1.0 SUMMARY

ECT has completed a Phase I Environmental Site Assessment (ESA) for the Peabo Child Care Center located at 815 Hills Street, Orlando, Orange County, Florida 32801 (Site). This Phase I ESA was conducted in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E1527-13 for Phase I ESAs. Deviations or data gaps from this Practice are described in Section 11 of this report.

The Phase I ESA investigation has revealed no evidence of RECs associated with the Site.

2.0 INTRODUCTION

ECT has conducted a Phase I ESA for one parcel of land located at 815 Hills Street between Hills Place and Lee Avenue. The Site is located in the City of Orlando, Orange County, Florida 32801. The Site is developed as the Peabo Child Care Center. A Site Location Map is provided as **Figure 1**. A USGS Topographic Map, 1997, West Orlando, which includes the Site and the surrounding area, is provided as **Figure 2**. An aerial photograph, circa 2012, depicting the Site is also provided as **Figure 3**.

2.1 Purpose

Mr. Dan Dashtaki with the City of Orlando authorized ECT to conduct a Phase I ESA of the Site to evaluate the presence/absence of RECs in anticipation of future redevelopment activities. The City of Orlando is the recipient of a Brownfields Assessment Grant, EPA Cooperative Agreement BF-95498212. This grant was awarded in September 2012, and is a community-wide assessment grant, with emphasis on the Parramore area, specifically targeting redevelopment areas.

The objective of the Phase I ESA was to identify RECs in connection with the Site, to the extent feasible pursuant to the processes prescribed in the ASTM E-1527-13 guidelines. The term “*REC*” as defined by ASTM is the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

This Phase I ESA includes information gathered from federal, state, and local agencies; personal interviews with people familiar with the Site and surrounding properties; a Site visit was conducted by American Environmental Consulting (AEC) on June 24, 2014. This report is intended to meet the due diligence requirements of ASTM E 1527-13.

2.2 Detailed Scope of Services

The Phase I ESA conducted by ECT included, but was not limited to, the following services:

- Review of the public record;
- Site reconnaissance to identify visual signs of environmental conditions on or adjoining the Site, and to evaluate evidence found in the review of public records

that might be indicative of activities resulting in hazardous substances or petroleum products being used or deposited in the Site;

- Interviews with individuals knowledgeable about the Site;
- Preparation of a written report documenting our findings, opinions, and conclusions.

2.3 Significant Assumptions

This Phase I ESA was prepared using information obtained from and/or provided by the following sources:

- Visual observations of the Site;
- Available published information;
- Third-party database searches, and;
- Local/State government officials and/or records.

It is assumed that the information obtained through the above methods is valid and accurate as provided. The passage of time, manifestation of latent conditions, and occurrence of future events or changes to existing codes/regulations may alter the conclusions and recommendations of this report.

2.4 Limitations and Exceptions

The opinions presented in this report are based upon the scope of services, information obtained through the performance of the services, and the schedule as agreed upon by ECT and the party for whom this report was originally prepared. This report is an instrument of professional service and was prepared in accordance with the generally accepted standards and level of skill and care under similar conditions and circumstances established by the environmental consulting industry. No representation, warranty, or guarantee, expressed or implied, is intended or given. To the extent that ECT relied upon information prepared by other parties not under contract to ECT, ECT makes no representation as to the accuracy or completeness of such information. This report is expressly for the sole and exclusive use of the party for whom this report was originally prepared, and for a particular purpose. Only the party for whom this report was originally prepared and/or other specifically named parties have the right to make use of and rely upon this report. Reuse of this report or any portion thereof for other than its intended purpose, or if modified, or if used by third parties, shall be at the user's sole risk.

The findings presented in this report apply solely to the Site conditions existing at the time when ECT's assessment was performed. It must be recognized, however, that an ESA is intended for the purpose of determining the potential for contamination through limited research and investigative activities and in no way represents a conclusive or complete site characterization. Conditions in other parts of the Site may vary from those at the locations where data were collected. ECT's ability to interpret investigation results is related to the availability of the data and the extent of the investigation activities. ECT does not provide any guarantees, certifications, or warranties that a property is free from environmental contamination. Furthermore, nothing contained in this document shall relieve any other

party of its responsibility to abide by contract documents and applicable laws, codes, regulations, or standards.

2.5 Special Terms and Conditions

The scope of work for this Phase I ESA did not include testing of electrical equipment for the potential presence of PCBs or the assessment of natural hazards such as naturally occurring asbestos or methane gas, assessment of the potential presence of radionuclides, or assessment of non-chemical hazards such as the potential for damage from earthquakes or floods. This Phase I ESA also did not include an extensive assessment of the environmental compliance status of the Site or of the businesses operating onsite, or a health-based risk assessment.

2.6 User Reliance

This Phase I ESA was conducted for the use and reliance of the City of Orlando and the Peabo Child Care Center. No use of the information contained in this report by others is permissible without receiving prior written authorization to do so from ECT. ECT is not responsible for independent conclusions, opinions, or recommendations made by others or otherwise based on the findings presented in this report.

3.0 SITE DESCRIPTION

This section presents a general overview of the Site, onsite improvements, and surrounding properties.

3.1 Location and Legal Description

The Site consists of one parcel of land located at 815 Hills Street, within Section 26 of Township 22 South, and Range 29 East in Orlando, Orange County, Florida.

The Orange County Property Appraiser's Office information identifies the Site under the following parcel identification number, address, names, and legal descriptions:

- 26-22-29-3004-00-104; 815 Hills Street; HAMMOND & BUNCH SECOND ADDITION D/54 THE W 56 FT OF E 221 FT OF N 100 FT OF LOT 10

A copy of the Orange County Property Appraiser's information is included as **Appendix A**.

3.2 Site and Vicinity General Characteristics

The Site consists of one parcel totaling approximately 0.13 acres. The Site is bound by single family residential properties to the north, east and west, and Hills Street to the south.

3.3 Current Use of the Property

The Site is developed as the Peabo Child Care Center.

3.4 Descriptions of Structures, Roads, and Other Improvements on the Site

3.4.1 General Description of Structures

One single family house is located at the Site. A paved driveway and wooden ramp from the driveway to a side door of the house were observed. The western side yard and back yard of the house are bound by a chain-link fence.

3.4.2 Roads

No roads are present within the Site. The Site is bound to the south by Hills Street.

3.4.3 Potable Water Supply

Potable water is provided by the Orlando Utilities Commission.

3.4.4 Sewage Disposal System

Sewage disposal is provided by the Orlando Utilities Commission.

