  - [4.7 Training](#)
5. FORMS AND APPENDICES

**1. PURPOSE**

Mobile video recording systems are not a substitute for a member’s reasonable beliefs and perceptions and cannot account for a member’s physiological responses during certain incidents, such as visual tunneling and auditory exclusion. Mobile video recording systems should not be viewed as the only measure of truth because they may show more or less than what the member sees/hears/observes. Mobile video recording systems, however, have an important but limited use as one of many policing tools.

**2. POLICY**

It shall be the policy of the Orlando Police Department to utilize the Body-Worn Camera (BWC) and the In-Car Camera equipment, collectively referred to as “Mobile Video Recording Systems,” to document law enforcement interaction with the public with video and audio recordings. Through the use of mobile recording systems, this agency will better protect the rights of citizens and police officers while balancing privacy interests.

### 3. DEFINITIONS

Body-Worn Camera (BWC): A recording system that captures audio and video that is individually worn by assigned members and includes, at a minimum, a camera and audio recorder.

Docking Station: A fixed apparatus used to recharge and upload previously recorded audio and video (stored media) from the BWC.

In-Car Camera: A mobile video recording device installed in a police vehicle.

Livestreaming: The activation of a live video stream from an officer's BWC. This feature is only available while an officer's BWC is actively recording.

Mobile Video Recording System: A device that includes a camera and audio recorder that allows members to audio/video record in-progress incidents of law enforcement encounters.

Mobile Video System Administrator (MVSA): A department member with full administrator rights who assigns and tracks equipment, controls passwords, acts as a liaison with equipment vendor representatives, and is the department's subject matter expert on all vehicle and body-worn devices.

### 4. PROCEDURES

#### 4.1 IN-CAR CAMERAS

The assigned member shall ensure that the equipment is operating and positioned properly. Any technical, mechanical, or uploading difficulties should be brought to the attention of the Mobile Video Systems Administrator (MVSA) and the member's supervisor in an email immediately. Any supervisor who becomes aware of a crash involving an in-car camera-equipped vehicle shall inform the MVSA of that incident via email before the end of the tour of duty.

##### 4.1.1 ACTIVATIONS

The in-car camera system is active at all times during patrol functions. The equipment will automatically activate from the standby mode when predesignated conditions are met, such as activating the vehicle's emergency lights or a crash involving the vehicle is detected. The equipment can also be activated when the officer presses the record button on the camera or via the managing software. When activated, the in-car camera shall record the incident until concluded, or the officer leaves the scene. Members are reminded that in-car camera-generated videos will include a prebuffer of 60 seconds, without audio, similar to a body-worn camera (BWC) video.

Members shall activate the in-car camera and related equipment whenever a traffic stop is conducted or there is a potential for dealing with a suspect of a crime. An effort should be made to record the driving behavior or other observable statute violations leading to the initiation of a traffic stop. Activations will include, but are not limited to, self-initiated activity or responding to an incident in which vehicle emergency equipment is utilized. In-car cameras may be activated whenever the officer feels their use would be beneficial to his/her police duties. Deactivation shall not occur until enforcement action is complete.

The prisoner cage-facing camera shall be activated immediately upon placing a subject in the cage area of a police vehicle. When conducting transports of civilians in a police vehicle, both in-car cameras will record that activity until completed.

##### 4.1.2 UPLOADING VIDEOS

Video evidence recorded by in-car cameras is managed by the associated software and digital evidence management system (DEMS). Officers operating a vehicle equipped with an in-car camera shall use only

designated MCTs with the associated software installed and will ensure videos are uploaded via that software. In-car camera videos will be uploaded automatically by the software.

#### **4.1.3 IN-CAR CAMERA USE IN TRANSPORT VANS**

It is the responsibility of the officer who is operating, or is otherwise designated responsible for a transport van, during which videos are recorded to ensure those videos are properly labeled with the accurate case number and retention categories. Supervisors of any operation or special detail during which a transport van is used and records video will verify those videos are accurately labeled and retained. Any video evidence of a critical incident, as designated by a supervisor, shall be labeled and uploaded to the DEMS before the end of the responsible officer's tour of duty. The automated system that labels recordings may assist with this process.

