1.0 SUMMARY

ECT has completed a Phase I Environmental Site Assessment (ESA) for two parcels located at the northwest corner of the intersection of West Central Boulevard and Parramore Avenue. These two parcels have the following addresses: 709 and 717 West Central Boulevard, Orlando, Orange County, Florida 32801. Collectively, these two parcels comprise the Site. This Phase I ESA was conducted in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E1527-13 for Phase I ESAs. Deviations or data gaps from this Practice are described in Section 11 of this report.

The Phase I ESA investigation has revealed evidence of one REC associated with the Site:

The City Directory from 1967 identified ROTH'S SMALL ENGINE COMPANY REPAIR SHOP at the Site. There were no documented discharges or compliance violations associated with this facility, however, past waste disposal practices or undocumented discharges could have occurred, with no regulatory record. A Phase II ESA completed at the Site in 2003 could not be validated by ECT since no site maps/sample locations were provided and, at the time of the Phase II ESA, a building was present at the Site thereby limiting access to soil and groundwater. For this reason, ROTH'S SMALL ENGINE COMPANY REPAIR SHOP is considered a potential concern and a REC for the Site.

2.0 INTRODUCTION

ECT has conducted a Phase I ESA for two parcels located at the northwest corner of the intersection of West Central Boulevard and Parramore Avenue. These two parcels have the following addresses: 709 and 717 West Central Boulevard, Orlando, Orange County, Florida 32801. Collectively, these two parcels constitute the Site. The two parcels are vacant, developed land. A Site Location Map is provided as **Figure 1**. A USGS Topographic Map, 1997, West Orlando, which includes the Site and the surrounding area, is provided as **Figure 2**. An aerial photograph, circa 2012, depicting the Site is also provided as **Figure 3**.

2.1 Purpose

Mr. Dan Dashtaki with the City of Orlando authorized ECT to conduct a Phase I ESA of the Site to evaluate the presence/absence of RECs in anticipation of future redevelopment activities. The City of Orlando is the recipient of a Brownfields Assessment Grant, EPA Cooperative Agreement BF-95498212. This grant was awarded in September 2012, and is a community-wide assessment grant, with emphasis on the Parramore area, specifically targeting redevelopment areas.

The objective of the Phase I ESA was to identify RECs in connection with the Site, to the extent feasible pursuant to the processes prescribed in the ASTM E-1527-13 guidelines. The term "*REC*" as defined by ASTM is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of a release of any hazardous substances or

petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This Phase I ESA includes information gathered from federal, state, and local agencies; personal interviews with people familiar with the Site and surrounding properties; a Site visit was conducted by American Environmental Consulting (AEC) on December 5, 2013. This report is intended to meet the due diligence requirements of ASTM E 1527-13.

2.2 Detailed Scope of Services

The Phase I ESA conducted by ECT included, but was not limited to, the following services:

- Review of the public record;
- Site reconnaissance to identify visual signs of environmental conditions on or adjoining the Site, and to evaluate evidence found in the review of public records that might be indicative of activities resulting in hazardous substances or petroleum products being used or deposited in the Site;
- Interviews with local officials or individuals knowledgeable about the Site;
- Preparation of a written report documenting our findings, opinions, and conclusions.

2.3 Significant Assumptions

This Phase I ESA was prepared using information obtained from and/or provided by the following sources:

- Visual observations of the Site;
- Available published information;
- Third-party database searches, and;
- Local/State government officials and/or records.

It is assumed that the information obtained through the above methods is valid and accurate as provided. The passage of time, manifestation of latent conditions, and occurrence of future events or changes to existing codes/regulations may alter the conclusions and recommendations of this report.

2.4 Limitations and Exceptions

The opinions presented in this report are based upon the scope of services, information obtained through the performance of the services, and the schedule as agreed upon by ECT and the party for whom this report was originally prepared. This report is an instrument of professional service and was prepared in accordance with the generally accepted standards and level of skill and care under similar conditions and circumstances established by the

environmental consulting industry. No representation, warranty, or guarantee, expressed or implied, is intended or given. To the extent that ECT relied upon information prepared by other parties not under contract to ECT, ECT makes no representation as to the accuracy or completeness of such information. This report is expressly for the sole and exclusive use of the party for whom this report was originally prepared, and for a particular purpose. Only the party for whom this report was originally prepared and/or other specifically named parties have the right to make use of and rely upon this report. Reuse of this report or any portion thereof for other than its intended purpose, or if modified, or if used by third parties, shall be at the user's sole risk.

The findings presented in this report apply solely to the Site conditions existing at the time when ECT's assessment was performed. It must be recognized, however, that an ESA is intended for the purpose of determining the potential for contamination through limited research and investigative activities and in no way represents a conclusive or complete site characterization. Conditions in other parts of the Site may vary from those at the locations where data were collected. ECT's ability to interpret investigation results is related to the availability of the data and the extent of the investigation activities. ECT does not provide any guarantees, certifications, or warranties that a property is free from environmental contamination. Furthermore, nothing contained in this document shall relieve any other party of its responsibility to abide by contract documents and applicable laws, codes, regulations, or standards.

2.5 Special Terms and Conditions

The scope of work for this Phase I ESA did not include testing of electrical equipment for the potential presence of PCBs or the assessment of natural hazards such as naturally occurring asbestos or methane gas, assessment of the potential presence of radionuclides, or assessment of non-chemical hazards such as the potential for damage from earthquakes or floods. This Phase I ESA also did not include an extensive assessment of the environmental compliance status of the Site or of the businesses operating onsite, or a health-based risk assessment.

2.6 User Reliance

This Phase I ESA was conducted for the use and reliance of the City of Orlando. No use of the information contained in this report by others is permissible without receiving prior written authorization to do so from ECT. ECT is not responsible for independent conclusions, opinions, or recommendations made by others or otherwise based on the findings presented in this report.