3.5 Current Uses of the Adjoining Properties

The current use of the adjoining properties is residential. The adjoining properties to the north, east and west are single family residences. A two-story, multi-family housing unit is located on the south side of Hills Street directly across from the Site. The adjoining property to the north is abandoned and boarded up. Adjoining properties to the east, west and south were occupied at the time of this Phase I ESA.

4.0 USER-PROVIDED INFORMATION

A user questionnaire was mailed to the Peabo Child Care Center. At the time of this report preparation, the user questionnaire had not yet been returned to, or received by, ECT.

4.1 Title Records

A review of title records was not included in the scope of work for this Phase I ESA.

4.2 Environmental Liens or Activity and Use Limitations

The Client did not provide ECT with copies of the deed or chain-of-title. Therefore, ECT has no knowledge of environmental liens or use limitations associated with the Site.

4.3 Specialized Knowledge

The Client provided no specialized knowledge or previous environmental reports for the Site.

4.4 Commonly Known or Reasonably Ascertainable Information

Reasonably ascertainable information included reports obtained from the Orange County Property's Appraises website.

4.5 Valuation Reduction for Environmental Issues

The Client indicated that the purchase price of the Site reasonably reflected fair market value for the property.

4.6 Owner, Property Manager, and Occupant Information

The Site is owned by Mr. John Allen and Mrs. Bettye Gelzer. The Peabo Child Care Center that operates at the Site is managed by Ms. Lawanna Gelzer, the daughter of John Allen and Bettye Gelzer. Ms. Lawanna Gelzer was present during the Phase I ESA site inspection.

4.7 Reason for Performing Phase I

The reason for performing the Phase I ESA is to evaluate the presence/absence of RECs and to provide an update regarding the current status of the parcel to the City of Orlando and the Peabo Child Care Center.

4.8 Other

No additional information was provided by the Client to ECT for the preparation of this Phase I ESA.

5.0 RECORDS REVIEW

The following section presents the results of ECT's historical records review, including aerial photographs, topographic maps, Sanborn maps, and city directories pertaining to the Site.

5.1 Standard Environmental Record Sources

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate. A copy of the EDR Summary Radius Map Report is provided in **Appendix B**.

The environmental records were requested with a center-point of the study area located within the boundaries of the subject property. More detailed information regarding the individual databases searched is included in the Government Records Searched/Data Currency Tracking section of the EDR report. This section of the report also includes information regarding when each database was last updated. The report listed sites of potential concern based on the above search criteria. However, only the sites which appeared to have the potential for environmental impacts to the Site due to proximity, anticipated direction of groundwater flow and/or potential for migrating contamination are discussed below. Note: distances to potential concerns are from the nearest boundary of the Site.

- DEEDS Orlando and DEEDs Orlando Expanded
Location: Large area of downtown Orlando including the Site
Concern: Brownfield Area

Summary: The first two listings in the database report identify the Downtown Economic Enhancement District (DEED) brownfield area originally designated in 2004 and expanded in 2007. Inclusion of the subject site or other properties within this area does not indicate that contamination is present, and is simply a legal designation to allow access to certain economic incentives related to the State and Federal Brownfields Programs. These area wide designations are not considered potential concerns for the Site.

- **ORLANDO GASIFICATION PLANT**

Location: 600 Block West Robinson Street

Concern: CERCLIS

Summary: The former Orlando Gasification Plant is listed under a number of regulatory databases, including CERCLIS. The CERCLIS database contains hazardous sites that are either on the US EPA National Priorities List (NPL), proposed to be on the NPL, or are undergoing studies to determine if the site should be listed. Considerable studies have been conducted at the Orlando gasification facility, and current investigations focus on relatively deep documented groundwater impacts, extending to the Floridan aquifer. This facility is located east 0.3 miles from the Site. However, no evidence of contaminant migration towards the Site has been documented and for this reason the former Orlando Gasification Plant is not considered a REC.

5.2 Additional Environmental Record Sources

The following additional or proprietary record sources were also searched and reviewed.

5.2.1 Historical Topographic Maps

EDR's Historical Topographic Map Report is designed to assist in evaluating potential liability on a Site resulting from past activities. EDR's Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s. Historical topographic maps were produced and reviewed from 1956 through 1995. Results of the topographic map review are discussed in Section 5.3.

5.2.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were produced since the late 1800's to provide information relative to fire hazards on insurable property. These maps often indicate locations of underground and aboveground gasoline tanks, storage facilities for flammable chemicals, such as dry cleaners, paint shops, maintenance and garage facilities, as well as historical information on occupants of buildings, unavailable through other sources. Production of these maps typically was limited to the immediate vicinity of downtown urban areas. EDR purchased the Sanborn Company and has access to all available Sanborn maps. EDR performed a search of its archive and indicated that Sanborn maps were produced for the

vicinity of the Site in various years from 1913 to 1973. Findings of the map reviews are discussed in Section 5.4.

5.2.3 Historical City Directory Review

R.L. Polk directories and/or Hill-Donnelly Cross Reference directories are referenced for study areas which help identify changes in land use based on the type of businesses that occupied the Site and surrounding area. The type of business, such as automotive, dry cleaning, gasoline/service stations, etc. are indicative of the possible presence of hazardous substances or petroleum products. Addresses within the general vicinity of the Site first appeared in available historical directories in 1922. Results of the directory search are discussed in Sections 5.4.

5.3 Physical Setting Source(s)

Physical sources that provide such information such as geological, hydrologic, or topographic characteristics were reviewed for potential migration pathways onto the Site. The Site has an approximate elevation of 104 feet National Geodetic Vertical Datum (NGVD) and the surrounding properties are typically at the same elevation.

5.4 Historical Use Information on the Property

To evaluate historical use of the Site, ECT reviewed readily available aerial photographs, city directories, and fire insurance maps.

5.4.1 Topographic Maps

Historical USGS topographic maps of the Site and surrounding area were obtained and reviewed from EDR for years 1956, 1970, 1980, and 1995. As shown on **Figure 2**, the USGS Topographic Map, 1998, Orlando West Quad 3712, the surrounding area is generally flat at a National Geodetic Vertical Datum (NGVD) of 104 ft. Topographic elevations have been relatively consistent with the historic topographic maps. A brief review of the topographic maps for the Site is provided below:

1956 – 1995 – No significant changes to the Site were identified in the Topographic Maps reviewed.