#### **4.1.4 TRAINING**

The MVSA, or their designee, shall be responsible for providing training on the in-car camera equipment, management software, and DEMS when an officer is assigned an in-car camera-equipped vehicle. Additional cursory training will be made available for all members on the basic use of the equipment and software.

In-car camera equipment will be inspected during annual vehicle inspections conducted by the appropriate bureau.

## **4.2 BODY-WORN CAMERA PROCEDURES**

The Body-Worn Camera (BWC) is an additional means of documenting specific incidents in the field. Specific uses of the BWC are:

- a. To enhance member safety.
- b. To capture crimes in progress, whether perpetrated against the member or the community, and to maintain evidence for presentation in court.
- c. To document initial police response, the discovery of evidentiary items, and the actions of the member pursuant to an investigation.
- d. To augment member safety when a citizen should reasonably know his or her actions and statements are being recorded.
- e. To reduce unreasonable or false complaints made against members of the department in the course of their duties.
- f. To serve as a training and performance mechanism to ensure professionalism

### **4.2.1 MEMBER RESPONSIBILITIES**

1. Inspection and general maintenance of the BWC shall be the responsibility of the assigned member. The equipment shall be operated in accordance with the manufacturer's recommended guidelines and in compliance with agency training.
2. The BWC shall remain in a powered-on state and shall be worn by the member in accordance with section 4.2.3 of this policy until the conclusion of an officer's tour of duty. This is applicable to all members assigned a BWC. Undercover units are exempt from utilizing a BWC except when engaging in law enforcement activity with the expected result of apprehending a suspect or when executing a search warrant. Members may also power off their BWC while inside an OPD facility if they are not engaged in law enforcement actions as enumerated in section 3.2 of this policy or any other policy. Members shall power their BWC back on upon leaving the OPD facility or upon engaging in a law enforcement activity.
3. Prior to the beginning of each shift, the assigned member shall perform an inspection to ensure that the BWC is functional and fully charged. The camera features an LCD screen to indicate the operating mode and battery capacity. The BWC will emit audio prompts or beeps notifying the member of the system status, some of which may require the member's immediate attention. The battery status can be located on the BWC by checking the LCD screen on the top of the camera. Members are responsible for monitoring battery power status to ensure their BWC has sufficient

- battery charge for the duration of their shift, as well as any extra duty work scheduled outside their tour of duty.
4. Malfunctions or other operational problems, damage, loss, or theft of the BWC must be immediately reported to the member's supervisor and the Mobile Video System Administrator (MVSA) via email. An incident report shall be completed any time a BWC is damaged, lost, or stolen. Spare/replacement equipment will be obtained from the MVSA during normal business hours. During non-business hours, a Watch Commander can obtain a spare/replacement BWC from the Quartermaster Unit. An email shall be sent to the MVSA documenting the serial number, member's name, and the timeframe during which the camera was used. Since each BWC is specific to only one member, this is the only way that recordings associated with the member can be captured.
  5. Members shall only use mounts approved by the Orlando Police Department.
  6. All members assigned a BWC who are in uniform and engaged in law enforcement-related activity, to include overtime details or extra duty are required to wear and utilize the BWC.
  7. It is the responsibility of every member to ensure their issued BWC is operating with the most recent firmware updates from the manufacturer. Officers are required to leave their BWC docked in a docking station that is connected to the internet for a minimum of three consecutive hours once per month OR connect their BWC to the digital evidence management software and manually update the firmware once per month.

#### **4.2.2 ACTIVATION OF THE BODY-WORN CAMERA**

Buffering occurs in the first 60 seconds prior to activation. Only video is recorded during buffering.

A member shall activate the BWC immediately prior to arriving on scene of a dispatched call, at the start of any self-initiated activity, or when making contact with the public.