3.0 SITE DESCRIPTION

This section presents a general overview of the Site, onsite improvements, and surrounding properties.

3.1 Location and Legal Description

The Site consists of two separate parcels located at the northwest corner of the intersection of West Central Boulevard and Parramore Avenue, within Section 26 of Township 22 South, and Range 29 East in Orlando, Orange County, Florida.

The Orange County Property Appraiser's Office information identifies the Site under the following parcel identification numbers, address, names, and legal descriptions:

- 26-22-29-7240-00-031; 709 West Central Boulevard; POYNTZ & PARRAMORE MISC 4/195 THE S 150 FT OF LOT 3
- 26-22-29-7240-00-021; 717 West Central Boulevard; POYNTZ & PARRAMORE MISC 4/195 THE S 150 FT OF LOT 2

A copy of the Orange County Property Appraiser's information is included as **Appendix A**.

3.2 Site and Vicinity General Characteristics

The Site consists of two adjoining parcels totaling approximately 0.62 acres. The Site is bound by commercial properties to the north and west, West Central Boulevard to the south, and Parramore Avenue to the east.

3.3 Current Use of the Property

The Site is developed but vacant.

3.4 Descriptions of Structures, Roads, and Other Improvements on the Site

3.4.1 General Description of Structures

There are currently no structures on the Site.

3.4.2 Roads

No roads are present within the Site. The Site is bound to the south by West Central Boulevard and to the east by Parramore Avenue.

3.4.3 Potable Water Supply

Potable water is provided by the Orlando Utilities Commission.

3.4.4 Sewage Disposal System

Sewage disposal is provided by the Orlando Utilities Commission.

3.5 Current Uses of the Adjoining Properties

The current use of the adjoining properties is generally commercial. The adjoining property to the north is a Central Auto Parts store. The adjoining property to the west of the Site is another auto parts facility. The adjoining property to the south across West Central Boulevard is the City of Orlando Fire Station #2, and the adjoining property to the east across Parramore Avenue is commercial property.

4.0 USER-PROVIDED INFORMATION

User and Owner questionnaires were completed by Ms. Laurie Botts with the City of Orlando (Client) on December 9, 2013. Copies are provided in **Appendix A**.

4.1 Title Records

A review of title records was not included in the scope of work for this Phase I ESA.

4.2 Environmental Liens or Activity and Use Limitations

The Client did not provide ECT with copies of the deed or chain-of-title. Therefore, ECT has no knowledge of environmental liens or use limitations associated with the Site.

4.3 Specialized Knowledge

The Client provided ECT with a February 2003 Phase II Environmental Site Assessment (ESA) prepared by Universal Engineering (Universal) for a property identified as 710 West Central Boulevard. The report was prepared for Bello Invesco, LLC and Health Care of the Homeless (prior owners of the Site). The purpose of the Phase II ESA was to identify possible petroleum product and chlorinated solvent impacts at the property from former USTs located at the adjoining properties to the north (former Shawn Austin filling station) and south (Orlando Fire Department Station No. 2) and automotive repair activities at the property. While the address (710 West Central Boulevard) of the property does not correspond with the addresses associated with the Site, the description of the property location suggests that the Phase II ESA was completed at the Site. At the time of the Phase II ESA, a two-story building was present at the Site. As described in the Phase II ESA report, three (3) soil samples were collected along the northern property boundary and five (5) soil samples were collected on the north and west sides of the onsite building. Soil samples were screened for volatile organic vapors using an OVA-PID and one (1) soil sample was sent to a laboratory for analytical determination of solvents and petroleum constituents (EPA Method 8021, EPA Method 8100, and FL PRO). Five (5) shallow groundwater samples were also collected via direct-push and sent to a laboratory for analytical determination of solvents and petroleum constituents by the same methodology. No contaminants were reported in the soil and groundwater samples and Universal concluded that no impacts were present and no further assessment was recommended. It should be noted that ECT was not provided with the Site Plan (or any other attachments) associated with the Phase II ESA and, therefore, cannot verify the actual locations of the sample points described in the Phase II ESA.

4.4 Commonly Known or Reasonably Ascertainable Information

Both of the parcels on the Site are developed, but vacant and contain no structures. Reasonably ascertainable information included reports obtained from the Orange County Property's Appraises website.

4.5 Valuation Reduction for Environmental Issues

The Client indicated that the purchase price of the Site reasonably reflected fair market value for the property.

4.6 Owner, Property Manager, and Occupant Information

The City of Orlando (Client) owns both parcels that comprise the Site. Both parcels are developed and vacant, with no structures on either parcel.

4.7 Reason for Performing Phase I

The reason for performing the Phase I ESA is to evaluate the presence/absence of RECs in anticipation of future sale or redevelopment activities and to provide an update regarding the current status of each parcel to the City of Orlando.

4.8 Other

No additional information was provided by the Client to ECT for the preparation of this Phase I ESA.

5.0 RECORDS REVIEW

The following section presents the results of ECT's historical records review, including aerial photographs, topographic maps, Sanborn maps, and city directories pertaining to the Site, or Target Property (Site).

5.1 Standard Environmental Record Sources

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate. A copy of the EDR Summary Radius Map Report is provided in **Appendix B**.

The environmental records were requested with a center-point of the study area located within the boundaries of the subject property. More detailed information regarding the individual databases searched is included in the Government Records Searched/Data Currency Tracking section of the EDR report. This section of the report also includes information regarding when each database was last updated. The report listed sites of potential concern based on the above search criteria. However, only the sites which appeared to have the potential for environmental impacts to the subject site due to proximity, anticipated direction of groundwater flow and/or potential for migrating contamination are discussed below. Note: distances to potential concerns are from the nearest boundary of the Site.