5.4.2 Aerial Photographs

Aerial photographs were obtained and reviewed from EDR for years 1947, 1952, 1957, 1963, 1969, 1974, 1978, 1984, 1989, 1994, 1997, 1999, 2005, 2006, 2007, and 2010. The EDR Aerial Photograph Decade Package is provided in **Appendix C**. The most current 2012 aerial map, **Figure 3**, was also reviewed for activities on the Site. A brief synopsis of activities derived from the aerial photographs for the Site is provided below:

1947 – 1969 - The Site appears to contain a residential dwelling.

1974 – 2010 – The Site appears to have been redeveloped with a larger residential dwelling.

5.4.3 Directories

A review of the city directories provided by EDR was conducted as a part of this Phase I ESA. The directory information did not indicate past businesses or activities on the Site

that would be considered suspect or warrant additional records review. A copy of the EDR-City Directory Abstract is provided in **Appendix C**.

5.4.4 Fire Insurance Maps

Fire Insurance Maps (Sanborn Maps) were obtained and reviewed from EDR for years 1913, 1919, 1925, 1950, 1956, 1965, and 1973. The Sanborn Maps are provided in **Appendix C**. Note that the maps from years 1913 and 1919 are incomplete and do not show the Site. A brief synopsis of activities derived from the Sanborn Maps for the Site is provided below:

1925 – One single-story residential dwelling is present at the Site. Hills Street is identified as West Jefferson Place on the 1925 map.

1950 - 1965 – Similar to 1925 except that West Jefferson Place is identified as Hills Alley.

1973 – Similar to 1965 except that Hills Alley is identified as Hills Lane.

5.5 Historical Use Information on Adjoining Properties

To evaluate historical use of the adjoining properties, ECT reviewed readily available topographic maps, aerial photographs, Orange County Property Appraiser's information, and fire insurance maps.

5.5.1 Topographic Maps

Historical USGS topographic maps of the Site and surrounding area were obtained and reviewed from EDR for years 1956, 1970, 1980, and 1995. A brief review of the topographic maps for the Site is provided below:

1956 – 1995 – No significant changes to the adjoining properties were identified in the Topographic Maps

5.5.2 Aerial Photographs

Aerial photographs were obtained and reviewed from EDR for years 1947, 1952, 1957, 1963, 1969, 1974, 1978, 1984, 1989, 1994, 1997, 1999, 2005, 2006, 2007, and 2010. A brief synopsis of activities derived from the aerial photographs for the adjoining properties is provided below.

1947 – 2012 – Aerial photography of the area surrounding the Site is representative of the development described by the City Directories and Fire Insurance Maps below.

5.5.3 Directories

A review of the city directories indicated no past businesses or activities that would be considered suspect or warrant additional records review.

5.5.4 Fire Insurance Maps

Sanborn Maps were obtained and reviewed from EDR for years 1913, 1919, 1925, 1950, 1956, 1965, and 1973. Note that the maps from years 1913 and 1919 are incomplete and do not show the Site or adjacent properties. A brief synopsis of activities derived from the Sanborn Maps for the adjoining properties is provided below:

1925 - 1973 – Residential dwellings are present to the north, south and west of the Site. Vacant lots are present to the east of the Site and at various lots nearby. A railroad track is present on the north side of West Robinson Avenue. Development in the area over the years has been residential.

6.0 SITE RECONNAISSANCE

On June 24, 2014, representatives of AEC performed a site reconnaissance to observe general site conditions and to identify visible evidence of RECs. The property was occupied and operating as a child care facility at the time of the inspection. Select photographs taken on the property during site inspection/reconnaissance are provided in **Appendix D**.

6.1 Methodology and Limiting Conditions

The methodology for the site reconnaissance included inspection of exterior portions of the Site and adjacent sites. Inspection of the interior portion of the Peabo Child Care Center building was limited to the guest reception area since babies and young children were present and since the presence of hazardous materials and/or petroleum products would not be expected inside the facility. A Site Reconnaissance Checklist documenting the Site and adjoining properties was completed and is provided in **Appendix D**.

6.2 General Site Setting

6.2.1 Current Use(s) of the Property

The current use of the Site is as a child daycare facility.

6.2.2 Past Use(s) of the Property

The Site was developed as early as 1925, according to the Sanborn Maps. Past uses of the Site appears to be for residential purposes. In 1971, the current residential dwelling was constructed by the current owners. According to Ms. Lawanna Gelzer, the daycare operation at the Site has been ongoing for approximately 20 years.

6.2.3 Current Uses of Adjoining Properties

The Site is located in a primarily residential area of Parramore. Residential home sites and multifamily housing units surround the Site.

6.2.4 Past Uses of Adjoining Properties

Past uses of the adjoining parcels has been residential.

6.2.5 Current or Past Uses in the Surrounding Area

Current and past uses in the surrounding area are primarily residential.

6.2.6 Geologic, Hydrogeologic, and Hydrologic Conditions

According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Soil Survey of Orange County, Florida (1989), Millhopper fine sands underlie the area surrounding the Site. Below is a brief description of this soil type:

Millhopper fine sand: This soil type is nearly level to gently sloping and moderately well drained and is found on low ridges and knolls on the uplands and on the flatwoods. The slopes are nearly smooth to slightly convex. A seasonal high water table in Tavares soil is at a depth of 40 to 72 inches for more than 6 months, and it recedes to a depth of more than 80 inches during extended dry periods. A seasonal high water table in Millhopper soil is at a depth of 40 to 60 inches for 1 to 4 months, and it recedes to a depth of 60 to 72 inches for 2 to 4 months. During periods of high rainfall, the water table is at a depth of 30 to 40 inches for cumulative periods of 1 to 3 weeks. The permeability of Tavares soil is very rapid. The permeability of Millhopper soil is rapid in the surface and subsurface layers and moderately rapid of moderate in the subsoil. The available water capacity of Tavares soil is very low. The available water capacity of Millhopper soil is low in the surface and subsurface layers and medium in the subsoil. Natural fertility is very low in Tavares soil and low in Millhopper soil. Organic matter content is very low in Tavares soil and low or moderately low in Millhopper soil. In most areas, the soils in this map unit are used for citrus crops and/or for homesite development.