Members shall also ensure that, upon activation of their BWC, the BWC is positioned in a forward-facing direction and attached to the members' shoulder, chest, or waist.

The body-worn camera features several auto-activation features. These include, but are not limited to, activation or deployment of the conducted energy weapon (CEW, or Taser), drawing a firearm from a duty holster, and activation of an in-car camera system. Auto-activation is a convenience feature for officers and is not intended to be a replacement for manual activation. **It is ultimately each officer's responsibility to ensure their issued BWC is activated in accordance with this policy.**

#### **4.2.3 DEACTIVATION OF THE BODY-WORN CAMERA**

Once the camera is activated to record it may not be deactivated until the scene is secure. Members shall have their BWC recording while transporting any person for a law enforcement purpose.

Any employee involved in a vehicle pursuit shall not deactivate their BWC or other mobile video recording systems until the pursuit has ended as outlined in Policy and Procedure 1120, Vehicle Pursuits.

Members providing on-scene assistance to other law enforcement agencies shall notify them that the incident is being recorded.

If at any point during an activation, a member has reason to deactivate the BWC prior to the final conclusion of an incident, that member will verbally state the reason for the deactivation while the BWC is still recording.

Watch commanders/managers and supervisors on incident scenes or operations may have brief administrative or logistical conversations with other employees without activating body-worn cameras.

When members are interacting with victims, witnesses, and others from the community who request not to be recorded, members shall:

1. Balance the value of obtaining a recording with the reluctance of a victim, witness or others from the community to provide information while being recorded.
2. Members should use discretion in making the decision.
3. If the suspect of a crime is present, the member shall not turn off the BWC.

Members engaged in an incident who realize they failed to activate their BWC at the onset shall activate the camera as soon as practical. If a member fails to activate their BWC during a required situation or part of a situation, or interrupts or terminates the recording, they shall notify their supervisor as soon as reasonably possible and shall document the reason to their supervisor via a memorandum or an email. The supervisor should retain the email or memorandums to identify any problems. In cases where an official written report of the incident is required, the member shall document in the report the reason they failed to activate, interrupt, or terminate the recording.

#### **4.2.4 PROHIBITED RECORDINGS AND ACTIONS**

Unless conducting official law enforcement business that requires the member to use the BWC, the following is a list that members must adhere to:

1. The BWC will not be used to record personal activity.
2. The BWC will not be intentionally activated to record conversations of fellow employees without their knowledge during routine, non-enforcement-related activities.
3. The BWC will not be used to record confidential informants or undercover operations.
4. Unless the BWC is being used as part of an official law enforcement incident, the BWC will not be activated in places where a reasonable expectation of privacy exists, such as, but not limited to, locker rooms, dressing rooms, or restrooms.
5. Members will not make copies of any recordings for their personal use.
6. Members are prohibited from allowing anyone else to use another recording device to record media captured from the BWC.
7. Members shall not erase, alter, reuse, modify, or tamper with any recording. Only the authorized MVSA may erase any previously recorded digital recording.
8. Members shall not post BWC footage to any social media site without prior written approval from the Chief of Police or the Chief's designee.
9. Members assigned the BWC will not allow citizens to review the recordings except in furtherance of your official duties or unless otherwise authorized by policy.
10. Members shall not lead a person to believe the BWC has been deactivated when, in fact, the BWC is left active.
11. No member shall use a BWC not assigned to them. Only the MVSA or their designee can assign a BWC to a member.
12. Members shall not use the BWC to replace a written report or required written statements.
13. Members are not permitted to use personally owned or non-department-issued recording devices to record official duties. This does not apply to officers utilizing approved mobile applications on personal devices.

**Juvenile School Location:** Members shall not activate a body camera while on the grounds of any public, private or parochial elementary, middle or high or secondary school, except when responding to an imminent threat to life or where there is a potential for law enforcement activity.

**Medical Facilities:** Unless conducting official law enforcement duties, members shall not record patients during medical or psychological evaluations by a clinician or similar professional, or during treatment. Members shall be aware of patients' rights to privacy when in hospital settings. When recording in hospitals and other medical facilities, officers shall be careful to avoid recording persons other than the individual of interest.