- DEEDS Orlando and DEEDs Orlando Expanded
Location: Large area of downtown Orlando including the subject site
Concern: Brownfield Area
Summary: The first two listings in the database report identify the Downtown Economic Enhancement District (DEED) brownfield area originally designated in 2004 and expanded in 2007. Inclusion

of the subject site or other properties within this area does not indicate that contamination is present, and is simply a legal designation to allow access to certain economic incentives related to the State and Federal Brownfields Programs. These area wide designations are not considered potential concerns for the Site.

5.2 Additional Environmental Record Sources

The following additional or proprietary record sources were also searched and reviewed.

5.2.1 Historical Topographic Maps

EDR's Historical Topographic Map Report is designed to assist in evaluating potential liability on a Site resulting from past activities. EDR's Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s. Historical topographic maps were produced and reviewed from 1956 through 1995. Results of the topographic map review are discussed in Section 5.3.

5.2.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were produced since the late 1800's to provide information relative to fire hazards on insurable property. These maps often indicate locations of underground and aboveground gasoline tanks, storage facilities for flammable chemicals, such as dry cleaners, paint shops, maintenance and garage facilities, as well as historical information on occupants of buildings, unavailable through other sources. Production of these maps typically was limited to the immediate vicinity of downtown urban areas. EDR purchased the Sanborn Company and has access to all available Sanborn maps. EDR performed a search of its archive and indicated that Sanborn maps were produced for the vicinity of the Site in various years from 1913 to 1973. Findings of the map reviews are discussed in Section 5.4.

5.2.3 Historical City Directory Review

R.L. Polk directories and/or Hill-Donnelly Cross Reference directories are referenced for study areas which help identify changes in land use based on the type of businesses that occupied the subject site and surrounding area. The type of business, such as automotive, dry cleaning, gasoline/service stations, etc. are indicative of the possible presence of hazardous substances or petroleum products. Addresses within the general vicinity of the Site first appeared in available historical directories in 1922. Results of the directory search are discussed in Sections 5.4.

5.3 Physical Setting Source(s)

Physical sources that provide such information such as geological, hydrologic, or topographic characteristics were reviewed for potential migration pathways onto the Site. The Site has an approximate elevation of 109 feet National Geodetic Vertical Datum (NGVD) and the surrounding properties are typically at the same elevation or slightly lower to the north and east and slightly higher the south and west than the subject Site.

5.4 Historical Use Information on the Property

To evaluate historical use of the Site, ECT reviewed readily available aerial photographs, city directories, and fire insurance maps.

5.4.1 Topographic Maps

Historical USGS topographic maps of the Site and surrounding area were obtained and reviewed from EDR for years 1956, 1970, 1980, and 1995. As shown on **Figure 2**, the USGS Topographic Map, 1998, Orlando West Quad 3712, the surrounding area is generally flat at a National Geodetic Vertical Datum (NGVD) of 109 ft. Topographic elevations have been relatively consistent with the historic topographic maps. A brief review of the topographic maps for the Site is provided below:

1956 – 1995 – No significant changes to the Site were identified in the Topographic Maps reviewed.

5.4.2 Aerial Photographs

Aerial photographs were obtained and reviewed from EDR for years 1947, 1952, 1964, 1969, 1974, 1978, 1984, 1994, 1997, 1999, 2005, 2006, 2007, and 2010. The EDR Aerial Photograph Decade Package is provided in **Appendix C**. The most current 2012 aerial map, **Figure 3**, was also reviewed for activities on the Site. A brief synopsis of activities derived from the aerial photographs for the Site is provided below:

1947 – 2006 - The Site appears to contain residential dwellings and/or commercial buildings.

2007 – 2010 – The Site appears vacant.

5.4.3 Directories

A review of the city directories provided by EDR was conducted as a part of this Phase I ESA. The directory information did not indicate past businesses or activities on the Site that would be considered suspect or warrant additional records review except for the following: “Roth’s Small Engine Company Repair Shop” was located at 703 West Central Boulevard in 1967. A copy of the EDR-City Directory Abstract is provided in **Appendix C**.

5.4.4 Fire Insurance Maps

Fire Insurance Maps (Sanborn Maps) were obtained and reviewed from EDR for years 1913, 1919, 1925, 1950, 1956, 1965, and 1973. The Sanborn Maps are provided in **Appendix C**. A brief synopsis of activities derived from the Sanborn Maps for the Site is provided below:

1913 – Two (2) two-story, residential dwellings are located at the Site at 701 and 703 West Central Boulevard.

1919 – Similar to 1913.

1925 – The two (2) residential dwellings remain and small garages are present at both home sites.

1950 – Commercial buildings have replaced the residential dwelling in the southeast portion of the Site and are identified by addresses 701, 703 and 705 West Central Boulevard. The second residential dwelling in the western portion of the Site is an apartment building at 711 West Central Boulevard.

1956 – Similar to 1950.

1965 – Similar to 1956.

1973 – Similar to 1965.

5.5 Historical Use Information on Adjoining Properties

To evaluate historical use of the adjoining properties, ECT reviewed readily available topographic maps, aerial photographs, Orange County Property Appraiser's information, and fire insurance maps.

5.5.1 Topographic Maps

Historical USGS topographic maps of the Site and surrounding area were obtained and reviewed from EDR for years 1956, 1970, 1980, and 1995. A brief review of the topographic maps for the Site is provided below:

1956 – 1995 – No significant changes to the adjoining properties were identified in the Topographic Maps

5.5.2 Aerial Photographs

Aerial photographs were obtained and reviewed from EDR for years 1947, 1952, 1964, 1969, 1974, 1978, 1984, 1994, 1997, 1999, 2005, 2006, 2007, and 2010. A brief synopsis of activities derived from the aerial photographs for the adjoining properties is provided below.

