consisted solely of the activities described in the Introduction of this report, and in accordance with the Terms and Conditions of Services Authorization #VI.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312. I, have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312. The qualifications of the environmental professionals listed below are provided in **Appendix E**.

O.R. 1754 pg 659

# Articles of Agreement,

990

325  
20

Made this 26th day of February

in the year of our Lord, one thousand nine hundred and Sixty-eight (1968)

Between UREY BURRELL and RELA BURRELL, his wife

part ies of the first part, and

LESLIE PIERCE and MILDRED PIERCE, his wife  
660 W. Robinson Ave., Orlando, Florida

part ies of the second part.

**Witnesseth**, That if the said part ies of the second part shall first make the payments and perform the covenants hereinafter mentioned on their part to be made and performed, the said part ies of the first part hereby covenant and agree to convey and assure to the said part ies of the second part, their heirs, executors, administrators or assigns, in fee simple, clear of all incumbrances whatever, by a good and sufficient deed, the lot . . . piece or parcel of land, situated in the County of Orange . . . State of Florida known and described as follows, to-wit:

The NE1/4 of Lot 1, Block "D", JAMES B. PARRAMORE'S ADDITION TO THE CITY OF ORLANDO, according to the plat thereof as recorded in Plat Book "C", Page 66, Public Records of Orange County, Florida.

AUG 9 1968 No. 029 \$13.20

Received the above amount in payment of taxes due on class "C" Intangible Personal Property pursuant to Chapter 199, Fla. Statutes.

*Arthur W. Stewart*  
Clerk of the Circuit Court, Orange County, Fla.

and the said parties of the second part hereby covenant and agree to pay to the said parties of the first part the sum of SEVEN THOUSAND AND 00/100--(\$7,000.00) dollars, in the manner following: \$400.00 at the time of the execution of this agreement, and the sum of \$80.00 per month beginning April 1, 1968, and continuing thereafter on the 1st day of each month following. The parties of the first part agree to pay all prior indebtednesses or encumbrances that exist as a lien against this property.

with interest at the rate of Six (6%) per centum per annum, payable annually on the whole sum remaining from time to time unpaid; and to pay all taxes, assessments or impositions that may be legally levied or imposed upon said land subsequent to the year 1967, and to keep the buildings upon said premises insured in some company satisfactory to the parties of the first part, and payable for the parties, respectively as their interests may appear, in a sum not less than

Dollars

during the term of this agreement. And in case of failure of the said part ies of the second part to make any of the payments or any part thereof, or to perform any of the covenants on their part hereby made and entered into, this contract shall, at the option of the part ies of the first part, be forfeited and terminated, and the part ies of the second part shall forfeit all payments made by them on this contract; and such payments shall be retained by the said part ies of the first part in full satisfaction and liquidation of all damages by them sustained, and the said part ies of the first part shall have the right to re-enter and take possession of the premises aforesaid without being liable to any action therefor.

**It Is Mutually Agreed**, by and between the parties hereto, that the time of each payment shall be an essential part of this contract, and that all covenants and agreements herein contained shall extend to and be obligatory upon the heirs, executors, administrators and assigns of the respective parties.

**In Witness Whereof**, The parties to these presents have hereunto set their hands and seals the day and year first above written.

CODE ENFORCEMENT BOARD OF THE  
CITY OF ORLANDO, FLORIDA  
CASE NO. CEB 97-4351Comm

CITY OF ORLANDO

Petitioner,

vs.

Nathaniel Newton

Respondent(s)/

**STATUTORY ORDER IMPOSING PENALTY/LIEN**

This CAUSE originally came on for hearing before the Code Enforcement Board (hereinafter referred to as "Board") on November 13, 1996, after due notice to the Respondent(s), at which time the Board heard testimony under oath, received evidence, and issued its Findings of Fact and Conclusions of Law and thereupon issued its oral Order which was reduced to writing and furnished to Respondent(s).

Said Order required Respondent(s) to take certain action by a time certain, as more specifically set forth in that Order.

An Affidavit of Non-Compliance, bearing the date of April 25, 1997, has been filed with the Board by the Code Inspector, which Affidavit certifies under oath that the required corrective action has not been taken as ordered.

Accordingly, it having been brought to the Board's attention that Respondent(s) have not complied with the Order dated November 13, 1996, it is hereby

ORDERED that the respondent(s) pay to the City of Orlando a fine in the amount of Two Hundred Fifty dollars (\$250.00) per day for each and every day the violation(s) exist(s) and continue to exist 1028 Polk St., Orlando, Florida described as:

Lot 8, Block 3, Van Morgan's 2nd Addition according to the plat thereof as recorded in Plat Book D, Page 87 Public Records of Orange County, Florida, Less the South 32.59 feet of said Lot 8.

after December 15, 1996, which was the date previously set by the Board's Order for Compliance.

This Order can be recorded and shall then constitute a lien for all the accrued fines against the above described property, and any other real or personal property that the violator owns in the Orange County where recorded pursuant to sections 162.08 and 162.09 of the Florida Statutes.

DONE AND ORDERED this 29th day of May, \_\_\_\_\_, 1997 at Orlando, Orange County, Florida.

**AGREEMENT—CONVEYANCE OF DEED IN LIEU OF FORECLOSURE**

This agreement is made and executed on March 15, 2002, by NATHANIEL NEWTON, of 4104 Kirkland Blvd., Orlando, Orange County, Florida, 32811, referred to as Grantor, and The City of Orlando, Florida, referred to as Lienor.