#### **4.2.5 UPLOADING PROCEDURES**

At a minimum, members are required to upload the camera every other shift and prior to the beginning of their scheduled days off. Any functionality or serviceability problem shall be reported immediately to the MVSA and the member's supervisor via email.

Each shift, all members shall verify that any evidence collected with a mobile recording system during their prior shift is correctly labeled with the case number and category.

It is ultimately the recording member's responsibility to ensure BWC and in-car camera recordings are correctly labeled and retained as required by Florida law and agency expectations. When dispatched by CAD, certain members may be assisted by auto-tagging which allows for recorded videos to be automatically tagged with metadata. However, this is a convenience feature and may not be relied upon solely for correct information for collected evidence. Auto-tagging is not available to assist members in specialized units who do not rely upon CAD for their location/activities. For any corrections made or information manually entered, case numbers shall be added in the same format as listed in CAD, e.g. 2021-00123456, and categories shall be entered based on the appropriate level of crime being documented.

When a member becomes aware that any additional retention category is applicable to a mobile recording system file, it shall be manually added to the file by the end of their shift. Such additional retention categories shall include, but are not limited to response to resistance, officer injury, homicide, INOI, or public records request.

Members are encouraged to dock their BWC while at an OPD facility that is equipped with a docking station while on breaks or performing administrative tasks.

#### **4.2.6 SUPERVISORY RESPONSIBILITIES**

Supervisors are encouraged to ensure that all personnel assigned to their unit have uploaded their recordings as required by Section 4.2.5.

Supervisors will review recordings of all officers involved in the following incidents:

- Injury to a member(s)
- Injury to a prisoner
- Response to resistance
- When any member of the Department intentionally or unintentionally discharges a firearm
- Vehicle pursuits
- Vehicle crashes involving LEOs
- Citizen complaints
- Documented internal complaints
- As directed by the Chief of Police, Deputy Chief of Police, Professional Standards Division Commander, the Internal Affairs Manager, The Department Labor Advisor, or the Police Legal Advisor's Office.

Supervisors may also review video footage for documenting exemplary performance, heroic actions, and/or other praiseworthy service for appropriate recognition and commendation.

BWC footage is considered public record and available upon request to anyone in accordance with public records laws, unless there is a statutory exemption. Supervisors are not limited to the scope or reason of their review for officers they are responsible for. Examples of their review may include the following:

- Training
- Critique
- Early Intervention inquiries
- Civil claims
- Administrative inquiries
- Addressing behavioral or performance deficiencies

Through any video review process, including those by the ACSU, it shall be the responsibility of the supervisor to provide and follow up actions discovered from any review.

### **4.2.7 REVIEW OF RECORDINGS**

Officers may review their recorded videos to correctly document incidents, such as police reports and charging affidavits. Reviewing BWC footage recorded by another officer that was not assisting with a mutual investigation shall be done for official purposes only and shall not be viewed for any other purpose. When officers view recordings captured by other officers, the officer viewing the video shall provide an explanation in the “Notes” section of that recording in the digital evidence management system. That explanation will further document the official purpose of the review. Generalized statements, such as “training” or “safety” will not be considered sufficient, with the exception of the Professional Standards, Internal Affairs, or Crime Center sections. Failure to comply with this section may result in disciplinary action.

Members involved in certain incidents, as outlined in section 6 of this policy, may not review the BWC footage recorded by any other member without the express authorization of the Chief of Police, or the Chief’s designee. Notwithstanding this policy, officers shall be allowed to view all evidence, including body camera videos, prior to any investigative interview of that officer as required by the Officer’s Bill of Rights.

### **4.2.8 LIVESTREAMING**

Livestreaming is not intended to replace proper response by personnel or for purposes other than those outlined below.