1947 – 2012 – Aerial photography of the area surrounding the Site is representative of the development described by the City Directories and Fire Insurance Maps below.

5.5.3 Directories

A review of the city directories indicated that the property directly north of the Site at 16/18 North Parramore Avenue had the following uses:

1933 – Bells Square Deal Garage repairs and Muzement Machine Company

1939, 1944 & 1948 – Shaw Austin filling station/service station

1957 – Dixie Motor Exchange auto repairs

1962 – 2013 – various auto parts stores

None of the other adjoining parcels indicated past businesses or activities that would be considered suspect or warrant additional records review.

5.5.4 Fire Insurance Maps

Sanborn Maps were obtained and reviewed from EDR for years 1913, 1919, 1925, 1950, 1956, 1965, and 1973. A brief synopsis of activities derived from the Sanborn Maps for the adjoining properties is provided below:

1913 – Residential dwellings and vacant property primarily exist on the adjoining properties. A printing shop is located adjacent to the north of the Site and an auto shop is located on the east side of Parramore Avenue.

1919 – Similar to 1913, however the print shop to the north of the Site is now labeled “Shed”.

1925 – Fire Department Station No. 2 is located south of the Site at 702 West Central Boulevard. In addition, a hatchery is present to the north of the Site where the former shed was located.

1950 – An auto repair facility is located north of the Site at 16 North Parramore Avenue. Additional development of commercial buildings is present on the east side of North Parramore Avenue including a “Chemical Compounding Lab” located at 13/15 North Parramore Avenue.

1956 – Similar to 1950 though the facility at 15 North Parramore Avenue is now labeled as a store.

1965 – An Auto Supplies & Lubricants facility has been developed to the west of the Site. The auto facility to the north of the Site has an expanded footprint toward the west.

1973 – Fire Department Station No. 2 has been expanded to the south of the Site.

6.0 SITE RECONNAISSANCE

On December 5, 2013, representatives of AEC performed a site reconnaissance to observe general site conditions and to identify visible evidence of RECs. The property was vacant at the time of the inspection. Select photographs taken on the property during site inspection/reconnaissance are provided in **Appendix D**.

6.1 Methodology and Limiting Conditions

The methodology for the site reconnaissance included traversing the Site in a grid pattern while observing the ground surface of the property. A Site Reconnaissance Checklist documenting the Site and adjoining properties was completed and is provided in **Appendix D**.

6.2 General Site Setting

6.2.1 Current Use(s) of the Property

The current use of the Site is vacant commercial.

6.2.2 Past Use(s) of the Property

The Site was developed as early as 1913, according to the Sanborn Maps. Past uses of the parcels appear to be for residential purposes from 1913 through at least 1925. In 1950, commercial stores were developed in the southeast portion of the Site. The Property has been vacant since at least 2007.

6.2.3 Current Uses of Adjoining Properties

The Site is located in a developed area of Parramore. The City of Orlando's Fire Department Station No. 2 is located south of the Site across West Central Boulevard adjacent to which is a City park. Commercial sites are located to the north, east and west of the Site.

6.2.4 Past Uses of Adjoining Properties

Past uses of the adjoining parcels have been both commercial and residential.

6.2.5 Current or Past Uses in the Surrounding Area

Current and past uses in the surrounding area are a mix of commercial, residential, and public facilities.

6.2.6 Geologic, Hydrogeologic, and Hydrologic Conditions

According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Soil Survey of Orange County, Florida (1989), Millhopper fine sands underlie the area surrounding the Site. Below is a brief description of this soil type:

Millhopper fine sand: This soil type is nearly level to gently sloping and moderately well drained and is found on low ridges and knolls on the uplands and on the flatwoods. The slopes are nearly smooth to slightly convex. A seasonal high water table in Tavares soil is at a depth of 40 to 72 inches for more than 6 months, and it recedes to a depth of more than 80 inches during extended dry periods. A seasonal high water table in Millhopper soil is at a depth of 40 to 60 inches for 1 to 4 months, and it recedes to a depth of 60 to 72 inches for 2 to 4 months. During periods of high rainfall, the water table is at a depth of 30 to 40 inches for cumulative periods of 1 to 3 weeks. The permeability of Tavares soil is very rapid. The permeability of Millhopper soil is rapid in the surface and subsurface layers and moderately rapid of moderate in the subsoil. The available water capacity of Tavares soil is very low. The available water capacity of Millhopper soil is low in the surface and subsurface layers and medium in the subsoil. Natural fertility is very low in Tavares soil and low in Millhopper soil. Organic matter content is very low in Tavares soil and low or moderately low in Millhopper soil. In most areas, the soils in this map unit are used for citrus crops and/or for homesite development.

ECT personnel also reviewed the soil survey of Orange County, dated 1957 (issued 1960). According to the Soil Survey, Orange County is underlain by marine deposited beds of sand, silt, clay, limestone, dolomite, and shale to about 6,500 feet below land surface (bls). The uppermost unit is Pleistocene to Recent in age and generally composed of unconsolidated, very fine to medium-grained quartz sand with some clays. The Pleistocene and Recent age sediments are underlain by the Hawthorn Group of Miocene age (about 25 million years old). In general, the Hawthorn Group is highly variable and diverse, including inter-bedded and inter-fingered sand, clayey sand, sandy-clayey phosphatic sediments, dolomite, and limestone. The Miocene age sediments are underlain by a thick sequence of late Eocene age limestone formations known as the Ocala Group. It is described as gray clay and gravel to white, soft limestone. The Ocala Group Limestone is

underlain by the Avon Park Limestone, which is also of Eocene age. This formation is composed of similar materials, but distinguished from overlying units by the occurrence of sand-sized, cone-shaped foraminifera. The formation is usually tan in color, but can range from chalky white to light brown or ashen gray. The Lake City Limestone of middle Eocene age underlies the Avon Park Limestone. It is similar in lithology and water-bearing properties to the Avon Park Limestone and makes up the bottom portion of the Floridan aquifer.