ECT personnel also reviewed the soil survey of Orange County, dated 1957 (issued 1960). According to the Soil Survey, Orange County is underlain by marine deposited beds of sand, silt, clay, limestone, dolomite, and shale to about 6,500 feet below land surface (bls). The uppermost unit is Pleistocene to Recent in age and generally composed of unconsolidated, very fine to medium-grained quartz sand with some clays. The Pleistocene and Recent age sediments are underlain by the Hawthorn Group of Miocene age (about 25 million years old). In general, the Hawthorn Group is highly variable and diverse, including inter-bedded and inter-fingered sand, clayey sand, sandy-clayey phosphatic sediments, dolomite, and limestone. The Miocene age sediments are underlain by a thick sequence of late Eocene age limestone formations known as the Ocala Group. It is described as gray clay and gravel to white, soft limestone. The Ocala Group Limestone is underlain by the Avon Park Limestone, which is also of Eocene age. This formation is composed of similar materials, but distinguished from overlying units by the occurrence of sand-sized, cone-shaped foraminifera. The formation is usually tan in color, but can range from chalky white to light brown or ashen gray. The Lake City Limestone of middle Eocene age underlies the Avon Park Limestone. It is similar in lithology and water-bearing properties to the Avon Park Limestone and makes up the bottom portion of the Floridan aquifer.

According to the Soil Survey, ground water occurs in both artesian and non-artesian conditions in the Orange County. The non-artesian aquifer is composed mainly of sand and shell with varying amounts of clay and provides limited amounts of water. Water from this aquifer is used mainly for livestock and limited domestic use. Water quality in this aquifer varies depending on the chemical composition of the aquifer and the content of the calcium carbonate in the area. The secondary artesian aquifer and the Floridan Aquifer are the two types of artesian aquifers in Orange County. The secondary artesian aquifer generally yields less water than the Floridan Aquifer, but yields more than the non-artesian aquifers. The secondary artesian aquifers contain undifferentiated sediments and are more extensive in the Hawthorn Group. The quality of the secondary artesian aquifer varies with depth, location, and local geologic and hydrologic conditions.

The Floridan Aquifer underlies all of Florida. In Orange County, the Floridan Aquifer includes the Lake City Limestone, the Avon Park Limestone, the Ocala Group, and parts of the Hawthorn Group. The aquifer consists of alternating layers of limestone and dolomite or dolomitic limestone. This aquifer is one of the most productive in the world. Ground water recharge in Orange County of the Floridan Aquifer comes from annual rainfall. Water also enters the Floridan Aquifer by underground flow from outside the region. Discharge of ground water from the Floridan Aquifer occurs by spring outflow, seepage into the St. Johns River system, by outflows to other areas, and by localized pumping in the area.

6.3 Exterior Observations

The following items or conditions were looked for or identification was attempted, as indicated in the ASTM standard.

6.3.1 Hazardous Substances and Petroleum Products Containers in Connection with Identified Uses

No hazardous substances or petroleum product containers were observed during the Site reconnaissance.

6.3.2 Storage Tanks

No aboveground storage tanks (ASTs) or underground storage tanks (USTs) were observed during the Site reconnaissance.

6.3.3 Odors

No strong, pungent, or noxious odors and their sources were detected during the Site reconnaissance.

6.3.4 Pools of Liquid

No standing surface water and pools or sumps containing liquids likely to contain hazardous substances or petroleum products were observed during the Site reconnaissance.

6.3.5 Drums

No drums were observed during the Site reconnaissance.

6.3.6 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)

No hazardous substances or petroleum products containers not necessarily in connection with identified uses were observed during the Site reconnaissance.

6.3.7 Unidentified Substance Containers

No unidentified substance containers were observed during the Site reconnaissance.

6.3.8 PCBs

There were no transformers or other structures at the Site containing PCBs.

6.3.9 Pits, Ponds, or Lagoons

No pits, ponds, lagoons or other stormwater features were identified during the Site reconnaissance.

6.3.10 Stained Soil or Pavement

No stained soil or pavement was observed during the Site reconnaissance.

6.3.11 Stressed Vegetation

No stressed vegetation (from other than insufficient water) was identified during the Site reconnaissance.

6.3.12 Solid Waste

No areas that were apparently filled or graded by non-natural causes (or filled of unknown origin) suggesting trash construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal were identified during the Site reconnaissance.

6.3.13 Wastewater

No wastewater or other liquids (including stormwater) or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site were observed discharging to drains or underground injection systems on site during the Site reconnaissance.

6.3.14 Wells

No private water well, pump or associated plumbing was observed during the Site reconnaissance.

6.3.15 Septic Systems

No septic systems were observed during the Site reconnaissance.

6.3.16 Other

No other observations were recorded during the Site reconnaissance.

6.4 Interior Observations

Since the Site is an operational daycare facility, only the front reception area of the onsite structure was observed for this Phase I ESA. Ms. Gelzer was interviewed regarding the interior of the building.

6.4.1 Heating/Cooling

Heating and cooling are provided by power from overhead electrical lines.

6.4.2 Stains or Corrosion

None reported.

6.4.3 Drains and Sumps

None reported.

6.4.4 Hazardous Substances and Petroleum Products with Identified Uses

None reported.

6.4.5 Storage Tanks

None reported.

6.4.6 Odors

None reported.

6.4.7 Pools of Liquid

None reported.

6.4.8 Drums

None reported.

6.4.9 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)

None reported.

6.4.10 Unidentified Substance Containers

None reported.

6.4.11 PCBs

None reported.

7.0 INTERVIEWS

An interview was conducted with Ms. Lawanna Gelzer during the Site reconnaissance.

7.1 Interviews with Site Contacts

AEC interviewed Ms. Lawanna Gelzer during the Phase I ESA site reconnaissance. Ms. Gelzer provided information regarding the past development and uses of the Site and of the surrounding neighborhood.

7.2 Interviews with Local Government Officials

No interviews with local government officials were conducted for this Phase I ESA.

8.0 EVALUATIONS

This section identifies known or suspect RECs and other findings discovered during the Phase I ESA investigations.

1. DEEDS Orlando and DEEDs Orlando Expanded, Large area of downtown included Site

The first two listings in the database report identify the Downtown Economic Enhancement District (DEED) brownfield area originally designated in 2004 and

expanded in 2007. Inclusion of the subject site or other properties within this area does not indicate that contamination is present, and is simply a legal designation to allow access to certain economic incentives related to the State and Federal Brownfields Programs. These area wide designations are not considered RECs for the Site.

2. ORLANDO GASIFICATION PLANT, 600 Block West Robinson Street

The EDR report had the former Orlando Gasification Plant listed under a number of regulatory databases, including CERCLIS. The CERCLIS database contains hazardous sites that are either on the US EPA National Priorities List (NPL), proposed to be on the NPL, or are undergoing studies to determine if the site should be listed. Considerable studies have been conducted at the Orlando Gasification Plant, and current investigations focus on relatively deep documented groundwater impacts, extending to the Floridan aquifer. This facility is located greater than ¼ mile northeast of the TP. The documented impacts are not considered a REC, as the groundwater plume extends away from the TP.