**RECITALS**

A. Grantor is the owner of real property located at 916 Grand Street, Orlando, Orange County, Florida, which is more fully described as follows:

**The East 50 feet of Lot 4 and the West 13.4 feet of Lot 4 (less the North 2 feet thereof for roadway) and all of Lot 5 (less the North 2 feet thereof for roadway) Plat of Subdivision of Lot 6 of the ORLANDO FARM AND TRUCK CO.'S LAND, according to the plat thereof as recorded in Plat Book D, Page 77, Public Records of Orange County, Florida.**

B. That as a result of a violation of the Building Code of the City of Orlando, the City of Orlando (Lienor), on July 9, 1997, Lienor recorded, in O.R. Book 5287, Page 1583, of the Public Records of Orange County, Florida, a Statutory Order Imposing Penalty/Lien against property belonging to Grantor, said property located at 1028 Polk Street, Orlando, Orange County, Florida, which is more fully described as follows:

**Lot 8, Block 3, VAN MORGAN'S 2<sup>ND</sup> ADDITION, according to the Plat thereof as recorded in Plat Book "D", Page 87, in the Public Records of Orange County, Florida, less the South 32.59 Feet of said Lot 8.**

Said Statutory Order Imposing Penalty/ Lien required that Grantor pay to the Lienor a fine in the amount of \$250.00 per day for each and every day the violation exists and continues to exist at 1028 Polk Street, Orlando, Orange County, Florida, after December 15, 1996, which was the date previously set by the Board's Order for compliance with the above referenced Code. As of October 29, 2001, said fine has accumulated in the total amount of \$353,250.00.

C. Grantor failed to cure the code violation and failed to pay the above referenced fine and, as a result, the City of Orlando, Lienor, on or about April 26, 2001, filed a Complaint to Foreclose the above referenced lien against Grantor.

D. Grantor desires to convey to lien holder the property described above as consideration for Lienor's release of Grantor from the obligation to cure the code violation and to pay the above referenced fine as required by the above referenced Statutory Order Imposing Penalty/Lien, and from all other requirements, claims and demands with respect to the property and said Statutory Order Imposing Penalty/Lien.

E. Lienor desires to accept the conveyance of the property, and will release Grantor from the requirements, claims and demands with respect to the Statutory Order Imposing Penalty/Lien, with respect to said property.

F. This Agreement does not contravene any other Agreements entered into between NATHANIEL NEWTON (Grantor) and the City of Orlando (Lienor) regarding outstanding code liens, including, but not limited to, any and all Agreements entered into between NATHANIEL NEWTON and the City of Orlando (Lienor) on or about October 29, 2001 and recorded November 1, 2001 in OR Book 6382, Page 6541, OR Book 6382, Page 6544, OR Book 6382, Page 6547 and OR Book 6382, Page 6550.

Therefore, the parties agree as follows:

**SECTION ONE  
RIGHT OF REDEMPTION**

Grantor acknowledges that he enters into this Agreement of his own free will. Grantor also acknowledges that the release from his obligation under the Statutory Order Imposing Penalty/Lien constitutes valid consideration for conveyance of the deed. Grantor further acknowledges that on conveyance of the deed he will have no right of redemption of the property, and will be estopped from asserting any claim to redemption against the property.

**SECTION TWO  
IMPACT OF BANKRUPTCY**

1. Grantor represents that he is not subject to any bankruptcy proceeding, assignment for benefit of creditors, or similar proceedings, and has not committed any act of bankruptcy. On conveyance of the property, Grantor further represents that he will not become bankrupt or insolvent, and that conveyance of the property will not constitute a preferential transfer under bankruptcy law.

2. The parties understand and agree that if a bankruptcy proceeding is brought by or against Grantor, or Grantor is adjudged a bankrupt within twenty-four (24) months of the date on which the Quit Claim deed is delivered, Lienor may, at its sole option, re-convey the property to Grantor or the bankruptcy trustee, and may proceed with foreclosure or any other remedy available to it under the Statutory Order Imposing Penalty/Lien. Lienor shall cancel and satisfy the Statutory Order Imposing Penalty/Lien only if no such bankruptcy proceedings are brought by or against Grantor, and no other proceedings affecting title are brought or threatened within the twenty-four (24) month period.

**SECTION THREE  
QUITCLAIM DEED**

Immediately upon execution of this agreement, Grantor will execute and deliver to Lienor a quitclaim deed conveying the property described above to Lienor.

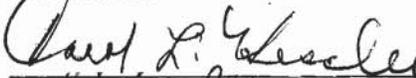

**SECTION FOUR  
AGREED PROPERTY VALUE**

The property to be conveyed to lender by Grantor has an agreed value of \$4,800.00

**SECTION FIVE  
WAIVER OF STATUTORY RIGHTS**

Grantor waives any right he may have had to lease or buy back property pursuant to Florida Statutes, or to redeem such property as an agricultural homestead real estate pursuant to Florida Statutes

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal CERCLIS list***

CERCLIS: A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

East Map:	28081-E3 ORLANDO EAST, FL
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