According to the Soil Survey, ground water occurs in both artesian and non-artesian conditions in the Orange County. The non-artesian aquifer is composed mainly of sand and shell with varying amounts of clay and provides limited amounts of water. Water from this aquifer is used mainly for livestock and limited domestic use. Water quality in this aquifer varies depending on the chemical composition of the aquifer and the content of the calcium carbonate in the area. The secondary artesian aquifer and the Floridan Aquifer are the two types of artesian aquifers in Orange County. The secondary artesian aquifer generally yields less water than the Floridan Aquifer, but yields more than the non-artesian aquifers. The secondary artesian aquifers contain undifferentiated sediments and are more extensive in the Hawthorn Group. The quality of the secondary artesian aquifer varies with depth, location, and local geologic and hydrologic conditions.

The Floridan Aquifer underlies all of Florida. In Orange County, the Floridan Aquifer includes the Lake City Limestone, the Avon Park Limestone, the Ocala Group, and parts of the Hawthorn Group. The aquifer consists of alternating layers of limestone and dolomite or dolomitic limestone. This aquifer is one of the most productive in the world. Ground water recharge in Orange County of the Floridan Aquifer comes from annual rainfall. Water also enters the Floridan Aquifer by underground flow from outside the region. Discharge of ground water from the Floridan Aquifer occurs by spring outflow, seepage into the St. Johns River system, by outflows to other areas, and by localized pumping in the area.

6.3 Exterior Observations

The following items or conditions were looked for or identification was attempted, as indicated in the ASTM standard.

6.3.1 Hazardous Substances and Petroleum Products Containers in Connection with Identified Uses

No structures were present at the Site.

6.3.2 Storage Tanks

No aboveground storage tanks (ASTs) or underground storage tanks (USTs) were observed on the Site.

6.3.3 Odors

No strong, pungent, or noxious odors and their sources were detected during the Site reconnaissance.

6.3.4 Pools of Liquid

No standing surface water and pools or sumps containing liquids likely to contain hazardous substances or petroleum products were observed during the Site reconnaissance.

6.3.5 Drums

No drums were observed during the Site reconnaissance.

6.3.6 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)

No hazardous substances or petroleum products containers not necessarily in connection with identified uses were observed during the Site reconnaissance.

6.3.7 Unidentified Substance Containers

No unidentified substance containers were observed during the Site reconnaissance.

6.3.8 PCBs

There were no transformers or other structures at the Site containing PCBs.

6.3.9 Pits, Ponds, or Lagoons

No pits, ponds, lagoons or other stormwater features were identified during the Site reconnaissance.

6.3.10 Stained Soil or Pavement

No stained soil was observed during the Site reconnaissance.

6.3.11 Stressed Vegetation

No stressed vegetation (from other than insufficient water) was identified during the site reconnaissance.

6.3.12 Solid Waste

No areas that were apparently filled or graded by non-natural causes (or filled of unknown origin) suggesting trash construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal were identified during the Site reconnaissance.

6.3.13 Wastewater

No wastewater or other liquids (including stormwater) or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site were observed discharging to drains or underground injection systems on site during the Site reconnaissance.

6.3.14 Wells

No private water well, pump or associated plumbing was observed during the site visit.

6.3.15 Septic Systems

No septic systems were observed during the Site reconnaissance.

6.3.16 Other

No other observations were recorded during the site reconnaissance.

6.4 Interior Observations

There were no dwellings, structures, or buildings on the Site.

6.4.1 Heating/Cooling

Not applicable.

6.4.2 Stains or Corrosion

Not applicable.

6.4.3 Drains and Sumps

Not applicable.

6.4.4 Hazardous Substances and Petroleum Products with Identified Uses

Not applicable.

6.4.5 Storage Tanks

Not applicable.

6.4.6 Odors

Not applicable.

6.4.7 Pools of Liquid

Not applicable.

6.4.8 Drums

Not applicable.

6.4.9 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)

Not applicable.

6.4.10 Unidentified Substance Containers

Not applicable.

6.4.11 PCBs

Not applicable.

7.0 INTERVIEWS

Interviews were not conducted as a part of this Phase I ESA. User and Owner questionnaires, however, were provided by the City of Orlando (Client).

7.1 Interviews with Site Contacts

User and Owner questionnaires were provided by the City of Orlando (Client).

7.2 Interviews with Local Government Officials

User and Owner questionnaires were provided by the City of Orlando (Client).

8.0 EVALUATIONS

This section identifies known or suspect RECs and other findings discovered during the Phase I ESA investigations.

1. DEEDS Orlando and DEEDs Orlando Expanded, Large area of downtown included Site

The first two listings in the database report identify the Downtown Economic Enhancement District (DEED) brownfield area originally designated in 2004 and expanded in 2007. Inclusion of the subject site or other properties within this area does not indicate that contamination is present, and is simply a legal designation to allow access to certain economic incentives related to the State and Federal Brownfields Programs. These area wide designations are not considered RECs for the Site.

2. ROTH'S SMALL ENGINE COMPANY REPAIR SHOP, located at 703 West Central Boulevard

This facility appeared at this Site in the City Directory from 1967. There were no documented discharges or compliance violations associated with this facility. However, past waste disposal practices or undocumented discharges could have occurred, with no regulatory record. Furthermore, the Phase II ESA completed by Universal could not be validated by ECT since no site maps/sample locations were provided and, at the time of the Phase II ESA, a building was present at the Site thereby limiting access to soil and groundwater. For this reason, ROTH'S SMALL ENGINE COMPANY REPAIR SHOP is considered a potential concern and a REC for the Site.