#### **4.2.8.1 Authorized Users**

- a. Authorized users provided with the livestreaming feature are limited to sworn members assigned to the Crime Center (including those in a temporary capacity) and all sworn members with the rank of lieutenant or higher.
- b. Sworn members of the Crime Center shall be the primary users of the livestream feature during Crime Center operating hours. All other authorized users should refrain from using the livestreaming feature during Crime Center operating hours to avoid causing any technical difficulties.
- c. All authorized users will abide by the activation criteria.
- d. The Department shall utilize an automated system to maintain documentation of all authorized users and authorized users who activate the livestream feature to include name, date, and duration of activation.
- e. The Crime Center Sergeant shall notify the MVSA when any member has completed the required training to allow access to livestreaming and immediately when any member is no longer assisting or assigned to the Crime Center and access is no longer granted.
- f. Livestreaming may allow for two-way communication between the recording officer and authorized members. Two-way communication is not intended to replace the use of the police radio to relay

critical information and should be used as an additional method of communication when access to a police radio is not possible/practical.

**4.2.8.2 Activation Criteria**

Authorized users may activate the livestream feature when any of the following activation criteria are met:

- a. Initiation of a Signal 43 or Signal 44
- b. Initiation of a foot pursuit
- c. Any situation in which an officer is not responding to their radio
- d. To assist with identifying the specific location of an officer for responding officers
- e. Upon any indication of distress via radio traffic
- f. Any third-party notification of an officer in distress
- g. Upon request of the recording officer
- h. To enhance tactical operations and situational awareness during a significant incident (requires manager approval)
- i. Allowable for training and technical troubleshooting (requires manager approval)

**4.3 DOCUMENTATION**

When documenting law enforcement activity as required by Policy and Procedure 1113, Initial Police Reports, members shall note whether or not their BWC was activated during that law enforcement action, and if it was activated, members shall specifically articulate the reason why it was not activated. Members are encouraged to review their available videos while preparing written reports to ensure accuracy.

**4.4 MOBILE VIDEO SYSTEM ADMINISTRATOR**

The Mobile Video System Administrator is responsible for overall maintenance, management, training, and retention, and acts as a liaison to Information Technology, the Technology and Forensics Unit, and associated vendors. The Mobile Video System Administrator reports to the Professional Standards Division Commander.

**4.5 DISSEMINATION**

All digital media collected using the mobile video recording systems is public record as defined in Chapter 119, Florida Statutes. Public records requests shall be handled pursuant to established policy.

Accessing, copying, or releasing any recordings for other than official law enforcement purposes is strictly prohibited, except as required by law. BWC digital records shall only be accessed by or shared with authorized personnel. Such unauthorized dissemination or access shall result in discipline, up to and including termination.

**4.5.1 DISSEMINATION OF VIDEO RECORDS RELATING TO CERTAIN INCIDENTS**

**4.5.1.1 DISSEMINATION POLICY**

It is the policy of the department that transparency is critical to maintain accountability and enhance trust between the Orlando Police Department and the public. The department's commitment for transparency shall be pursued without compromising ongoing investigations, legitimate privacy concerns or applicable federal, state, and local laws.

**4.5.1.2 PROCEDURES**

**1. Release**

When members of the department are involved in certain incidents to include, officer involved shootings, any in-custody death and any other incident where the Chief of Police determines that release of video recordings is required to promote transparency, that is being investigated by an outside agency, such as the Florida Department of Law Enforcement ("FDLE"), all related body worn camera video shall be released, to the extent permissible under applicable law, and consistent with the Officer's Bill of Rights upon notification from the outside entity that the initial interviews are complete. The public release of the video recordings in these

circumstances shall occur no more than 30 days after the date of the incident, unless the Chief of Police, or the Chief's designee, determines there are extraordinary circumstances which dictate that the release of the video be delayed. If a video cannot be released within 30-days, the reason for the delay will be disclosed.