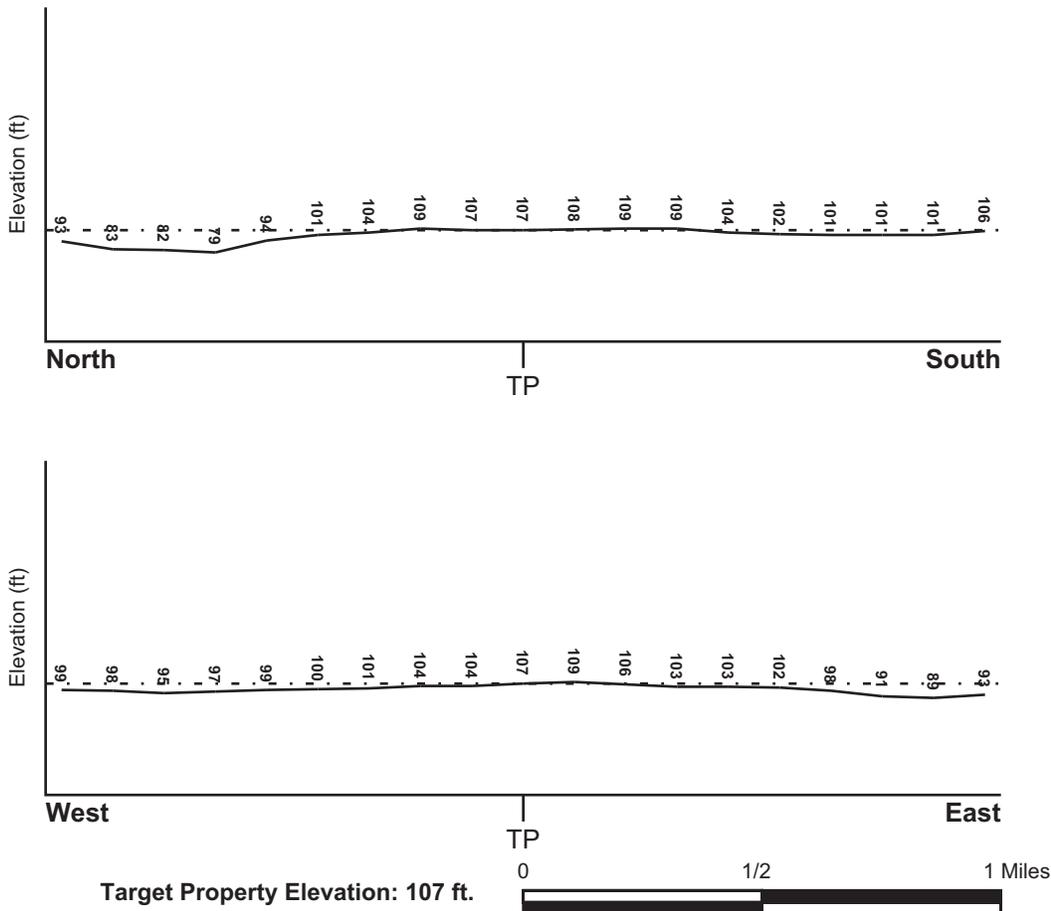

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u> ORANGE, FL	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	12095C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> ORLANDO WEST	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### *Site-Specific Hydrogeological Data\*:*

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

# GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:  
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	60 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

### Soil Map ID: 2

Soil Component Name: Millhopper

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 145 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	64 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 4.5
2	64 inches	79 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 0.42	Max: 6 Min: 4.5

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Basement	0.930 pCi/L	100%	0%	0%

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 850-245-8238

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### DEP GWIS - Generalized Water Information System Well Data

Source: Department of Environmental Protection

Telephone: 850-245-8507

Data collected for the Watershed Monitoring Section of the Department of Environmental Protection.

#### DOH and DEP Historic Study of Private Wells

Source: Department of Environmental Protection

Telephone: 850-559-0901

Historic database for private supply wells.

#### Well Construction Permitting Database

Source: Northwest Florida Water Management District

Telephone: 850-539-5999

#### Consumptive Use Permit Well Database

Source: St. Johns River Water Management District

Telephone: 386-329-4841

#### Permitted Well Location Database

Source: South Florida Water Management District

Telephone: 561-682-6877

#### Super Act Program Well Data

This table consists of data relating to all privately and publicly owned potable wells investigated as part of the SUPER Act program. The Florida Department of Health's SUPER Act Program (per Chapter 376.3071(4)(g), Florida Statutes), was given authority to provide field and laboratory services, toxicological risk assessments, investigations of drinking water contamination complaints and education of the public

Source: Department of Health

Telephone: 850-245-4250

#### Water Well Location Information

Telephone: 386-796-7211

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Water Well Permit Database

Source: Southwest Water Management District  
Telephone: 352-796-7211

## OTHER STATE DATABASE INFORMATION

### Florida Sinkholes

Source: Department of Environmental Protection, Geological Survey  
The sinkhole data was gathered by the Florida Sinkhole Research Institute, University of Florida.

### Oil and Gas Permit Database

Source: Department of Environmental Protection  
Telephone: 850-245-3194  
Locations of all permitted wells in the state of Florida.

## RADON

### State Database: FL Radon

Source: Department of Health  
Telephone: 850-245-4288  
Zip Code Based Radon Data

### Area Radon Information

Source: USGS  
Telephone: 703-356-4020  
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA  
Telephone: 703-356-4020  
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities  
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater  
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Inquiry # 3925518.3

Contact: Chad Downing

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ECT Env. Consulting & Tech Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

List any limitations to the site reconnaissance including locked doors, unsafe conditions, ground cover, low light, excluded areas, etc.

## **APPENDIX E**

# CHAD R. DOWNING

## Associate Scientist III

### Education

B.S., Ecology/Environmental Science—University of North Carolina-Asheville, 2008

### Registrations

OSHA HAZWOPER 40-hour and 8-hour refresher training  
FDEP Stormwater Management Inspector, No. 22278

### Wetlands/Ecology

**Project Scientist; Wetland Monitoring, Florida Power & Light Company**—Assisted in conducting wetland corridor monitoring to prepare a wetland restoration plan to comply with the Specific Condition of Certification No. B.I.B. in preparation for the installation of a 32-mile natural gas pipeline in Palm Beach County, Florida. Responsibilities included vegetative identification and coordinates were logged using a Trimble GPS unit to depict each location selected for wetland monitoring.