8.1 Known or Suspect RECs

This Phase I ESA has revealed evidence of one REC in connection with the Site: ROTH'S SMALL ENGINE COMPANY REPAIR SHOP.

8.2 Historical RECs

This Phase I ESA has revealed no evidence of historical RECs in connection with the Site.

8.3 Controlled RECs

This Phase I ESA has revealed no evidence of controlled RECs in connection with the Site.

8.4 De Minimis Conditions

This Phase I ESA has revealed no evidence of de minimis conditions in connection with the Site.

8.5 Other Findings

There are no other findings than those discussed in Section 8.0.

9.0 OPINION

This section includes the environmental professional's opinion(s) of the impact on the property of conditions identified in the findings section.

1. DEEDS Orlando and DEEDs Orlando Expanded, Large area of downtown that includes the Site

These area wide designations are not considered RECs for the Site.

2. ROTH'S SMALL ENGINE COMPANY REPAIR SHOP, located at 703 West Central Boulevard

Historical activities at this facility may have resulted in impacts to the soil and/or groundwater at the Site. A Phase II ESA was completed at the Site in 2003, however, due to the presence of a building at the time of sampling and the inability for ECT to verify the sampling locations, the Phase II ESA is deemed to be inadequate to fully address this REC.

10.0 CONCLUSIONS

ECT has conducted a Phase I ESA for the Site identified as two parcels located at 709 and 717 West Central Boulevard, Orlando, Florida. This Phase I ESA was conducted in conformance with the scope and limitations of ASTM Practice E1527-13 for Phase I ESAs. Deviations or data gaps from this Practice are described in Section 11 of this report.

The Phase I ESA investigation has revealed evidence of one REC associated with the Site.

11.0 DEVIATIONS/LIMITING CONDITIONS

The following limiting conditions/deviations from ASTM practice were identified:

- Interviews with site contacts were not conducted as a part of this Phase I ESA. The inability to conduct interviews with property owners is considered a deviation to the ASTM 1527-13 standard and constitutes a data failure. For the purposes and intent of this report, this data failure is not considered significant.
- ECT was not provided with chain of title for the subject parcels. The absence of a chain of title is considered a data failure. For the purposes and intent of this report, this data failure is not considered significant.

12.0 ADDITIONAL SERVICES

No additional services outside of the scope of work (i.e., asbestos, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources,

industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and biological agents) were provided for this investigation.

14.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The environmental assessment described herein was conducted by the undersigned employees of AEC and ECT. ECT's investigation consisted solely of the activities described in the Introduction of this report, and in accordance with the Terms and Conditions of Services Authorization #II.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312. I, have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312. The qualifications of the environmental professionals listed below are provided in **Appendix E**.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

709 WEST CENTRAL AVENUE
ORLANDO, FL 32805

COORDINATES

Latitude (North): 28.5423000 - 28° 32' 32.28"
Longitude (West): 81.3894000 - 81° 23' 21.84"
Universal Transverse Mercator: Zone 17
UTM X (Meters): 461905.7
UTM Y (Meters): 3157166.0
Elevation: 109 ft. above sea level

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: A review of the CERCLIS list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ORANGE, FL	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	12095C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> ORLANDO WEST	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	60 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: Millhopper

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 145 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	64 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 4.5
2	64 inches	79 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 0.42	Max: 6 Min: 4.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

ECT Env. Consulting & Tech Inc (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

APPENDIX E

Kelly Eger-Smith, REM

President/Owner

Years of Experience: 22

REGISTRATIONS & CERTIFICATIONS

- Registered Environmental Manager (REM), National Registry of Environmental Professionals (NREP) 2002
- OSHA 40-Hour HAZWOPER 1998
- OSHA 8-hour HAZWOPER Annual Refresher 2013
- Human Resource Generalist Certification 2006

PROFESSIONAL EXPERIENCE

Ms. Eger began her career in environmental science in 1991 as a chemist where she performed a variety of environmental analyses including inorganic and organic chemistry, radiochemistry and microbiology. In 1995, Ms. Eger joined PBS&J (now Atkins) as the Technical Operations Manager and Health & Safety Officer for the firm's environmental testing laboratory in Orlando. In this role, she developed quality assurance & quality control manuals and standard operating procedures for specialized work conducted for the Department of the Army and the U.S. Fish & Wildlife Service. PBS&J closed their environmental laboratory in August 2000 though Ms. Eger remained through October 2000 to coordinate all chemical and hazardous waste packaging and disposal and finalization of the existing Federal contracts.

From October 2000 to March 2001, Ms. Eger served as the Interim Chemistry Coordinator for the Reedy Creek Improvement District (RCID) at Walt Disney World where she was responsible for overall quality assurance and staff production for the group.

From March 2001 through August 2012, Ms. Eger was the managing Principal of the Central Florida office of Miller Legg, a multidiscipline engineering firm based in South Florida. Ms. Eger lead the firm's Environmental Engineering group statewide, oversaw Miller Legg's Occupational Health and Safety Program, and she was the Vice President of Human Resources.

In August 2012, Ms. Eger co-founded American Environmental Consulting, Inc. (AEC), a **100% woman-owned small business enterprise**. Ms. Eger serves as the President of AEC. In her role, Ms. Eger is responsible for all technical services performed by the firm, quality assurance/quality control, client service, and daily operational management.