8.1 Known or Suspect RECs

This Phase I ESA has revealed no evidence of RECs in connection with the Site.

8.2 Historical RECs

This Phase I ESA has revealed no evidence of historical RECs in connection with the Site.

8.3 Controlled RECs

This Phase I ESA has revealed no evidence of controlled RECs in connection with the Site.

8.4 De Minimis Conditions

This Phase I ESA has revealed no evidence of de minimis conditions in connection with the Site.

8.5 Other Findings

There are no other findings than those discussed in Section 8.0.

9.0 OPINION

This section includes the environmental professional's opinion(s) of the impact on the property of conditions identified in the findings section.

1. DEEDS Orlando and DEEDs Orlando Expanded, Large area of downtown that includes the Site

These area wide designations are not considered RECs for the Site.

2. ORLANDO GASIFICATION PLANT, 600 Block West Robinson Street

This site is not considered a REC for the TP.

10.0 CONCLUSIONS

ECT has conducted a Phase I ESA for the Site identified as the Peabo Child Care Center located at 815 Hills Street, Orlando, Florida. This Phase I ESA was conducted in conformance with the scope and limitations of ASTM Practice E1527-13 for Phase I ESAs. Deviations or data gaps from this Practice are described in Section 11 of this report.

The Phase I ESA investigation has revealed no evidence of RECs associated with the Site.

11.0 DEVIATIONS/LIMITING CONDITIONS

The following deviations/limiting conditions from ASTM practice were identified:

- Inspection of the interior of the onsite building was not conducted due to the presence of children and since the operation does not involve the use of hazardous materials and/or petroleum products. The limitation of the site interior inspection is considered a data failure. For the purposes and intent of this report, this data failure is not considered significant.
- ECT was not provided with chain of title for the subject parcels. The absence of a chain of title is considered a data failure. For the purposes and intent of this report, this data failure is not considered significant.
- A user questionnaire was mailed to the Peabo Child Care Center. At the time of this report preparation, the user questionnaire had not yet been returned to, or received by, ECT. If this questionnaire is received after submittal of this report, and the questionnaire reveals evidence that this report should be modified or changed based upon the information received in the questionnaire, then ECT will modify or change this Phase I ESA accordingly.
- Interviews with local government officials were not conducted as a part of this Phase I ESA. The absence of these interviews is considered a data failure. For the purposes and intent of this report, this data failure is not considered significant.

12.0 ADDITIONAL SERVICES

No additional services outside of the scope of work (i.e., asbestos, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and biological agents) were provided for this investigation.

14.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The environmental assessment described herein was conducted by the undersigned employees of AEC and ECT. ECT's investigation consisted solely of the activities described in the Introduction of this report, and in accordance with the Terms and Conditions of Services Authorization #XI.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312. I, have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312. The qualifications of the environmental professionals listed below are provided in **Appendix E**.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PEABO CHILDCARE CENTER
815 HILLS STREET
ORLANDO, FL 32805

TARGET PROPERTY COORDINATES

Latitude (North):	28.5452 - 28° 32' 42.72"
Longitude (West):	81.3919 - 81° 23' 30.84"
Universal Transverse Mercator:	Zone 17
UTM X (Meters):	461662.2
UTM Y (Meters):	3157488.0
Elevation:	104 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	28081-E4 ORLANDO WEST, FL
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ORANGE, FL	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	12095C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> ORLANDO WEST	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

23	1/2 - 1 Mile North	SE
38	1/2 - 1 Mile East	NE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Miocene

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Millhopper

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 145 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	64 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 4.5
2	64 inches	79 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 0.42	Max: 6 Min: 4.5

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	60 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Inquiry # 3976731.3

Contact: Jeff Peters

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ECT Env. Consulting & Tech Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

APPENDIX E

Kelly Eger-Smith, REM

President/Owner

Years of Experience: 22

REGISTRATIONS & CERTIFICATIONS

- Registered Environmental Manager (REM), National Registry of Environmental Professionals (NREP) 2002
- OSHA 40-Hour HAZWOPER 1998
- OSHA 8-hour HAZWOPER Annual Refresher 2013
- Human Resource Generalist Certification 2006

PROFESSIONAL EXPERIENCE

Ms. Eger began her career in environmental science in 1991 as a chemist where she performed a variety of environmental analyses including inorganic and organic chemistry, radiochemistry and microbiology. In 1995, Ms. Eger joined PBS&J (now Atkins) as the Technical Operations Manager and Health & Safety Officer for the firm's environmental testing laboratory in Orlando. In this role, she developed quality assurance & quality control manuals and standard operating procedures for specialized work conducted for the Department of the Army and the U.S. Fish & Wildlife Service. PBS&J closed their environmental laboratory in August 2000 though Ms. Eger remained through October 2000 to coordinate all chemical and hazardous waste packaging and disposal and finalization of the existing Federal contracts.

From October 2000 to March 2001, Ms. Eger served as the Interim Chemistry Coordinator for the Reedy Creek Improvement District (RCID) at Walt Disney World where she was responsible for overall quality assurance and staff production for the group.

From March 2001 through August 2012, Ms. Eger was the managing Principal of the Central Florida office of Miller Legg, a multidiscipline engineering firm based in South Florida. Ms. Eger lead the firm's Environmental Engineering group statewide, oversaw Miller Legg's Occupational Health and Safety Program, and she was the Vice President of Human Resources.

In August 2012, Ms. Eger co-founded American Environmental Consulting, Inc. (AEC), a **100% woman-owned small business enterprise**. Ms. Eger serves as the President of AEC. In her role, Ms. Eger is responsible for all technical services performed by the firm, quality assurance/quality control, client service, and daily operational management.