**Project Scientist; Aquatic Vegetation Survey, Smith/Murray Studios**—Responsibilities included conducting a vegetation survey for a proposed kayak launch located in Ferran Park at Lake Eustis. The launch area was located, delineated, and surveyed. Once the subject area was delineated, a vegetative survey was conducted to identify and survey aquatic plants for removal to create an unobstructed sand bank.

**Project Scientist; National Environmental Policy Act Assessment, VOTRAN**—An environmental assessment was conducted to address Federal Transit Administration Region 4 requirements as VOTRAN planned to expand its operations to a property in Orange City, Florida. Responsibilities included conducting an analysis of threatened and endangered species, wetlands, floodplains, and construction/operational impacts.

**Project Scientist; Wetland Delineation, Confidential Client**—Assisted in conducting an assessment and wetland delineation verification for power plant in Orange County, Florida, associated with a potential sale. Responsibilities included conducting a site assessment and wetland delineation. Soil and vegetative identification was performed onsite and coordinates were logged using a Trimble GPS unit to depict wetland boundaries.

**Project Scientist; Wetland Delineation, Wharton-Smith, Inc.**—Assisted in conducting a wetland delineation for Wharton-Smith IN Orange County, Florida. The site was associated with potential property development and the wetland delineation was requested for planning purposes. Responsibilities included conducting a wetland delineation, soil and vegetative identification performed onsite and per client's request the boundaries were marked with flagging.

**Field Technician; Wetland Research, Tongass and Maybeso Experimental Forests, U.S. Forestry Service**—Responsibilities included maintaining research sites in Alaska, including data loggers, piezometers, pressure transducers, and stream gauges. Also conducted soil and groundwater sampling

### AREAS OF SPECIALIZATION

Project Management, Financial Management, Personnel Management, Ecological Assessment, Water Quality Studies, Groundwater and Soil Sampling, Soil Characterization, Natural Attenuation Monitoring, Post Active Remedial Monitoring, Contamination Assessment, Site Remediation, Remedial Investigations, Remedial and Field Equipment Operation, Tank Closures

and performed various laboratory analytical procedures such as ion chromatography and spectrometry. Assisted in initiating a new study on Prince of Wales Island focusing on the transfer of the nitrogen isotope N15 from streams to the riparian zone.

**Field Technician; Bent Creek Experimental Forrester**—Conducted electrofishing studies on rainbow trout, brook trout, and brown trout as part of the curriculum of various ecological courses. Responsibilities included operating the electroshock systems, fish retrieval, categorization and measurement collection and logging. These studies were conducted at various fresh water stream systems in Asheville, North Carolina.

**Field Technician; Bent Creek Experimental Forrester**—Assisted in various studies evaluating salamander species presence and distribution in relation to seasonal temperature and water level fluctuation in wetland units onsite in Asheville, North Carolina. These observations assisted in determining how interactions among species established boundaries geographically. Responsibilities included conducting site visits, locating and collecting salamanders, and performing species identification and length measurements.

**Field Technician; Botanical Gardens**—Conducted a site assessment in the botanical gardens evaluating the soil and vegetation to determine if lead and cadmium were present at a former hospital waste disposal area in Asheville, North Carolina. The study was also conducted to determine which species of vegetation would provide more efficient phytoremediation. Responsibilities included establishing the study area, collecting soil and vegetative samples, conducting proper preparation of the samples, and running the laboratory analyses.

**Professional Services**

**Project Manager; Florida Gas Transmission (FGT)**—Responsibilities include providing engineering support to the Southeast Division-Engineering Department in Maitland, Florida. Assist with various tasks including database construction and management, such as project tracker, anomaly dig tracker and outage tracker, acquiring deliverables from subcontractors and conducting quality control before going into FGT production, researching regulatory requirements and changes. Support is also provided by preparing pipeline construction documents, both in AutoCAD and GIS.

**Water Quality and Monitoring**

**Task Manager; National Pollutant Discharge Elimination System (NPDES) Water Quality Monitoring, Confidential Client**—Conducting surface water quality monitoring at four effluent discharge locations at theme parks in Orange County, Florida. Responsible for monthly and quarterly sampling, data management, and preparation of the Discharge Monitoring Reports for the Florida Department of Environmental Protection (FDEP). Also responsible for the maintenance and calibration of the YSI 600R sondes and ISCO Avalanche sampling equipment.

**Project Scientist, Site Assessment and Closure Permit Compliance Tasks, Alcoa**—Responsibilities include conducting groundwater and surface water sampling per the silica solids settling ponds closure plan for the facility in Polk County, Florida. Conducted groundwater and surface water sampling in accordance with the consent order for one lined solid waste unit and two unlined solid capped waste units, groundwater and sediment sampling as part of a site assessment in general accordance with Rule 62-780, and tri-weekly surface water sampling at an onsite lined pond to determine quality is within compliance prior to discharge to adjacent power company.

**Task Manager; Water Quality Monitoring; Post, Buckley, Schuh, & Jernigan, Inc. (PBS&J)**—Completed composite sampling on five tributaries to Lake Jesup in Seminole County, Florida, involving setting up automated ISCO samplers, maintenance, sample collection, and quality control oversight. The monitoring stations measure precipitation, velocity, and flow, and are equipped with telemetry to notify technicians when a sample event occurs. These stations are equipped to take a composite sample every hour, over the course of 40 hours after a rain event of at least 0.2 inch of precipitation.

**Project Scientist; NPDES Permit; Confidential Client**—Responsibilities include overseeing parameter collection at stormwater discharge locations in Orange County, Florida, on a weekly basis, overseeing monthly stormwater sampling, and overseeing quarterly groundwater sampling to ensure the client remains in compliance with NPDES permit regulations.