AREAS OF SPECIALIZATION

- Phase I/II Environmental Site Assessments (ESAs)
- Brownfields/Redevelopment
- Contamination/Site Assessments
- Storage Tanks
- Remediation
- Environmental Monitoring
- Hazardous Materials
- Risk Assessment and Feasibility Studies
- Facility Compliance Permitting
- Regulatory Compliance Audits
- Health and Safety
- Training Development & Delivery
- Quality Assurance/Quality Control
- Laboratory Services & Data Validation
- Community Outreach & Public Involvement
- Human Resources
- Risk Management

RELEVANT PROJECT EXPERIENCE

- Project Manager for hundreds of Phase I/II ESAs for public and private clients at sites including commercial, industrial, airports, rail yards, marinas, golf courses, roadway corridors, and residential and agricultural land. Public sector clients have included: City of Fort Lauderdale, City of Orange City, City of Coral Springs, City of Miramar, Florida Department of Environmental Protection (FDEP), City of Miramar, Palm Beach County, School Board of Broward County, St. Lucie County, Town of Jupiter, Town of Wellington and Treasure Coast Research Park. Private sector clients have included: Akerman Senterfitt, Bilzen Sumberg, Holland & Knight, Baker Hostetler, Gunster, Taylor Morrison, KB Homes, Park Square Homes, Centerline Homes, and Maronda Homes.
- Project Manager for a contamination assessment associated with dewatering system design and operation at the Fort Lauderdale International Airport.
- Project Manager for numerous petroleum underground storage tank source removal and assessment projects at a variety of sites. Services also included permitting, construction and reporting.
- Senior Environmental Scientist for projects involving contamination assessment and determination of potential impacts to roadway projects along FDOT and local corridors throughout Florida.
- Project Manager for an unlicensed landfill and disposal site in Opa Locka, Florida where soil and groundwater contamination and discarded asbestos containing material (ACM) were identified.
- Project Manager and Senior Environmental Scientist for contamination assessments of petroleum and hazardous waste impacts at numerous agricultural sites including crop farms, cattle ranches, and citrus groves throughout Florida.
- Project Manager for assessment and remediation projects in the Florida Department of Environmental Protection's petroleum cleanup reimbursement program (pre-approval program).
- Project Manager for a solid waste landfill Groundwater Monitoring Plan and Site Closure Assessment in Orange City, Volusia County, Florida.
- Project Manager for an air sparge and soil vapor extraction (SVE) system project to remediate dissolved petroleum contaminants from the shallow groundwater at a marina in the Florida Keys.
- Project Manager for an air sparge and SVE system project to remediate chlorinated solvents from the soil and groundwater at a former drycleaning facility in Winter Park, Florida.
- Project Manager for numerous projects involving successful regulatory negotiation for natural attenuation monitoring of chlorinated solvents at commercial and industrial sites.
- Environmental Scientist for projects involving evaluation and remediation of arsenic impacts associated with Chromated Copper Arsenate (CCA) lumber at over 100 children's playgrounds in 7 Florida counties.
- Project Manager for Spill Prevention Control and Countermeasure (SPCC) Plan preparation for a national automobile fueling and car wash chain.
- Compliance Auditor for projects at golf courses, dry cleaners and automotive repair facilities.

- Project Manager and Technical Consultant for Comprehensive Analytical Laboratory Services with the United States Department of the Army at the Rocky Mountain Arsenal. Project required extensive development of Quality Assurance Project Plans (QAPPS) and Laboratory Quality Control Plans (LQCPs).
- Developer/Instructor of a health and safety training program for maintenance personnel and principals at parochial schools in Central Florida.
- Developer/Instructor of an environmental compliance training program for vehicle maintenance personnel for the School Board of Broward County.
- Health & Safety Officer for projects involving infectious biological material processing. Required coordination with the United States Fish & Wildlife Service (USFWS) and Center for Disease Control (CDC), development and implementation of health and safety program, and personnel training.

PROFESSIONAL & CIVIC ACTIVITIES

Board of Directors, American Society of Highway Engineers (ASHE) Central Florida Chapter 2013

Member & Program Committee, Central Florida Home Builders Association (HBA) 2013

Executive Board, myregion.org 2006-2012

Executive Board Representative, Southwest Regional Board of Advisors (serving Polk, Lake & Osceola Counties) 2010-2012

Member, Central Florida Association of Environmental Professionals (CFAEP)

Commercial Real Estate Women (CREW) Orlando Chapter, Board of Directors 2011, 2012

Past Vice Chair, Metropolitan Environmental Training Alliance (METRA)

Graduate, Leadership Orlando, Class 67

EDUCATION

Bachelor of Science, Biology, George Mason University, 1991

Post Baccalaureate Studies, Environmental Engineering, University of Central Florida, 2004

PRESENTATIONS AND SPEAKING ENGAGEMENTS

Florida Chamber Environmental Permitting Summer School (Emerging Issues in Due Diligence) 2008, 2009, 2010, 2011, 2012, 2013

Florida Chamber Growth Management Conference (Emerging Issues in Due Diligence) 2010, 2011

Florida Bar Environmental and Land Use Law Annual Update (Trends in Due Diligence) 2010

Education

B.S., Earth Sciences (Geology)—Central Michigan University, 1984
MBA, Business—University of Central Florida, 2008

Registrations

Professional Geologist, Florida, No. 1593
Professional Geologist, Kentucky, No. 951
Professional Geologist, Tennessee, No. 3197
Professional Geologist, Pennsylvania, No. 355
OSHA HAZWOPER 40-hour and 8-hour refresher training
Respiratory protection
First Aid/CPR Certified

Areas of Specialization

Project Management, Financial Management, Brownfield Redevelopment, Remedial Investigation, Environmental Risk Management, Hazardous Waste Site Investigations, Contamination Assessments, Site Remediation, Hydrogeology, Phase I/II Environmental Site Assessments and Other Due Diligence Investigations, Peer Review, Risk Assessments, Feasibility Studies, Groundwater Supply Development, Environmental Audits, Water Quality

Contract Manager; City of Orlando Brownfield Assessment Grant—Provided project management and technical oversight for all aspects of this EPA \$400,000 Petroleum and Hazardous Substances grant including programmatic support, public outreach, Phase I/II environmental site assessments (ESAs), and Analysis of Brownfield Cleanup Alternatives. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

Contract Manager; Orange County Brownfield Assessment Grant—Provided project management and technical oversight for all aspects of this EPA \$400,000 Petroleum and Hazardous Substances grant including programmatic support, public outreach, Phase I/II environmental site assessments (ESAs), and Analysis of Brownfield Cleanup Alternatives. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

Project Manager, Professional Services Contract, Brevard County, Florida—Responsible for task orders under the Brevard County Natural Resources Management Office. Projects include groundwater quality investigations to support the County's efforts in improving stormwater management, Phase I ESAs, and other monitoring projects. Work efforts have consisted of monitoring well installation, groundwater sampling for conventional and ultratrace metals parameters, reporting, and well abandonment.