AREAS OF SPECIALIZATION

- Phase I/II Environmental Site Assessments (ESAs)
- Brownfields/Redevelopment
- Contamination/Site Assessments
- Storage Tanks
- Remediation
- Environmental Monitoring
- Hazardous Materials
- Risk Assessment and Feasibility Studies
- Facility Compliance Permitting
- Regulatory Compliance Audits
- Health and Safety
- Training Development & Delivery
- Quality Assurance/Quality Control
- Laboratory Services & Data Validation
- Community Outreach & Public Involvement
- Human Resources
- Risk Management

RELEVANT PROJECT EXPERIENCE

- Project Manager for hundreds of Phase I/II ESAs for public and private clients at sites including commercial, industrial, airports, rail yards, marinas, golf courses, roadway corridors, and residential and agricultural land. Public sector clients have included: City of Fort Lauderdale, City of Orange City, City of Coral Springs, City of Miramar, Florida Department of Environmental Protection (FDEP), City of Miramar, Palm Beach County, School Board of Broward County, St. Lucie County, Town of Jupiter, Town of Wellington and Treasure Coast Research Park. Private sector clients have included: Akerman Senterfitt, Bilzen Sumberg, Holland & Knight, Baker Hostetler, Gunster, Taylor Morrison, KB Homes, Park Square Homes, Centerline Homes, and Maronda Homes.
- Project Manager for a contamination assessment associated with dewatering system design and operation at the Fort Lauderdale International Airport.
- Project Manager for numerous petroleum underground storage tank source removal and assessment projects at a variety of sites. Services also included permitting, construction and reporting.
- Senior Environmental Scientist for projects involving contamination assessment and determination of potential impacts to roadway projects along FDOT and local corridors throughout Florida.
- Project Manager for an unlicensed landfill and disposal site in Opa Locka, Florida where soil and groundwater contamination and discarded asbestos containing material (ACM) were identified.
- Project Manager and Senior Environmental Scientist for contamination assessments of petroleum and hazardous waste impacts at numerous agricultural sites including crop farms, cattle ranches, and citrus groves throughout Florida.
- Project Manager for assessment and remediation projects in the Florida Department of Environmental Protection's petroleum cleanup reimbursement program (pre-approval program).
- Project Manager for a solid waste landfill Groundwater Monitoring Plan and Site Closure Assessment in Orange City, Volusia County, Florida.
- Project Manager for an air sparge and soil vapor extraction (SVE) system project to remediate dissolved petroleum contaminants from the shallow groundwater at a marina in the Florida Keys.
- Project Manager for an air sparge and SVE system project to remediate chlorinated solvents from the soil and groundwater at a former drycleaning facility in Winter Park, Florida.
- Project Manager for numerous projects involving successful regulatory negotiation for natural attenuation monitoring of chlorinated solvents at commercial and industrial sites.
- Environmental Scientist for projects involving evaluation and remediation of arsenic impacts associated with Chromated Copper Arsenate (CCA) lumber at over 100 children's playgrounds in 7 Florida counties.
- Project Manager for Spill Prevention Control and Countermeasure (SPCC) Plan preparation for a national automobile fueling and car wash chain.
- Compliance Auditor for projects at golf courses, dry cleaners and automotive repair facilities.

- Project Manager and Technical Consultant for Comprehensive Analytical Laboratory Services with the United States Department of the Army at the Rocky Mountain Arsenal. Project required extensive development of Quality Assurance Project Plans (QAPPS) and Laboratory Quality Control Plans (LQCPs).
- Developer/Instructor of a health and safety training program for maintenance personnel and principals at parochial schools in Central Florida.
- Developer/Instructor of an environmental compliance training program for vehicle maintenance personnel for the School Board of Broward County.
- Health & Safety Officer for projects involving infectious biological material processing. Required coordination with the United States Fish & Wildlife Service (USFWS) and Center for Disease Control (CDC), development and implementation of health and safety program, and personnel training.

PROFESSIONAL & CIVIC ACTIVITIES

Contract Manager; City of Orlando Brownfield Assessment Grant—Provided project management and technical oversight for all aspects of this EPA \$400,000 Petroleum and Hazardous Substances grant including programmatic support, public outreach, Phase I/II environmental site assessments (ESAs), and Analysis of Brownfield Cleanup Alternatives. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

Contract Manager; Orange County Brownfield Assessment Grant—Provided project management and technical oversight for all aspects of this EPA \$400,000 Petroleum and Hazardous Substances grant including programmatic support, public outreach, Phase I/II ESAs, and Analysis of Brownfield Cleanup Alternatives. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

Project Manager, Professional Services Contract, Brevard County, Florida—Responsible for task orders under the Brevard County Natural Resources Management Office. Projects include groundwater quality investigations to support the County's efforts in improving stormwater management, Phase I ESAs, and other monitoring projects. Work efforts have consisted of monitoring well installation, groundwater sampling for conventional and ultratrace metals parameters, reporting, and well abandonment.

Contract Manager; Orange County Risk Management and the City of Orlando—Provide management and technical oversight for all aspects of this continuing services contract including Phase I/II ESAs, site assessments, remedial action activities, natural attenuation monitoring, storage tank system management, interim remedial actions, source removal, and emergency response actions. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

AREAS OF SPECIALIZATION

Project Management, Financial Management, Brownfield Redevelopment, Remedial Investigation, Environmental Risk Management, Hazardous Waste Site Investigations, Contamination Assessments, Site Remediation, Hydrogeology, Phase I/II Environmental Site Assessments and Other Due Diligence Investigations, Peer Review, Risk Assessments, Feasibility Studies, Groundwater Supply Development, Environmental Audits, Water Quality

Contract Manager; City of Eustis Brownfield Assessment Grant—Provided project management and technical oversight for completion of Phase I/II ESAs, and participated in community outreach activities. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

Project Manager; Texaco Redimart, Independent Retail Petroleum Facility—Responsible for the completion of a site assessment at a petroleum retail facility in Orlando, Florida. A remedial action plan (RAP) was approved recommending bio-spargage technology. Construction drawings and bid specifications were completed, and selection of a remedial action construction (RAC) was made to the Florida Department of Environmental Protection (FDEP). After RAC activities are completed, remedial action operation and maintenance (O&M) will be initiated. Site rehabilitation is expected to take 2 years.

Project Manager, Emergency Response Services, MBM Food Services—Responsible for coordinating and completing the scheduling and over-sight of vacuum-truck services for a recorded 1,359 gallons of water removed from the stormwater pond in Lakeland, Florida. An absorbent boom was also floated

across the surface of the stormwater pond in an effort to consolidate the floating substance to a central collection point.

Project Manager; John Young Pump Station, FDEP Preapproval Program—Conducted site assessment activities in accordance with the low-scored site initiative at a facility in Orange County, Florida, impacted by petroleum products. Performed oversight for the acquisition of a right-of-way permit, completion of soil borings, installation of temporary monitor wells, collection of soil and groundwater samples, organization of data, updating tables, and signing/sealing a site assessment report (SAR).

Contract Manager; Orange County Risk Management and the City of Orlando—Provided management and technical oversight for all aspects of this continuing services contract including Phase I/II ESAs, site assessments, remedial action activities, natural attenuation monitoring, storage tank system management, interim remedial actions, source removal, and emergency response actions. Also responsible for certain administrative functions such as contract and proposal preparation and negotiations, W/MBE utilization goal tracking, supervision and oversight of subcontractors, reporting, invoicing, and client and regulatory contact.