**Project Scientist; Trace Lead Sampling, Brevard County**—Responsible for overseeing the installation of temporary monitoring wells at various locations throughout Brevard County, Florida. In addition, experience was gained performing trace sampling utilizing the “clean hands-dirty hands” method.

**Project Manager; Groundwater Discharge Monitoring Program; Confidential Client**—Responsibilities included managing all field work and conducting bi-weekly groundwater monitoring during the new salt water reef pool construction in Orange County, Florida. Once analytical data were acquired, a detailed analysis was provided to client and advised on salt plume migration.

**Contamination Assessment and Remediation**

**Project Manager; Source Removal and Remediation, Confidential Client**—Responsibilities included overseeing the preparation and execution of a Level 1 remedial action plan to conduct a source removal in Orange County, Florida. Responsibilities also included field operations management and personnel management while maintaining regulatory compliance during the removal of 300 tons of contaminated soil located adjacent to 12,000-volt underground high-voltage lines.

**Field Operations Manager; Source Removal, FDEP Preapproval Program**—Responsibilities included coordinating with all subcontractors and Volusia County Environmental Management and Volusia County Fleet Management. Oversaw the pre-excavation, excavation, and post-excavation activities through the final county and FDEP inspections.

**Field Operations Manager; Site Assessment, Volusia County**—Responsibilities included coordinating and overseeing all field work for ongoing assessment efforts at a petroleum-contaminated site with a plume measuring one city square block to a depth of 200 feet below land surface. Primary responsibilities included site management of multiple certified drilling companies installing multiple soil borings; and conducting soil classification, soil screening, and monitoring well installation while coordinating personnel. All efforts were coordinated with Volusia County Environmental Management and the City of DeLand. In conjunction with assessment activities, oversight was conducted to install 42 pilot test wells in preparation for pilot tests and subsequent remediation.

**Project Scientist; Oversight of Underground Storage Tank (UST) Closures, Numerous Clients**—Responsibilities included providing oversight during the removal and closure of USTs ranging from 500- to 12,000-gallon tanks at multiple locations throughout Florida. Also responsible for directing subcontractors during the excavation and removal activities, defining the extent of soil and groundwater contamination.

**Project Scientist; Phase I/II Environmental Site Assessment (ESA), Brevard County**—Conducted a Phase I ESA in accordance with ASTM standards on a vacant 80-acre

property in Melbourne, Florida. Managed the soil and groundwater sampling conducted to investigate the conditions identified in the Phase I ESA. Following the Phase I, conducted oversight of source removal activities and soil screening for confirmation.

**Project Scientist; Contamination Assessment, Volusia County**—Responsible for managing site activities at Volusia County Road and Bridge facility located in Osteen, Florida, for contamination assessment with oversight of monitoring well installation, soil sampling; soil lithologic borings, and soil screening organic vapor analyzer (OVA).

**Project Scientist; Remediation Systems, Numerous Clients**—Responsibilities included operation and maintenance (O&M) of air sparge and vapor extraction systems, free product gauging and extraction, performed 24-hour episodic events, pilot test field activities for FDEP preapproval program sites, provided oversight of broken spill bucket replacements, and remediation system installation for sites throughout Florida.

**Project Scientist; Spill Prevention, Control, and Countermeasure (SPCC) Plan; Velda Farms**—Assisted in the preparation of a SPCC plan for the Velda Farms facility site in Winter Haven, Florida. Activities conducted as part of the site visit included: secondary containment measurement and determination of storage capacity, confirmation of oil storage containment volume, and visual inspection of applicable oil storage and related process areas.

**Project Scientist; Contamination Assessment, Parcel 8, Daytona Beach International Airport**—Conducted a site assessment involving soil boring using direct push technique, sampling, and OVA screening to further determine the extent of solvent plume. Following the conclusion of assessment, assisted in treatment system installation and monthly O&M.

**Project Scientist; Membrane Interface Probe (MIP) Drilling, Volusia County**—Responsible for overseeing MIP drilling event in attempt to vertically delineate the petroleum contamination in order to further determine the location and extent of the plume at the courthouse station in DeLand, Florida.

**Project Scientist; Groundwater Monitoring and Assessment, Confidential Client**—Responsibilities included the oversight of temporary piezometer installation to monitor and assess groundwater flow and the influence imposed by canal onsite at a Class III landfill in Orange County, Florida. In addition, two monitoring wells were installed. Soil lithology was assessed during installation of both the piezometers and monitoring wells.

**Project Scientist; Contamination Assessment, FDEP Preapproval Program**—Responsibilities included oversight of soil borings, soil lithology, screen point sampling at the Orange County Fire Station #66 in Orlando, Florida. Confirmatory soil samples were collected for laboratory analysis.

**Project Scientist; Contamination Assessment and Remedial Action Planning and Implementation, Gas Regulating Station, Confidential Client**—Project work included operation and maintenance of the air sparging and soil vapor extraction remedial system for site conditions resulting from discharges of gas condensate. Quarterly groundwater monitoring was also conducted. Once gas condensate constituents of concern were below state cleanup standards, monitoring well abandonment and system decommissioning was conducted.

**Project Scientist; Multiple Phase I ESAs, Brevard County**—Responsible for performing American Society for Testing and Materials Phase I for the acquisition of residential properties in Melbourne, Florida. Conducted review of historical records, such as aerial photographs, city directories, fire insurance maps, and property appraiser information. Conducted interviews, regulatory database reviews, and onsite inspections; documented all findings in report.

