

2021 ADA TRANSITION PLAN UPDATE

Appendix F

Listing of Sidewalk Gaps for Network Completion

Appendix F - Listing of Sidewalk Gaps for Network Completion

Sidewalk gaps are discontinuities in the pedestrian access route where the existing pedestrian access route ends abruptly or does not permit pedestrian access to the roadway as part of a pedestrian street crossing.

These gaps are typically short sections of sidewalk that, if constructed, would provide pedestrian access to cross a roadway at a crossing or connect to another existing section of sidewalk.

The ADA self-assessment reviewed the entire sidewalk network totaling 983 miles of sidewalk within the City (100% sample) using high resolution 2020 aerial photography and identified 226 gaps totaling 16,813 linear feet of sidewalks to be constructed in order to provide a continuous path along the pedestrian access route. These gaps were identified as relatively short sidewalk segments connecting to existing sidewalks which, if constructed, could make a significant improvement to the pedestrian access routes and the completion of the Pedestrian Network.

Appendix F documents the priority and locations of the 226 sidewalk gaps throughout the City which were identified as part of the ADA self-assessment. The Appendix contains three items:

1. Prioritized Listing of Sidewalk Gaps sorted from highest to lowest priority and grouped by Commission District
2. Prioritized Listing of Sidewalk Gaps sorted from highest to lowest priority and grouped by Neighborhood
3. Future Sidewalks for Network Completion Report showing location and description of each sidewalk gap sorted by Sidewalk ID Number

Both the Prioritized Listing and the Curb Ramp Report contain the following common items:

- **Sidewalk ID** – The unique ID number that cross references the prioritized listing to the Future Sidewalk Report.
- **Status** – The current status of the sidewalk. In this instance, all of the sidewalks in this list are sidewalk gaps so that their status is listed as “Future for Network Completion” because they do not currently exist and are recommended for construction to close the gaps in the pedestrian network.
- **Street Name** – The name of the street that the sidewalk is located along.

- **Sidewalk Priority Score** – This is the prioritization score of the sidewalk based upon its proximity to pedestrian generators. It is calculated using the prioritization calculation methodology described in Section 8. This Transition Plan Update reused the 2008 sidewalk priority scores and they were not recalculated for the 2021 update. If a sidewalk was located along a roadway that did not exist in the 2008 study, it was given a score of zero (0) indicating that no score was calculated.
- **Commission District** – The City Commission District that the sidewalk is located within.
- **Neighborhood** – The City Neighborhood that the sidewalk is located within.
- **Gap Length** – The approximate length in feet of the sidewalk gap to be completed.

The Prioritized Listing of Sidewalk Gaps for Network Completion is a listing of the future sidewalks sorted from recommended highest to lowest priority for construction. This recommended priority was based on the Sidewalk Priority Score.

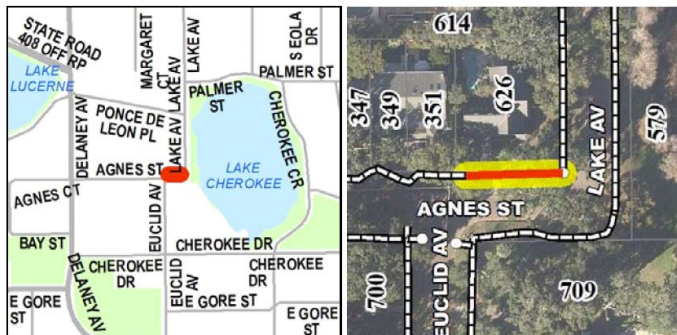

To use this Appendix the reader would find a sidewalk in the prioritized listing such as the sidewalk listing below, and then identify the Sidewalk ID number highlighted in the left most column.

City of Orlando ADA Transition Plan Update
Listing of Sidewalk Gaps for Network Completion

Grouped by Commission District and
Sorted from Highest to Lowest Priority

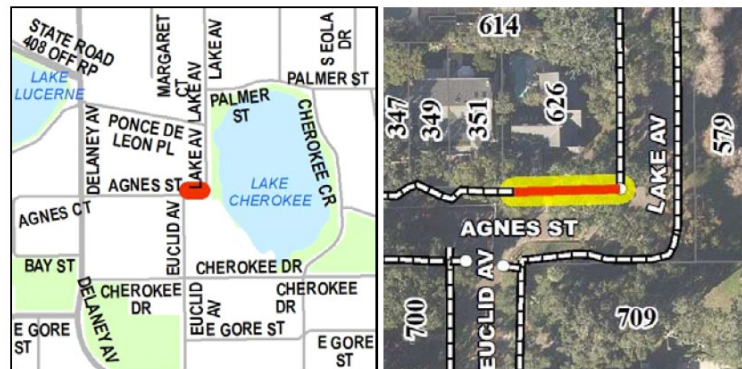

Sidewalk ID	Status	Street Name	Sidewalk Priority	Commission District	Neighborhood	Gap Length (feet)
S013034	Future for Network Completion	AGNES ST	62.0	4	Lake Cherokee	82

Using the Sidewalk ID number, the reader can look up the sidewalk gap in the Future Sidewalks for Network Completion Report which is sorted by the Sidewalk ID number to find its exact location in the City.

Sidewalk ID: S013034 Commission District: 4
 Status: Future for Network Completion
 Neighborhood: Lake Cherokee
 Street: AGNES ST
 Material: Future
 Length (ft): 82.2 Priority Score: 62

The sidewalk report contains two small sidewalk location maps. The map on the left is a location map showing the sidewalk gap location in relation to the surrounding City roadways. The map on the right is a site map showing the specific location of the sidewalk gap shown in red with a yellow highlight. The surrounding other sidewalks are shown as dashed white lines on the site map.