## 2. Notifications

Prior to the release of any video under this section, best efforts will be made to notify the following parties and give such parties an opportunity to review the video records prior to their release:

- a. Officers depicted in the video who had significant involvement in the law enforcement action
- b. The individual that was involved in the law enforcement action,
  - i. If the subject is deceased, then the subject's next of kin,
  - ii. If the subject is a juvenile, then the subject's parent or legal guardian,
- c. Other official agencies involved in the law enforcement action, including the investigating agency; and
- d. The State Attorney's Office ("SAO")

## 3. Redactions

Records released pursuant to this policy are subject to the restrictions on release of public records found in Ch. 119, Florida Statutes, "Public Records" and section 24 Article I of the Florida Constitution, the Officer's Bill of Rights and all other applicable state and federal laws.

If either the FDLE or the SAO objects to the release of the video or a portion thereof, they will be requested to place their objection to the release in writing to the Chief of Police. The Chief of Police, or designee, shall then evaluate the objection and will, based on the totality of the circumstance, either:

- i. Release the video with the objected to portion(s) included; or
- ii. Withhold the objected to portion(s) of the video from release until the basis for the objection has lapsed or the objecting agency withdraws its objection.

## 4. Immediate Release to Preserve Public Safety

Except where prohibited by law, the Chief of Police shall have the authority to unilaterally order the immediate release of any body camera video of a certain incident if the immediate release is necessary in the interest of public safety.

## 4.6 STORAGE AND RETENTION

### 4.6.1 AUTOMATIC DELETION OF BODY CAMERA VIDEOS UPON EXPIRATION OF THE RETENTION PERIOD

All recordings that meet the definition of "body camera" video as defined in [Florida State Statute 119.071\(2\)\(l\)](#) shall be maintained for the retention period set forth in Florida law, but for a minimum period of 90 days, as required by [Florida State Statute 119.071\(2\)\(l\)\(5\)](#). Any destruction or purging of a body camera recording sooner than 90 days after it is captured requires the expressed approval of the Police Legal Advisor's Office and shall only be done by the Mobile Video System Administrator. All videos shall be held for the full duration of their retention period as set forth in the Florida Retention Schedule (GS1 or GS2).

### 4.6.2 MANUAL DELETION OF VIDEOS RECORDED WITH A BODY-WORN CAMERA

Any video that does not meet the definition of "body camera" video as defined in [Florida State Statute 119.071\(2\)\(l\)](#) because it does not record audio or video data in the course of an officer performing her or his official duties, may be purged prior to the 90-day retention period if its administrative value is lost or never existed, and it is not subject to any other retention period. This type of non-law enforcement-related videos should be deleted as soon as permissible to maximize the privacy interest of our members.

If an officer becomes aware of a video that does not meet the definition set forth in [Florida State Statute 119.071\(2\)\(l\)](#) and contains sensitive content (e.g., an accidental activation in the restroom) that member shall notify the on-duty watch commander or MVSA via the chain-of-command. The on-duty watch commander shall then log in to the digital

evidence management system and categorize the video “confidential.” The watch commander shall then email Internal Affairs, relaying their action, to include the recording member’s name along with the date and time of the recording. An Internal Affairs investigator who is in the best position to protect the privacy and the dignity of the person to whom the video pertains (e.g. a female investigator may be asked to review a video from the women’s locker room) will then be assigned to review the entire video to ensure that no law enforcement activity was captured in the recording.

If no law enforcement activity was captured, then the reviewing investigator shall provide written confirmation to the Mobile Video System Administrator that the video shall be deleted. If the video captured both law enforcement activity and private information, then the private information shall be redacted, and the original video shall be marked confidential within the video retention system.

If there is not an appropriate Internal Affairs investigator available to maintain the privacy and dignity of the members captured therein, then the Internal Affairs sergeant shall, in consultation with the Criminal Investigation Division (CID) Captain, assign the most appropriate detective from CID to review the video.

**4.7 TRAINING**

Officers shall be trained and instructed before being assigned a mobile video recording system. Members shall only use BWCs after they have received agency-approved training. The MVSA will ensure that all BWC training meets current manufacturer guidelines and specifications, as well as department policy.

**5. FORMS AND APPENDICES**

N/A