**JEFFREY J. PETERS, P.G.**  
**Principal Scientist**

**Education**

B.S., Earth Sciences (Geology)—Central Michigan University, 1984  
MBA, Business—University of Central Florida, 2008

**Registrations**

Professional Geologist, Kentucky, No. 951  
Professional Geologist, North Carolina, No. 2397  
Professional Geologist, Tennessee, No. 3197  
Professional Geologist, Pennsylvania, No. 355  
OSHA HAZWOPER 40-hour and 8-hour refresher training  
Respiratory protection  
First Aid/CPR Certified

**Contract Manager; City of Orlando Brownfield Assessment Grant**—Provided project management and technical oversight for all aspects of this EPA \$400,000 Petroleum and Hazardous Substances grant including programmatic support, public outreach, Phase I/II environmental site assessments (ESAs), and Analysis of Brownfield Cleanup Alternatives. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

**Contract Manager; Orange County Brownfield Assessment Grant**—Provided project management and technical oversight for all aspects of this EPA \$400,000 Petroleum and Hazardous Substances grant including programmatic support, public outreach, Phase I/II ESAs, and Analysis of Brownfield Cleanup Alternatives. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

**Project Manager, Professional Services Contract, Brevard County, Florida**—Responsible for task orders under the Brevard County Natural Resources Management Office. Projects include groundwater quality investigations to support the County's efforts in improving stormwater management, Phase I ESAs, and other monitoring projects. Work efforts have consisted of monitoring well installation, groundwater sampling for conventional and ultratrace metals parameters, reporting, and well abandonment.

**Contract Manager; Orange County Risk Management and the City of Orlando**—Provide management and technical oversight for all aspects of this continuing services contract including Phase I/II ESAs, site assessments, remedial action activities, natural attenuation monitoring, storage tank system management, interim remedial actions, source removal, and emergency response actions. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

**AREAS OF SPECIALIZATION**

Project Management, Financial Management, Brownfield Redevelopment, Remedial Investigation, Environmental Risk Management, Hazardous Waste Site Investigations, Contamination Assessments, Site Remediation, Hydrogeology, Phase I/II Environmental Site Assessments and Other Due Diligence Investigations, Peer Review, Risk Assessments, Feasibility Studies, Groundwater Supply Development, Environmental Audits, Water Quality

**Contract Manager; City of Eustis Brownfield Assessment Grant**—Provided project management and technical oversight for completion of Phase I/II ESAs, and participated in community outreach activities. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

**Project Manager; Texaco Redimart, Independent Retail Petroleum Facility**—Responsible for the completion of a site assessment at a petroleum retail facility in Orlando, Florida. A remedial action plan (RAP) was approved recommending bio-spargage technology. Construction drawings and bid specifications were completed, and selection of a remedial action construction (RAC) was made to the Florida Department of Environmental Protection (FDEP). After RAC activities are completed, remedial action operation and maintenance (O&M) will be initiated. Site rehabilitation is expected to take 2 years.

**Project Manager, Emergency Response Services, MBM Food Services**—Responsible for coordinating and completing the scheduling and over-sight of vacuum-truck services for a recorded 1,359 gallons of water removed from the stormwater pond in Lakeland, Florida. An absorbent boom was also floated

across the surface of the stormwater pond in an effort to consolidate the floating substance to a central collection point.

**Project Manager; John Young Pump Station, FDEP Preapproval Program**—Conducted site assessment activities in accordance with the low-scored site initiative at a facility in Orange County, Florida, impacted by petroleum products. Performed oversight for the acquisition of a right-of-way permit, completion of soil borings, installation of temporary monitor wells, collection of soil and groundwater samples, organization of data, updating tables, and signing/sealing a site assessment report (SAR).

**Contract Manager; Orange County Risk Management and the City of Orlando**—Provided management and technical oversight for all aspects of this continuing services contract including Phase I/II ESAs, site assessments, remedial action activities, natural attenuation monitoring, storage tank system management, interim remedial actions, source removal, and emergency response actions. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

**Project Manager; Seminole County Environmental Services**—Provided management and technical oversight of projects, budgets, and correspondence regarding Phase I and II ESAs; site assessment/remediation; underground storage tank (UST) and aboveground storage tank (AST) closures; stormwater pollution prevention program and spill prevention, control, and countermeasure (SPCC) plans; water quality sampling; brownfield consulting; and brownfield site rehabilitation agreement (BSRA) coordination.

**Senior Geologist/Project Manager; Atlantic Housing Partners LLC (AHP)**—Participated in the completion of hundreds of Phase I and Phase II ESAs throughout Florida, in addition to site assessment, source removal, and brownfield consulting to AHP on numerous projects.

**Senior Geologist/Project Manager; Environmental Services, Confidential Client**—Conducted environmental services including Interim RAP/reports, site assessment plans/reports, remedial alternative studies, remedial implementation plans, and UST and AST closures at a major tourist attraction in Orange County, Florida. Performed assessment and cleanup activities to satisfy corporate counsel and meet the requirements of Chapter 62-770, Florida Administrative Code (F.A.C.). Remediation technologies for these projects included remediation by bio-augmentation, source removal, and natural attenuation.

**Senior Geologist; Portfolio of Abandoned Gas Stations, Estate of Richard E. Thoni**—Performed assessment and cleanup activities to facilitate sale and redevelopment of former Thoni gasoline stations through Florida. Remediation activities were focused on implementing the most cost-effective methods

while expediting cleanup so that these underutilized properties may be brought back into the market for reuse. Remediation technologies for these projects included remediation by accelerated natural attenuation, source removal, air sparging, and soil vapor extraction.