Project Manager; Seminole County Environmental Services—Provided management and technical oversight of projects, budgets, and correspondence regarding Phase I and II ESAs; site assessment/remediation; underground storage tank (UST) and aboveground storage tank (AST) closures; stormwater pollution prevention program and spill prevention, control, and countermeasure (SPCC) plans; water quality sampling; brownfield consulting; and brownfield site rehabilitation agreement (BSRA) coordination.

Senior Geologist/Project Manager; Atlantic Housing Partners LLC (AHP)—Participated in the completion of hundreds of Phase I and Phase II ESAs throughout Florida, in addition to site assessment, source removal, and brownfield consulting to AHP on numerous projects.

Senior Geologist/Project Manager; Environmental Services, Confidential Client—Conducted environmental services including Interim RAP/reports, site assessment plans/reports, remedial alternative studies, remedial implementation plans, and UST and AST closures at a major tourist attraction in Orange County, Florida. Performed assessment and cleanup activities to satisfy corporate counsel and meet the requirements of Chapter 62-770, Florida Administrative Code (F.A.C.). Remediation technologies for these projects included remediation by bio-augmentation, source removal, and natural attenuation.

Senior Geologist; Portfolio of Abandoned Gas Stations, Estate of Richard E. Thoni—Performed assessment and cleanup activities to facilitate sale and redevelopment of former Thoni gasoline stations through Florida. Remediation activities were focused on implementing the most cost-effective methods

while expediting cleanup so that these underutilized properties may be brought back into the market for reuse. Remediation technologies for these projects included remediation by accelerated natural attenuation, source removal, air sparging, and soil vapor extraction.

Senior Geologist/Project Manager; Lakewood Pointe Brownfield, Lakewood Pointe LLC—Supported the brownfields designation process by presenting at a neighborhood public meeting and representing the owner at the City Commission meeting. Lakewood Pointe is an historic solid waste disposal area that has been redeveloped for affordable housing in Seffner, Florida. A SAR and RAP were completed to address petroleum and arsenic impacted soil and groundwater. A Directors Authorization was obtained from Hillsborough County Environmental Protection Commission so that site development could occur. A landfill gas monitoring system was installed concurrently with construction. Engineering and Institutional Controls were implemented to allow for the redevelopment while maintaining residential safeguards and the protection of ecologically sensitive lands.

Senior Geologist/Project Manager; Hughes Supply Brownfield, HD Supply—Worked closely with HD Supply, the City of Jacksonville, and the FDEP in preparing the BSRA for this industrial redevelopment and brownfield project in Jacksonville, Florida. Primary author of the RAP and RAP addendum which consisted of an innovative technological blend of chemical oxidation, landfarming, and soil vapor extraction to remediate the chlorinated solvent impacts at this property. Chemical injection, excavation, and permeable reactive barriers are currently designed for implementation in 2012.

Senior Geologist/Project Manager; Towne Park Brownfield, Winter Springs, FL—Completed a SAR and source removal plan in a limited time to address arsenic soil impacts associated with a former railroad spur that transects an age-restricted affordable housing project located in Seminole County, Florida.

Senior Geologist/Project Manager; Donnelly Cove, Atlantic Housing Partners, LLLP—Provided oversight of the completion of a Phase I ESA in accordance with American Society for Testing and Materials (ASTM) Standard 1527-05 criteria for the proposed Donnelly Cove residential development in Mt. Dora, Florida, consisting of several individual parcels totaling \pm 37.25 acres. The majority of the site was fallow citrus groves. A Phase II ESA was recommended for soil and groundwater sampling. One temporary monitoring well was installed on the west side (based on topographic relief) of the lake using a stainless steel hand auger. All tested parameters were below Florida groundwater concentration target levels and no additional assessment activities were recommended.

Project Manager; CR 466A Road Widening, Lake County Public Works—Completed Phase I ESA in Fruitland Park,

Florida, in accordance with ASTM Standard E1527-05. Debris piles of concrete, asphalt, scrap wood, PVC pipe, cinder block, limestone rock, and scrap metal were identified as a recognized environmental concern during the Phase I ESA. Due to the unknown source or nature of the debris, a Phase II ESA was recommended to identify the contents of the debris piles. The Phase II was completed in general accordance with the ASTM Standard E 1903-97. Hand-augured soil borings were completed, and soil samples were collected to record site-specific lithology and field screened for the presence of organic vapors using an organic vapor analyzer with flame ionization detector (OVA/FID) instrument.

Senior Geologist/Project Manager; Lake May Property, Lake County Public Lands—Coordinated several subcontractors and professional staff to meet a property closing deadline on the Lake May property in Eustis, Florida. During completion of a Phase I ESA, an irrigation pumping station was observed onsite with what appeared to be petroleum-stained soils near the engine block. Phase II soil sampling confirmed soil contamination was present but groundwater contamination was not. Source removal activities consisted of excavation and disposal of 29 tons of petroleum-impacted soils. No Further Action (NFA) was recommended and the property transaction proceeded as scheduled. Total timeframe from initiation of Phase I activities through source removal was approximately 7 weeks.

Senior Geologist/Project Manager; DJ's Auto, DeBary, Florida—Developed a Limited Scope Remedial Action Plan (LSRAP) that was approved for implementation by Volusia County Environmental Management (VCEM) using a combination of chemical oxidation/bio-augmentation, DJ's Auto is participating in the Abandoned Tank Restoration Program (ATRP) program and is eligible for funding through FDEP's Petroleum Preapproval Program. During the technology evaluation state, excavation was originally pursued as the primary methodology for remediation. However, given the close proximity to the onsite concrete block building, and the need to install sheet-piling to remove the petroleum-impacted soils to a depth of 17 feet bls, it was concluded that the vibrations from sheet-pile installation would probably cause stress cracks (at a minimum) to the concrete buildings walls and/or slab. Therefore, the remedial approach was re-evaluated to include a less intrusive approach consisting of chemical oxidation followed by bio-augmentation. Working with the vendor, a performance-based contractual mechanism was constructed to verify effectiveness and hydrocarbon mass reduction.