Contract Manager; Orange County Risk Management and the City of Orlando—Provided management and technical oversight for all aspects of this continuing services contract including Phase I/II environmental site assessments (ESAs), site assessments, remedial action activities, natural attenuation monitoring, storage tank system management, interim remedial actions, source removal, and emergency response actions. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

Contract Manager; City of Eustis Brownfield Assessment Grant—Provided project management and technical oversight for completion of Phase I/II ESAs, and participated in community outreach activities. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

Project Manager; Texaco Redimart, Independent Retail Petroleum Facility—Responsible for the completion of a site assess-

ment at a petroleum retail facility in Orlando, Florida. A remedial action plan (RAP) was approved recommending bio-spargage technology. Construction drawings and bid specifications were completed, and selection of a remedial action construction (RAC) was made to the Florida Department of Environmental Protection (FDEP). After RAC activities are completed, remedial action operation and maintenance (O&M) will be initiated. Site rehabilitation is expected to take 2 years.

Project Manager, Emergency Response Services, MBM Food Services—Responsible for coordinating and completing the scheduling and over-sight of vacuum-truck services for a recorded 1,359 gallons of water removed from the stormwater pond in Lakeland, Florida. An absorbent boom was also floated across the surface of the stormwater pond in an effort to consolidate the floating substance to a central collection point.

Project Manager; John Young Pump Station, FDEP Preapproval Program—Conducted site assessment activities in accordance with the low-scored site initiative at a facility in Orange County, Florida, impacted by petroleum products. Performed oversight for the acquisition of a right-of-way permit, completion of soil borings, installation of temporary monitor wells, collection of soil and groundwater samples, organization of data, updating tables, and signing/sealing a site assessment report (SAR).

Contract Manager; Orange County Risk Management and the City of Orlando—Provided management and technical oversight for all aspects of this continuing services contract including Phase I/II ESAs, site assessments, remedial action activities, natural attenuation monitoring, storage tank system management, interim remedial actions, source removal, and emergency response actions. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of sub-contractors, reporting, invoicing, and client and regulatory contact.

Project Manager; Seminole County Environmental Services—Provided management and technical oversight of projects, budgets, and correspondence regarding Phase I and II ESAs; site assessment/remediation; underground storage tank (UST) and aboveground storage tank (AST) closures; stormwater pollution prevention program and spill prevention, control, and countermeasure (SPCC) plans; water quality sampling; brownfield consulting; and brownfield site rehabilitation agreement (BSRA) coordination.

Senior Geologist/Project Manager; Atlantic Housing Partners LLC (AHP)—Participated in the completion of hundreds of Phase I and Phase II ESAs throughout Florida, in addition to site assessment, source removal, and brownfield consulting to AHP on numerous projects.

Senior Geologist/Project Manager; Environmental Services, Confidential Client—Conducted environmental services including Interim RAP/reports, site assessment plans/reports, remedial alternative studies, remedial implementation plans, and UST and AST closures at a major tourist attraction in Orange County, Florida. Performed assessment and cleanup activities to satisfy corporate counsel and meet the requirements of Chapter 62-770, Florida Administrative Code (F.A.C.). Remediation technologies for these projects included remediation by bio-augmentation, source removal, and natural attenuation.

Senior Geologist; Portfolio of Abandoned Gas Stations, Estate of Richard E. Thoni—Performed assessment and cleanup activities to facilitate sale and redevelopment of former Thoni gasoline stations through Florida. Remediation activities were focused on implementing the most cost-effective methods while expediting cleanup so that these underutilized properties may be brought back into the market for reuse. Remediation technologies for these projects included remediation by accelerated natural attenuation, source removal, air sparging, and soil vapor extraction.

Senior Geologist/Project Manager; Lakewood Pointe Brownfield, Lakewood Pointe LLC—Supported the brownfields designation process by presenting at a neighborhood public meeting and representing the owner at the City Commission meeting. Lakewood Pointe is an historic solid waste disposal area that has been redeveloped for affordable housing in Seffner, Florida. A SAR and RAP were completed to address petroleum and arsenic impacted soil and groundwater. A Directors Authorization was obtained from Hillsborough County Environmental Protection Commission so that site development could occur. A landfill gas monitoring system was installed concurrently with construction. Engineering and Institutional Controls were implemented to allow for the redevelopment while maintaining residential safeguards and the protection of ecologically sensitive lands.

Senior Geologist/Project Manager; Hughes Supply Brownfield, HD Supply—Worked closely with HD Supply, the City of Jacksonville, and the FDEP in preparing the BSRA for this industrial redevelopment and brownfield project in Jacksonville, Florida. Primary author of the RAP and RAP addendum which consisted of an innovative technological blend of chemical oxidation, landfarming, and soil vapor extraction to remediate the chlorinated solvent impacts at this property. Chemical injection, excavation, and permeable reactive barriers are currently designed for implementation in 2012.

Senior Geologist/Project Manager; Towne Park Brownfield, Winter Springs, FL—Completed a SAR and source removal plan in a limited time to address arsenic soil impacts associated with a former railroad spur that transects an age-restricted affordable housing project located in Seminole County, Florida.