**Senior Geologist/Project Manager; Lakewood Pointe Brownfield, Lakewood Pointe LLC**—Supported the brownfields designation process by presenting at a neighborhood public meeting and representing the owner at the City Commission meeting. Lakewood Pointe is an historic solid waste disposal area that has been redeveloped for affordable housing in Seffner, Florida. A SAR and RAP were completed to address petroleum and arsenic impacted soil and groundwater. A Directors Authorization was obtained from Hillsborough County Environmental Protection Commission so that site development could occur. A landfill gas monitoring system was installed concurrently with construction. Engineering and Institutional Controls were implemented to allow for the redevelopment while maintaining residential safeguards and the protection of ecologically sensitive lands.

**Senior Geologist/Project Manager; Hughes Supply Brownfield, HD Supply**—Worked closely with HD Supply, the City of Jacksonville, and the FDEP in preparing the BSRA for this industrial redevelopment and brownfield project in Jacksonville, Florida. Primary author of the RAP and RAP addendum which consisted of an innovative technological blend of chemical oxidation, landfarming, and soil vapor extraction to remediate the chlorinated solvent impacts at this property. Chemical injection, excavation, and permeable reactive barriers are currently designed for implementation in 2012.

**Senior Geologist/Project Manager; Towne Park Brownfield, Winter Springs, FL**—Completed a SAR and source removal plan in a limited time to address arsenic soil impacts associated with a former railroad spur that transects an age-restricted affordable housing project located in Seminole County, Florida.

**Senior Geologist/Project Manager; Donnelly Cove, Atlantic Housing Partners, LLLP**—Provided oversight of the completion of a Phase I ESA in accordance with American Society for Testing and Materials (ASTM) Standard 1527-05 criteria for the proposed Donnelly Cove residential development in Mt. Dora, Florida, consisting of several individual parcels totaling  $\pm$  37.25 acres. The majority of the site was fallow citrus groves. A Phase II ESA was recommended for soil and groundwater sampling. One temporary monitoring well was installed on the west side (based on topographic relief) of the lake using a stainless steel hand auger. All tested parameters were below Florida groundwater concentration target levels and no additional assessment activities were recommended.

**Project Manager; CR 466A Road Widening, Lake County Public Works**—Completed Phase I ESA in Fruitland Park,

Florida, in accordance with ASTM Standard E1527-05. Debris piles of concrete, asphalt, scrap wood, PVC pipe, cinder block, limestone rock, and scrap metal were identified as a recognized environmental concern during the Phase I ESA. Due to the unknown source or nature of the debris, a Phase II ESA was recommended to identify the contents of the debris piles. The Phase II was completed in general accordance with the ASTM Standard E 1903-97. Hand-augured soil borings were completed, and soil samples were collected to record site-specific lithology and field screened for the presence of organic vapors using an organic vapor analyzer with flame ionization detector (OVA/FID) instrument.

**Senior Geologist/Project Manager; Lake May Property, Lake County Public Lands**—Coordinated several subcontractors and professional staff to meet a property closing deadline on the Lake May property in Eustis, Florida. During completion of a Phase I ESA, an irrigation pumping station was observed onsite with what appeared to be petroleum-stained soils near the engine block. Phase II soil sampling confirmed soil contamination was present but groundwater contamination was not. Source removal activities consisted of excavation and disposal of 29 tons of petroleum-impacted soils. No Further Action (NFA) was recommended and the property transaction proceeded as scheduled. Total timeframe from initiation of Phase I activities through source removal was approximately 7 weeks.

**Senior Geologist/Project Manager; DJ's Auto, DeBary, Florida**—Developed a Limited Scope Remedial Action Plan (LSRAP) that was approved for implementation by Volusia County Environmental Management (VCEM) using a combination of chemical oxidation/bio-augmentation, DJ's Auto is participating in the Abandoned Tank Restoration Program (ATRP) program and is eligible for funding through FDEP's Petroleum Preapproval Program. During the technology evaluation state, excavation was originally pursued as the primary methodology for remediation. However, given the close proximity to the onsite concrete block building, and the need to install sheet-piling to remove the petroleum-impacted soils to a depth of 17 feet bls, it was concluded that the vibrations from sheet-pile installation would probably cause stress cracks (at a minimum) to the concrete buildings walls and/or slab. Therefore, the remedial approach was re-evaluated to include a less intrusive approach consisting of chemical oxidation followed by bio-augmentation. Working with the vendor, a performance-based contractual mechanism was constructed to verify effectiveness and hydrocarbon mass reduction.

**Project Manager; Former Speedway #6573, Speedway SuperAmerica LLC**—Managed site rehabilitation activities that included site assessment, preparation of a RAP, remedial action implementation consisting of air sparging and vacuum extraction (AS/VE), post-active remedial monitoring (PARM), and ultimately a site rehabilitation completion order (SRCO) at the Former Speedway #6573 petroleum retail facility in Brooksville, Florida. The RAP was submitted to the FDEP for

the installation and operation of an AS/VE remedial system, which operated for a period of approximately 1 year. Efficiencies in equipment design, equipment enclosure, and AS/VE well placement allowed the equipment to achieve a 95 percent run time and the site to reach PARM status in less than 1 year. The system was “moth-balled” but remained onsite in case contaminant rebound occurred. PARM activities continued at the site until the SRCO was issued by the FDEP.

**Project Manager; Removal and Closure of UST, Confidential Client**—Provided oversight during the removal and closure of an UST at a tourist attraction in Orange County, Florida, by a Pollutant Storage Systems Specialty Contractor. A tank closure assessment report (TCAR) was prepared that included tabulated soil and groundwater analytical data, disposal manifests for the removed USTs, laboratory analytical reports, and a copy of the Discharge Reporting Form (DRF). The TCAR was submitted to Orange County Environmental Protection Department (OCEPD) within the reporting requirements timelines established in F.A.C. 62-761.800(3)(d).