Project Manager; Former Speedway #6573, Speedway SuperAmerica LLC—Managed site rehabilitation activities that included site assessment, preparation of a RAP, remedial action implementation consisting of air sparging and vacuum extraction (AS/VE), post-active remedial monitoring (PARM), and ultimately a site rehabilitation completion order (SRCO) at the Former Speedway #6573 petroleum retail facility in Brooksville, Florida. The RAP was submitted to the FDEP for

the installation and operation of an AS/VE remedial system, which operated for a period of approximately 1 year. Efficiencies in equipment design, equipment enclosure, and AS/VE well placement allowed the equipment to achieve a 95 percent run time and the site to reach PARM status in less than 1 year. The system was “moth-balled” but remained onsite in case contaminant rebound occurred. PARM activities continued at the site until the SRCO was issued by the FDEP.

Project Manager; Removal and Closure of UST, Confidential Client—Provided oversight during the removal and closure of an UST at a tourist attraction in Orange County, Florida, by a Pollutant Storage Systems Specialty Contractor. A tank closure assessment report (TCAR) was prepared that included tabulated soil and groundwater analytical data, disposal manifests for the removed USTs, laboratory analytical reports, and a copy of the Discharge Reporting Form (DRF). The TCAR was submitted to Orange County Environmental Protection Department (OCEPD) within the reporting requirements timelines established in F.A.C. 62-761.800(3)(d).

Project Manager; SPCC Plans, Enterprise Rent-a-Car—Completed SPCC plans for two rental car facilities in Orlando, Florida, as outlined in applicable federal regulations (40 CFR 112). Activities completed included a site reconnaissance of the subject facilities; interviews with the environmental manager and/or maintenance engineer familiar with the tank systems and other oil storage systems at each of the areas of concern; review records of previous spills; evaluation of topography and surface water flow regimes; evaluation of environmentally sensitive areas and potential receptors if a spill were to occur; evaluation of potential spill sources; development of spill response measures; development of a list of emergency response personnel; and a review of available as-built drawings, surveys, and plans related to the structures and drainage pathways. Each SPCC plan was certified by a professional engineer.

Project Manager; O&M Activities, Solutions-IES—Monthly O&M activities were conducted at the decommissioned Naval Training Center facility in Orlando, Florida. A pump & treat remediation system was operated in an effort to keep TCE-contaminated groundwater from reaching Lake Druid. The TCE contamination is a product of poor housekeeping practices associated with a former laundry/dry cleaning establishment located at the base for approximately 40 years. Responsible for data management, contracting, change orders, scheduling, and invoicing.

Senior Geologist/Project Manager; Former Cumberland Farms 0090, Casselberry, FL—Performed forensic site investigation activities regarding commingled plumes at this former petroleum retail facility. Working with Seminole County Engineering Department, reviewed third-party data that was integral to designing a drilling and sampling program to better assist in the determination of separate contamination sources. After discrete drilling and sampling protocol was developed, the information was obtained and shared with the FDEP Central

district for the assignment of cleanup responsibility and cost-sharing percentages.

Project Manager; Compliance Inspections, Seminole County Board of County Commissioners—Managed this contract for AST and UST compliance inspections within Seminole County. Inspections were performed monthly to ensure facilities were in compliance with Chapters 62-761 and 62-762, F.A.C.. Inspections logs were then sent to the Contract Administrator at Seminole County with any notes or deficiencies noted and recommendations to correct the deficiencies.

Senior Geologist/Project Manager; Wayne's World BP, Independent Retail Petroleum Facility—Secured \$50,000 in funding from the FDEP to complete source removal activities during UST construction upgrades at an independent petroleum retail facility in Orlando, Florida. Duties included the supervision and oversight of all subcontractors, soil removal, disposal, dewatering, NPDES permitting/sampling, reporting, and invoicing.

Senior Geologist/Project Manager; Former Auto World, Seminole County Board of County Commissioners—Provided oversight of the completion of supplemental site assessment and remedial activities in Sanford, Florida, that included the excavation and disposal of approximately 65 tons of used-oil impacted soils, abandonment of a potable water well, removal of three hydraulic lifts and the associated with closure assessment report, the removal of two septic tanks, and the production of a natural attenuation monitoring plan.

Senior Geologist/Project Manager; Newalls Station, Independent Property Owner—Provided oversight of the completion of supplemental site assessment and remedial activities that included the installation of several shallow groundwater monitoring wells—several that were installed within a Florida Department of Transportation right-of-way in Altamonte Springs, Florida. Pilot testing activities included the installation of one multi-phase extraction well and one air-sparging well, and the completion of a pilot test for remedial design purposes.

Senior Geologist/Project Manager; Orange & Gore Chevron, Independent Retail Petroleum Facility—Conducted oversight of the completion of site assessment activities in Orlando, Florida, that included the installation of several soil borings, groundwater monitoring wells (both shallow and deep), aquifer testing, and obtaining offsite access.

Senior Geologist; Project Manager; Former Isuzu, Independent Property Owner—Provided oversight of the completion of source removal activities in Orlando, Florida, that included exploratory trenching, the installation of several free-product/vapor extraction horizontal wells, and several multi-phase extraction events using a vacuum truck. Remedial efforts are continuing through the FDEP's Petroleum Preapproval Program under the direction of OCEPD.

Senior Geologist/Project Manager; Former Umatilla Landfill, Lake County Department of Solid Waste—Worked with State of Florida and Lake County personnel to design a sampling program to delineate a contaminant plume emanating from a closed landfill in Umatilla, Florida. Responsible for budgets, assignment of resources and client management

Senior Geologist; EPA Consent Site, John's Auto Parts—Responsible for conducting contamination assessment activities at an operational junkyard and used auto parts facility in Bunnell, Florida. Contaminants include heavy solvents, metals, PCBs, and volatile organic compounds. Responsibilities included preparing work plans, managing field investigation activities, evaluating data and preparing assessment reports, and negotiating with federal, state and local regulatory officials for assessment and future closure of the facilities.

Senior Geologist/Project Manager; Former Ridge Bombing Range—Completed debris removal operations under short timeframe and adverse physical and weather conditions in order to facilitate a lease of the property. Approximately 800 tons of household debris was removed from the site within one week. Operations included the coordination of subcontractors, document control, client communication, and resident liaison during the debris removal activities.

Senior Geologist; Markham Woods Aquifer Storage and Recovery (ASR) Well, Seminole County Public Works—Assisted a team of engineers, geologists, and scientist assisting with the development of an ASR well system in Lake Mary, Florida. The ASR well system provides Seminole County cost-effective alternatives to storing and using potable water during times of surplus and demand. Specific duties included the development of the water quality testing program during project development. This program consists of pre-cycle, baseline testing, source water, and a minimum of four separate cycle tests.