**Project Manager; SPCC Plans, Enterprise Rent-a-Car**—Completed SPCC plans for two rental car facilities in Orlando, Florida, as outlined in applicable federal regulations (40 CFR 112). Activities completed included a site reconnaissance of the subject facilities; interviews with the environmental manager and/or maintenance engineer familiar with the tank systems and other oil storage systems at each of the areas of concern; review records of previous spills; evaluation of topography and surface water flow regimes; evaluation of environmentally sensitive areas and potential receptors if a spill were to occur; evaluation of potential spill sources; development of spill response measures; development of a list of emergency response personnel; and a review of available as-built drawings, surveys, and plans related to the structures and drainage pathways. Each SPCC plan was certified by a professional engineer.

**Project Manager; O&M Activities, Solutions-IES**—Monthly O&M activities were conducted at the decommissioned Naval Training Center facility in Orlando, Florida. A pump & treat remediation system was operated in an effort to keep TCE-contaminated groundwater from reaching Lake Druid. The TCE contamination is a product of poor housekeeping practices associated with a former laundry/dry cleaning establishment located at the base for approximately 40 years. Responsible for data management, contracting, change orders, scheduling, and invoicing.

**Senior Geologist/Project Manager; Former Cumberland Farms 0090, Casselberry, FL**—Performed forensic site investigation activities regarding commingled plumes at this former petroleum retail facility. Working with Seminole County Engineering Department, reviewed third-party data that was integral to designing a drilling and sampling program to better assist in the determination of separate contamination sources. After discrete drilling and sampling protocol was developed, the information was obtained and shared with the FDEP Central

district for the assignment of cleanup responsibility and cost-sharing percentages.

**Project Manager; Compliance Inspections, Seminole County Board of County Commissioners**—Managed this contract for AST and UST compliance inspections within Seminole County. Inspections were performed monthly to ensure facilities were in compliance with Chapters 62-761 and 62-762, F.A.C.. Inspections logs were then sent to the Contract Administrator at Seminole County with any notes or deficiencies noted and recommendations to correct the deficiencies.

**Senior Geologist/Project Manager; Wayne's World BP, Independent Retail Petroleum Facility**—Secured \$50,000 in funding from the FDEP to complete source removal activities during UST construction upgrades at an independent petroleum retail facility in Orlando, Florida. Duties included the supervision and oversight of all subcontractors, soil removal, disposal, dewatering, NPDES permitting/sampling, reporting, and invoicing.

**Senior Geologist/Project Manager; Former Auto World, Seminole County Board of County Commissioners**—Provided oversight of the completion of supplemental site assessment and remedial activities in Sanford, Florida, that included the excavation and disposal of approximately 65 tons of used-oil impacted soils, abandonment of a potable water well, removal of three hydraulic lifts and the associated with closure assessment report, the removal of two septic tanks, and the production of a natural attenuation monitoring plan.

**Senior Geologist/Project Manager; Newalls Station, Independent Property Owner**—Provided oversight of the completion of supplemental site assessment and remedial activities that included the installation of several shallow groundwater monitoring wells—several that were installed within a Florida Department of Transportation right-of-way in Altamonte Springs, Florida. Pilot testing activities included the installation of one multi-phase extraction well and one air-sparging well, and the completion of a pilot test for remedial design purposes.

**Senior Geologist/Project Manager; Orange & Gore Chevron, Independent Retail Petroleum Facility**—Conducted oversight of the completion of site assessment activities in Orlando, Florida, that included the installation of several soil borings, groundwater monitoring wells (both shallow and deep), aquifer testing, and obtaining offsite access.

**Senior Geologist; Project Manager; Former Isuzu, Independent Property Owner**—Provided oversight of the completion of source removal activities in Orlando, Florida, that included exploratory trenching, the installation of several free-product/vapor extraction horizontal wells, and several multi-phase extraction events using a vacuum truck. Remedial efforts are continuing through the FDEP's Petroleum Preapproval Program under the direction of OCEPD.

**Senior Geologist/Project Manager; Former Umatilla Landfill, Lake County Department of Solid Waste**—Worked with State of Florida and Lake County personnel to design a sampling program to delineate a contaminant plume emanating from a closed landfill in Umatilla, Florida. Responsible for budgets, assignment of resources and client management

**Senior Geologist; EPA Consent Site, John's Auto Parts**—Responsible for conducting contamination assessment activities at an operational junkyard and used auto parts facility in Bunnell, Florida. Contaminants include heavy solvents, metals, PCBs, and volatile organic compounds. Responsibilities included preparing work plans, managing field investigation activities, evaluating data and preparing assessment reports, and negotiating with federal, state and local regulatory officials for assessment and future closure of the facilities.

**Senior Geologist/Project Manager; Former Ridge Bombing Range**—Completed debris removal operations under short timeframe and adverse physical and weather conditions in order to facilitate a lease of the property. Approximately 800 tons of household debris was removed from the site within one week. Operations included the coordination of subcontractors, document control, client communication, and resident liaison during the debris removal activities.

**Senior Geologist; Markham Woods Aquifer Storage and Recovery (ASR) Well, Seminole County Public Works**—Assisted a team of engineers, geologists, and scientist assisting with the development of an ASR well system in Lake Mary, Florida. The ASR well system provides Seminole County cost-effective alternatives to storing and using potable water during times of surplus and demand. Specific duties included the development of the water quality testing program during project development. This program consists of pre-cycle, baseline testing, source water, and a minimum of four separate cycle tests.
